As you progress in your study of French, you may feel overwhelmed by unfamiliar grammar rules, such as when to use the *passé composé*; versus the *imparfait* or the *passé simple*, how to determine the gender of a noun, which words are “false friends”; to avoid, and how to remember the proper verb-preposition combinations. Also, you may not be aware of all the transfers and transpositions from one language to the other. For example, English speakers can “be a success”, while French speakers “have some success”. English speakers “walk to work”, while French speakers “go to work on foot”. In English, a person “makes a decision”, while in French, a person “takes a decision”. And often, a French negative is constructed in English as a positive.
