

HISTORY (HI-UY)

HI-UY 2514 Introduction to New York City History (4 Credits)

Typically offered Fall

This course looks at New York City's development, and its relationship to the global history of capitalism from the Florentine navigator Giovanni da Verrazzano's exploration in 1524 to the present. Major themes include the evolution of the city's political economy, political and economic influences on land and space use, the evolution of urban technology, and ethnic and class conflict in the urban environment. | Prerequisites: Completion of first year writing requirements. Co-requisites: None. Notes: Satisfies a HuSS elective.

Grading: Ugrd Tandon Graded

Repeatable for additional credit: No

HI-UY 3034 Introduction to Urban Infrastructure History (4 Credits)

Typically offered Fall

This survey of urban infrastructure history concentrates on water, sanitation and public health, electrical and communications systems, the development of housing and real estate, the security infrastructure and plans for the future, with one or two cities as a case study. The course explores how the urban political economy has shaped its physical environment and how technological innovations have made the city modern and postmodern. | Prerequisites: Completion of first year writing requirements. Co-requisites: None. Notes: Satisfies a HuSS elective.

Grading: Ugrd Tandon Graded

Repeatable for additional credit: No
