

# ELECTIVES (MSWEL-GS)

## **MSWEL-GS 2000 Introduction to Social Work Practice in the U.S. (3 Credits)**

*Typically offered occasionally*

The purpose of this course is to prepare international students for coursework and Field Instruction in the MSW Program. Lectures and experiential exercises will help students develop an understanding of 1) the background of social work in the U.S., 2) the core values of social work in the U.S., 3) core knowledge and the biopsychosocial framework, and 4) the U.S. cultural context of social work practice. This course also prepares students for Diversity, Racism, Oppression, and Privilege and the integrated Social Work Practice/Field Instruction courses beginning in January. The course will first examine the history of social work practice in the context of the present, explore implications of different theoretical and practice models with particular attention to person-in-environment, and the critical aspects of the helping relationship which is primary to promoting growth and change. Particular focus will be on social work values, ethics, cultural competence, and an understanding between client, agency and policy practice.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

## **MSWEL-GS 2003 Social Work & The Law (3 Credits)**

*Typically offered occasionally*

This course familiarizes social work students with the justice systems that govern the lives of many of our clients, specifically the child welfare, juvenile justice, and criminal justice systems - with flexibility based on the interests of the students. The intent of this course is to help social workers understand the law and legal systems in order to be more effective practitioners, clinicians and advocates. It will provide students with information on the legal rights of individuals, confidentiality, pertinent laws, and legal processes, as now more than ever, social workers are needed to help improve our justice systems. Social justice learning and growth will play a role throughout each class, and students will gain both practical and clinical skills to enhance their ability to support and to advocate for their future clients, including legal writing, forensic interviewing, assessments, advocacy, and testifying. Through role plays, group activities, case discussions, and a mock trial, students will understand the professional dynamic between lawyers and social workers, including their differing views and ethical systems, as well as how to collaborate to ensure best outcomes for clients in court.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

## **MSWEL-GS 2004 Adv Sem in Clin Pract With Individuals (3 Credits)**

*Typically offered occasionally*

Drawing largely on students' case presentations, this course focuses on applying in depth the principles and techniques of both short-term and extended intervention with individual clients. Gaps in students' mastery of knowledge and skills in all aspects of the interventive process are identified and addressed. Selected contemporary models of individual intervention and their research base are explored.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

## **MSWEL-GS 2010 Clinical Practice With Children (3 Credits)**

*Typically offered occasionally*

This course helps students to develop the knowledge and skills essential to working with children in a variety of settings. Drawing on contemporary theories of child development and research, the course focuses on assessment; goal setting; the use of individual, family, and group modalities; interventive principles and techniques; advocacy; and mobilization of resources. The impact of poverty and oppression is emphasized. Special consideration is given to students' case presentations and child welfare case vignettes.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

## **MSWEL-GS 2021 Independent Study (8 Credits)**

*Typically offered occasionally*

Students may engage in individual study in selected curriculum areas under special circumstances. The independent work is approved if the student furnishes evidence of mastery of the basic content in the social work area selected. The work done by the student in this course is carried out with the guidance of a member of the full-time faculty.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

## **MSWEL-GS 2023 Independent Study (1 Credit)**

*Typically offered occasionally*

Students may engage in individual study in selected curriculum areas under special circumstances. The independent work is approved if the student furnishes evidence of mastery of the basic content in the social work area selected. The work done by the student in this course is carried out with the guidance of a member of the full-time faculty.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** Yes

## **MSWEL-GS 2028 Clinical Practice With Substance Users & Their Families (3 Credits)**

*Typically offered occasionally*

This course focuses on assessment of and intervention with substance abusers and their families. It prepares students with the skills essential to a range of social work roles and practice modalities that can be used with this population. Stereotyped attitudes toward substance abusers are discussed. Special issues related to women, youth, the homeless, and dually diagnosed mentally ill/substance abusing populations are explored. Selected social policy and service delivery issues and research findings are considered.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

## **MSWEL-GS 2046 Social Work Practice in Child Welfare (3 Credits)**

*Typically offered occasionally*

This course provides students with the specialized knowledge and skills needed for practice in the field of child welfare. Course content includes an overview of relevant historical, legal, developmental, research, and policy issues. Within this framework, a range of social work services to children and families is examined from a practice perspective.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 2047 Comparative Short-Term Ther. Crisis Dynmc/CBT (3 Credits)***Typically offered occasionally*

Beginning with a historical and theoretical overview of short-term intervention, this course focuses on the criteria for selecting this type of approach, assessment, goal setting, phases of intervention, specific principles and techniques, and relationship issues. It considers different short-term models in work with individuals, families, and groups and ethical and other issues (e.g., funding of services, managed care, third-party payment) in the use of short-term approaches in a range of social work settings.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2049 Clin Prac With Couples (3 Credits)***Typically offered occasionally*

This course examines the principles and techniques of couple intervention from a variety of theoretical frameworks. Intervention with traditional and nontraditional forms of couple relationships is considered in the light of the differing nature of clients' presenting problems, diversity, and the agency setting. The interventive process is examined in depth.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2050 Feminist Theories & Practice (3 Credits)***Typically offered occasionally*

This course uses a biopsychosocial perspective as a basis for understanding female development. Beginning with a historical view, this course covers the works of Horney, moving to more contemporary theorists such as Dinnerstein, Chodorow, and Gilligan, among others. The biological and social aspects of female development are examined, as well as women and motherhood, lesbian relationships, women and work, and issues pertaining to women of color.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2051 Object Relations (3 Credits)***Typically offered occasionally*

The works of several theorists from both the object relations and ego psychology schools are studied. Theorists such as Jacobson, Hartmann, Klein, Fairbairn, Guntrip, and Winnicott are covered.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2053 Cognitive & Behavioral Intervention (3 Credits)***Typically offered occasionally*

This course considers the value base and theoretical and research underpinnings of cognitive and behavior intervention and the use and integration of these models within a biopsychosocial perspective. Practice principles and techniques that can be used in work with a variety of client problems are examined along with ethical issues.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2055 Social Work Practice with Traumatized Children and Adolescents (3 Credits)***Typically offered occasionally*

This elective course offers students the opportunity to deepen their knowledge about traumatic events and life stressors that impact children/adolescents and their families. A bio-psycho-social perspective with emphasis on attachment and emotional regulation is used to prepare students to work with trauma in the context of their family, school, social and support systems Children's/adolescent's coping mechanisms and resiliency are examined, particularly related to children exposed to multiple and severe life stressors. Evidence-based models of treatment and prevention involving the child, family and community will be discussed. Trauma scenarios studied will include but are not limited to: community and family violence and neglect and stressors such as poverty, interpersonal violence, bullying, systemic and historical trauma, illness and loss.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2059 Clin Prac W/Adult Surv Sexual Abuse & Violence (3 Credits)***Typically offered occasionally*

after considering the role of societal attitudes that are crucial in understanding the prevalence of sexual abuse, the course focuses on helping students to understand the special needs of both female and male adult survivors of sexual abuse and violence. It explores the stigma attached to victims of incest and rape. It prepares students to recognize the presence and to explore the history of sexual abuse, and it equips them with the skills essential to the use of the individual, family, and group intervention with this population. Current controversies (e.g., regarding the law, the press, and sexism) are addressed.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2063 Social Work & Family Violence (3 Credits)***Typically offered occasionally*

In the U.S., a woman is battered by her partner, lover, or husband every nine seconds. Yet, clinicians and advocates are often unprepared for the unique challenges posed by working with survivors of intimate abuse. Drawing on clinical and policy traditions, this course will teach you the skills you need to address the complex practice and legal issues these clients face. You will learn how victims of domestic violence survive the trauma experience and how your clinical and advocacy work with battered women can be used to change how the legal system responds to them. The course content focuses on the needs, interests, clinical, and policy concerns of survivors of intimate abuse, batterers, children who witness domestic violence, and on communities of color.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No

**MSWEL-GS 2064 Social Work Practice with Adolescents in Schools (3 Credits)***Typically offered occasionally*

This course is a practice elective which focuses on social work practice within secondary schools (junior and senior high schools) as well as the normative developmental tasks and concerns/problems of early, middle, and late adolescents within school settings. The course will provide an overview of a wide range of social work roles, program models, modalities, and interventive strategies within schools. Attention will be given to a variety of social work roles including, clinical practice with adolescents, parents, families, and groups; consultation and collaboration with interdisciplinary staff within schools and neighboring communities; as well as prevention, program development, and organizational/systems work within schools. Specific areas of focus will include: academic and learning problems, special education, depression and suicidality, acting-out behaviors, issues related to health and sexuality, bullying, violence prevention/intervention, and substance use/abuse. Advocacy, and mediation are emphasized. The course addresses current urban issues that influence school practice such as violence, homelessness, AIDS, substance abuse, physical and sexual abuse, diversity, and cross-cultural communication.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2070 Violence in Amer Society (3 Credits)***Typically offered occasionally*

Violence has become epidemic on a national and local level and is dramatically affecting every aspect of our society. The psychological and physical impact of violence on the individual, the family, and the community is extensive. Furthermore, violence begets violence": the victim of today becomes the victimizer of the future. As the problem of violence has increased

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2078 Understanding Structural Racism: Its History and Current Impact (2 Credits)***Typically offered occasionally*

A generation after the Civil Rights Movement and the election of an African American President, racism continues to be the nation's most intractable social problem, and the gap between Whites, Blacks, and Hispanics has increased. A systems perspective reveals persistent disproportional outcomes on all measures of quality of life in the United States. From wealth accumulation to health care; from incarceration rates to employment and unemployment, from immigration policy to the opposition of ethnic studies, dramatic ethnic and racial disparities continue to vex the nation. From a personal perspective, racial prejudice and invective permeate the civil society. While respect for human diversity in its many forms, and social justice are core values of the profession of social work, this course specifically focuses on the impact of institutional racism, social and economic injustices that impact people of color in health and human services. Social workers interface with clients of color in virtually all practice settings, and have the highest visibility amongst clinical disciplines in the mental health system. Therefore, an understanding of the dynamics of race and racism is an essential requirement if we are to "do no harm" and engage clients in effective therapeutic alliances. The course introduced students to the many dimensions of race and racism that influence service outcomes, and implications for direct practice in agency-based settings with clients of color. The course explores and describes the phenomenon of structural racism as fundamental to the construct of the United States and how it can be undone. Using the principles taught in the People's Institute for Survival and Beyond workshop, the course examines the history of racism in the United States and current manifestations in health and human services delivery systems with emphasis on the mental health system and implications for direct social work practice.

**Grading:** Grad Silver Pass/Fail**Repeatable for additional credit:** No**MSWEL-GS 2082 An Intro to Conflict Mediation (3 Credits)***Typically offered occasionally*

This course is an introduction to the theory and practice of conflict resolution with an emphasis on social work applications. Students will learn the communication skills necessary for conflict resolution processes. Topics covered will include neutrality skills, causes of conflict, intervention strategies, differential use of the conflict resolution process. Practical skills in mediation, negotiation and conciliation will be covered. Multi-party conflict resolution and application of conflict resolution skills to organizational practice will be touched on. Uses of mediation in divorce and custody cases will be reviewed.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2086 Clinical Practice With Families (3 Credits)***Typically offered occasionally*

This course will offer students an introduction to social work practice with children and their families and will acquaint students with the diversity of family composition, family rules and family roles in the 2000's. Students will learn about conventional nuclear family composition, the single-parent home, foster and adoptive homes, homes where children and parents are cross-racial dyads and triads, and homes where lesbian or gay partners are engaged in rearing a natural-born and/or an adopted child. Engaging such families from diverse racial, ethnic, economic, religious and cultural backgrounds will be a major focus in this course, in order to promote students' Current Issues in Contemporary Family Life.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No

**MSWEL-GS 2087 Grief, Loss and Bereavement (3 Credits)***Typically offered occasionally*

This course will introduce the student to the signs and affects related to grief, loss and bereavement. Each will be defined, described, and presented in how it appears in latent or manifest form. The overall objective of this course is to help students understand acknowledged and unacknowledged grief and/or depression and the effects of significant losses in life. The process of mourning will be illustrated with case vignettes and presented with focus on the life cycle and examined in accord with particular developmental issues per age and stage of life.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2088 Theories of Attachment in Early Development (3 Credits)***Typically offered occasionally*

The overall objective of this course is to look at attachment in infancy and early childhood in a contemporary cultural context. Various theories and relevant research are reviewed from a critical perspective. The dialectic between attachment and separation will be explored. Attachment is viewed in the context of an expanding environment with consideration of multiple caretakers, multiple social roles, and diversity of family life and parenting roles.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2095 Sexual and Gender Minorities: Past, Present, Future (3 Credits)***Typically offered occasionally*

FORMERLY TITLED CONTEMPORARY GLBT ISSUES. This course aims to prepare students for competency in micro and macro practice with lesbian, gay, bisexual, transgender, and queer people by providing a deeper understanding of the history and construction of sexual and gender minority identities and communities around the world. It will also examine the experience of minority stress by members of these populations, including sources of stress as well as sources of support in families and communities. Intersectionality, social and economic justice, and a global perspective will provide a framework for understanding these issues.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2096 Cult. Competent Pract/W Urban Youth/Families (3 Credits)***Typically offered occasionally*

This course provides students with an opportunity to develop engagement, assessment and intervention skills in individual, family, and group work with urban youth (aged 11-21). This course provides students with an opportunity to develop engagement, assessment and intervention skills in individual, family, and group work with urban youth (aged 11-21). The course will focus on practice within a wide range of government and agency-based settings, including: prevention, school, mental health, foster care, criminal justice and residential programs. Attention will be given to the development of skills that foster interdisciplinary collaboration within and between urban systems of care. There will be a focus on understanding the ways in which racism and other forms of oppression can impact both adolescent development and social service delivery systems.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2097 S W Pract in The Context Diaster, Trauma & Loss (3 Credits)***Typically offered occasionally*

Course description coming soon.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2101 Forensic Justice and Problem-Solving Courts (3 Credits)***Typically offered occasionally*

Social work clinicians play a key role in a new approach to criminal justice: therapeutic jurisprudence. Students will become familiar with traditional court approaches in a variety of cases and how the presence of the social work professional in the courtroom results in case resolutions that are more meaningful for the court, for the community and for the defendant. Participants will become familiar with court papers and presenting clinical recommendations in court. The goals of the judge, the prosecution and the defense in both the traditional and therapeutic/problem-solving courts will be discussed. The course concludes with an overview of therapeutic courts nationally and internationally.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2102 Introduction to Art Therapy (3 Credits)***Typically offered occasionally*

Fundamental principles of art therapy practice will be presented through discussions and case presentations. Students learn the historical development of the profession, its distinction from other disciplines and its commonalities to social sciences. Basic pictorial analyses examine artistic processes and products. Students study the artistic expression across the developmental span. Clinical applications for populations struggling with varied psychological and physiological issues are offered. Each class includes experiential art making to demonstrate interventions.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2104 Evidence Based Practice (3 Credits)***Typically offered occasionally*

This course is aimed at developing the knowledge and skills necessary for working with individuals with a diagnosis of serious mental illness using recovery-oriented, evidence-based practices. It is designed for MSW students and MSW mental health practitioners. Students will become familiar with evidence-based practices, within a recovery-oriented paradigm, as a general approach to practice as well as specific evidence-based interventions to use for individuals with a diagnosis of serious mental illness. It is assumed that students will have a basic knowledge of serious mental illness as a pre- or co-requisite, however a review will be provided. Students will learn to examine research literature to determine the various levels of support for specific interventions and essential principles for translating research into practice. In addition, they will identify the appropriate treatment outcomes that reflect effective, quality mental health practice. Each evidence-based practice presented will also be examined for its utility with diverse groups. Providing assessment and treatment to a diverse group of individuals with a diagnosis of serious mental illness is the focus of this course and will be discussed in detail.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2105 Intimate Family Violence (3 Credits)***Typically offered occasionally*

Course description coming soon.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No

**MSWEL-GS 2106 Comparative Criminal Justice (3 Credits)***Typically offered occasionally*

Domestic violence occurs everywhere, with different resonances in different cultures. Every country has a criminal justice system, but the attempt to use arrest and prosecution as tools against domestic violence is far from universal. Within each nation where domestic violence is prosecuted, there is debate about whether a criminal-court approach will ever make more than a marginal difference. This debate, examined in a comparative and interdisciplinary context, is the focus of the weekly seminar. Specific areas of inquiry will include mandatory arrest, prosecutorial discretion, no-drop policies, and mandatory reporting to law enforcement by health care providers. The main points of comparison will be India and the United States. The Comparative Criminal Justice Seminar offered by the Law School is open to SSW and law students. It offers the opportunity (1) to compare and contrast different nations' use of criminal prosecution to combat domestic violence and (2) to develop a critical analysis of the advantages and limitations of different criminal justice strategies. There are no pre-requisites, but students will find it helpful to have academic training or practical experience in one or more of the following areas: domestic violence counseling, policy work, or litigation; criminal law or criminal procedure; comparative or international law or policy; and interdisciplinary work. Course enrollment is by instructor approval.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2108 SW Treatment W Difficult Clients (3 Credits)***Typically offered occasionally*

Course description coming soon.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2109 Critical Thinking Spirituality/Psych (3 Credits)***Typically offered occasionally*

This is a course with three aspects: critical thinking, spirituality, and psychotherapy. In the last few years, spirituality has become a visibly contentious social issue in American life. From fundamentalism to secular humanism to New Age-ism to atheism, there is a great deal of social controversy and conflict over spirituality. Some people regard the 9/11 terrorist attack on the Twin Towers of the World Trade Center or the flooding of New Orleans by Hurricane Katrina as a punitive divine intervention by a god of wrath angry at American sins. Other people argue that "Creation Science" or "Intelligent Design" should be taught instead of evolutionary theory. Some people sue to remove the phrase "One Nation under God" from the Pledge of Allegiance and the phrase "In God We Trust" from the dollar bill. Other people attempt to install the Ten Commandments in courthouses and state capitols. Some people believe in one god. Other people believe in many gods and goddesses. Over 50 percent of Americans believe literally in the virgin birth of Jesus. Presidents from Jimmy Carter to George W. Bush describe themselves as "born again." Freud regarded religion as an illusion with no future. Jung affirmed the religious function of the psyche. The question in this course is: As social workers

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2110 An Integrative Gestalt Therapy Approach to Social Work Practice (3 Credits)***Typically offered occasionally*

Gestalt therapy, with its emphasis on respect for the client's subjective experience, its strengths based perspective, and its focus on an authentic relationship between the client and worker, provides a holistic and humanistic framework for contemporary social work practice. In conjunction with Self-Psychology's focus on remaining empathically attuned to the client's emotional needs, this course will focus intensely on how to enrich the client-worker relationship. This course will cover the basic concepts of both Gestalt Therapy and Self-Psychology and how they can be applied to working with clients in any social work setting. In addition to class discussion and case presentation, this class will involve a considerable amount of experiential work.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2111 Poverty and Inequality: Ecological Perspective (3 Credits)***Typically offered occasionally*

This course examines the social, economic, and political dimensions of poverty and inequality in the United States. The course will offer a critical analysis of poverty and inequality with an analytic and descriptive focus on competing theories examining the causes of poverty, the role of policy, and socioeconomic dimensions of stratification, including race, ethnicity, class, gender, immigration status, and other factors. In this course, we will examine the existing and emerging policy issues related to ending poverty. Those policy issues include, although may not be limited to: 1.) Education and Human Capital Development; 2.) Health, Health Care, and Mental Health; 3.) Wealth and Asset Development; 4.) Housing and Community Development; 5.) Work and Employment; and 6.) Family and Social Structures. International perspectives may also be considered.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2112 Social Work Practice in Health and Mental Health (3 Credits)***Typically offered occasionally*

This course uses three frameworks: conceptualizations based on mind-body medicine, the study of chronic illness and its impact on the family and interdisciplinary perspectives about the chronic illness. The class will include an overview of several disorders that impact both health and mental health and look at the interrelationship between the body and the mind. A variety of guest speakers, who are experts in their fields, will be invited to present. The course will cover a number of disorders across the life cycle, from childhood to later life. For example, the course will cover Attention Deficit Disorder in childhood; in adulthood, we will look at multiple sclerosis and in older age, Parkinson disease, memory loss and dementia and discuss end of life issues. Using a family-centered approach, the course will examine how these disorders impact both the individual and family. To enhance learning and understanding from the client and family's perspective the class will include panels of persons and families impacted with some of the diseases covered in class. Implications for social work practice will be covered throughout.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No

**MSWEL-GS 2113 Clinical Pract in Illnss and Health Care (3 Credits)***Typically offered occasionally*

This course focuses on social work practice in medicine and the relationship between physical health, social environments, and psychological functioning. Students will be introduced to the history, roles, and functions of social workers in a variety of health care settings. Student learning will be grounded in the biopsychosocial model, and will address a number of domains, including the impact of illness on families, health communication and behavior, beliefs and spirituality, culture and class. A number of professional issues facing health care social workers will be discussed, including interdisciplinary collaboration, role and boundary definition, surviving managed care, and navigating ethical dilemmas. Activities will include training in conceptualization of illness challenges and presenting problems, writing case material, building self-awareness and identifying clinical interface issues, and the compilation of a clinician's "toolbox" for direct practice on the front lines."

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2114 Culture & Social Issues of Central America (3 Credits)***Typically offered occasionally*

This course will introduce students to the European-heritage and Indigenous cultures of and contemporary socio-political issues facing developing countries with a focus on Latin America emphasizing issues affecting children and families in of Honduras, El Salvador, Nicaragua, Guatemala, and Costa Rica. Using Costa Rica as the focus of study, domestic and international aid responses to poverty and vulnerable populations, public and private, will be explored. This course is an opportunity to learn about and from the developing world? in Costa Rica! From a global perspective (with an emphasis on Latin America), we will explore social policy issues as they affect vulnerable populations, particularly children and families. We will be introduced to domestic and international aid responses through guest lectures and site visits. For the field portion of the program, we will be spending three to six afternoons at a public child care center for very poor, pre-school children, half of whom are Costa Rican and half of whom are from Nicaragua. Students should be prepared to engage the children in activities (arts and crafts, music, dance, games), providing their own supplies.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2115 Social Work Practice with Immigrants/Refugees (3 Credits)***Typically offered occasionally*

This practice elective is designed to help students address the special needs and problems faced by immigrant and refugee clients and communities, and to develop culturally competent knowledge, skills, and values that will improve delivery of culturally sensitive and culturally responsive services for refugees and displaced persons, both domestically and internationally. This course will examine social work practice in relation to major themes, including the refugee experience; the impact of relocation on individuals, families and communities; and the psychological ramifications of war trauma. This practice elective is designed to help students address the special needs and problems faced by immigrant and refugee clients and communities, and to develop culturally competent knowledge, skills, and values that will improve delivery of culturally sensitive and culturally responsive services for refugees and displaced persons, both domestically and internationally. This course will examine social work practice in relation to major themes, including the refugee experience; the impact of relocation on individuals, families and communities; the psychological ramifications of war trauma and torture; and the phenomenon of human trafficking. Interventions with individuals, families, and communities will be explored across cultures with particularly vulnerable populations. The course will provide an overview of such issues as loss and mourning for homeland; adaptation and coping with a new culture; cross-cultural and inter-ethnic group conflicts; resettlement and family reunification issues; and a range of world view perspectives including acculturation and assimilation, biculturalism, marginality, and traditional ethnic identities. The course will emphasize the advocacy and empowerment roles of social workers when addressing U.S. social policies towards immigrants in the wake of 9/11, and in fighting against anti-immigrant policies, sanctions, and discriminatory practices.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2116 Research Project Sem II (3 Credits)***Typically offered occasionally*

Course description coming soon.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2117 Clinical Practice With Aging Populations (3 Credits)***Typically offered occasionally*

This course provides an introduction to theoretical frameworks and practice of clinical social work interventions with older adults and their families. It is designed to familiarize students with the biological, psychological and social aspects of the aging process. Emphasis is placed on understanding late-life problems and mental disorders, on developing skills in diagnostic assessment, and on formulating and implementing treatment plans. Students are expected to develop proficiency with the core competencies in geriatric social work, including the provision of comprehensive assessment and intervention skills.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No

**MSWEL-GS 2118 Social Work Foundation for Leadership (3 Credits)***Typically offered occasionally*

This course shatters the myth that social workers have a low visibility and skills for leadership in the political, business, legal, and public policy infrastructures. Over the course of the semester, students will examine the extensive contributions of the profession in government, public and private sector and the transferability of social work skills to a range of leadership roles that change individual lives, transform communities, and create broad based policy and societal impact. Students will examine policy issues and develop strategies to affect change. The class will be challenged to critically group think about finding innovative solutions to long standing problems and how to map a career path for successful leadership.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2119 Mental Illness and The Criminal Justice System (3 Credits)***Typically offered occasionally*

This course examines the relationship between public perceptions of the mentally ill, violence, and the criminalization of mental illness. The impact of these relationships highlights the outcomes affecting individuals, families, and groups in their environment, contributing further to their influence and links between policy, practice, and research. Issue pertaining to risk assessment and identification of potential violence in the mentally ill population will be discussed. This course examines the relationship between public perceptions of the mentally ill, violence, and the criminalization of mental illness. The impact of these relationships highlights the outcomes affecting individuals, families, and groups in their environment, contributing further to their influence and links between policy, practice, and research. Issue pertaining to risk assessment and identification of potential violence in the mentally ill population will be discussed. Legal perspectives, with an emphasis on philosophical shifts, will address the criminalization of mental illness in tandem with the criminal justice system and social justice. Model intervention strategies and program presentations addressing violence in clinical practice will be dealt with.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2120 Creative Arts Therapy in Clinical Social Work (3 Credits)***Typically offered occasionally*

This course will cover the application of creative arts therapy theory and practice within a social work framework. The class will focus primarily on the field of art therapy, but will also include some exposure, through guest lecturers, to other non-verbal creative arts modalities such as: music therapy, drama therapy, and movement/dance therapy. The class is designed to include a substantial amount of hands-on artmaking and role-play to provide students with practical tools for incorporating the arts into practice with a variety of populations. The course will utilize case material from students' field work when appropriate to illustrate how to design effective art therapy interventions. The following populations and topics will be covered as they relate to art and therapy interventions: client engagement; treatment planning; developmental stages of drawing, work with children, adolescents, adults and families; trauma; relational abuse; cultural sensitivity, and the unique counter-transference issues of non-verbal therapies.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2123 Independent Study (1-3 Credits)***Typically offered occasionally*

Students may engage in individual study in selected curriculum areas under special circumstances. The independent work is approved if the student furnishes evidence of mastery of the basic content in the social work area selected. The work done by the student in this course is carried out with the guidance of a member of the full-time faculty.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2127 Community Organization (3 Credits)***Typically offered occasionally*

Community organizing and community social work have historically been and continue to be an essential part of social work. Community organizing is rooted in the values of the social work profession and provides a practical framework for movements toward social and economic justice at a community level. Community organizing can be seen as one tool to redress imbalances between individual and communities experiencing oppression, and structures, institutions and people administering power over them. Essential to the success of community organizing is an understanding and ongoing practice of intersectionality, self reflection, and authentic listening - all of which will be central themes of this course. This elective will offer the student an overview of how methods of community organizing accomplish goals that are relevant to social workers, how to develop a personal narrative and practice for community work, as well as opportunities to practice the skills and strategies of community organizing in the real world. The course is divided into four sections: (1) History: Movements, Power, and Organizing; (2) Self: Personal Narrative, Reflection, & Organizing Practice; (3) Community: Social Services & Community Organizing; (4) Practice: Organizing in Action.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2128 Theories of Child Development (3 Credits)***Typically offered occasionally*

This course is designed to address the full range of child development. Starting with beginning years including issues related to temperament, the parent-child relationship, attachment, and affect regulation. Brain development, including language and cognitive development, the psychoanalytic concepts of representation, internalization, and the development of the self will be explored. The importance of play and to development of the toddler will be discussed. We will also cover the pre-school years and include behavior difficulties in children of this age. The important cognitive concepts of Piaget will be included. Middle childhood development will be covered, as well as, school of this age group. An analysis of risk factors and the effects of abuse and trauma will be explored. Issues of diversity will be included across all age groups.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2129 Clinical Practice With Children & Their Families (3 Credits)***Typically offered occasionally*

This course will introduce students to the foundations of clinical work with children focusing on the history and development of child therapy, including working with parents, therapy techniques and the therapeutic process. The course will heighten the student's sensitivity to the experiential world of the child.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No

**MSWEL-GS 2131 Critical Analysis Psychotherapy Theories (3 Credits)***Typically offered occasionally*

This course will take a critical-analysis approach to considering the contributions and often excessive claims of selected theories of psychotherapy, with a focus on evidence-based theories. We will rely heavily on microanalysis of videoed clinical interviews as well as readings in the research and scholarly literature to evaluate each theory. By considering how the client's problem, which is addressed in a video from one theoretical framework, can be approached through a multi-theoretical lens, we will work towards achieving an integrative clinical perspective.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2132 Depression: Conceptual Issues & Clinical Perspe (3 Credits)***Typically offered occasionally*

This intensive course will critically examine selected recent developments and controversies over how depressive disorder and pathological grief are defined, diagnosed, and treated. The emphasis will be on evidence-based practice. Videos will be used wherever possible to learn and critique specific clinical approaches. We will also examine the changes to the diagnosis of mood disorders and grief disorders in DSM-5 and the upcoming DSM-5-TR, and the intense debates that swirled around these diagnostic changes. Readings will draw on both the empirical-research and conceptual-theoretical literatures. Theories to be considered tentatively include Interpersonal Psychotherapy, Evolutionary Psychological Approaches, Cognitive-Behavioral Therapy, Behavioral Analysis, Acceptance and Commitment/Mindfulness Therapy, Brief Psychodynamic Therapy, and Complicated Grief Treatment. The format is combined lecture/seminar.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2136 Inequalities in Globalization (3 Credits)***Typically offered occasionally*

How are globalization processes affecting the lives of people in the world? The course examines the movement of people, commodities, and capital and the ways in which these processes are changing economies and cultures. The course will cover aspects of transnationalism and migration, production, distribution and consumption practices in global perspective, the formation of new identities and the construction of minorities, gender dynamics and the pursuit of human rights. We will adopt a multidisciplinary perspective to examine the relations between economy, society and culture. The focus will be on understanding the generation of inequalities (poverty, wealth, luxury, and marginalization) in globalization.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2139 Devel Community Level Hiv Prevention Intervent (3 Credits)***Typically offered occasionally*

This course will examine the personal, biological, psychological, social, cultural, organizational, and community dimensions of HIV disease in the United States and across the globe. Students will learn to analyze the differential impact that HIV disease has on various cultural and ethnic groups as well as individual, family and policy issues in order to understand the interrelatedness of personal, clinical, community and environmental concerns. A major aim of the course will be to develop a combination HIV prevention package for a specific target community. Students will be asked to integrate contextual, epidemiological, biomedical and behavioral approaches to addressing a "most at risk" (MARP) population.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2140 International Poverty Reduction (3 Credits)***Typically offered occasionally*

In this class we will first examine the explanations for the world's uneven development and the persistence of poverty. We will critically explore the policies and assumptions underlying such policies and examine several poverty reduction strategies that are currently being used including foreign aid, capabilities and empowerment, social marketing, and microfinance, among others. We will draw from multiple perspectives to facilitate successful and integrated applied efforts and meaningful research questions.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2142 Ethnographic Mapping of HIV Risk in the Caribbean (3 Credits)***Typically offered occasionally*

This course delivers a combination of field practice, academic study, technical instruction, and individual supervision. Students in the course are involved in two educational activities: (1) intensive daily language instruction and (2) a community field project designed to address health and social welfare issues in Sosúa, Dominican Republic. Students integrate academic materials with GIS mapping in the field, concluding with a cohesive contextual analysis of their work in Sosúa with a final presentation/report.

**Grading:** Grad Silver Pass/Fail**Repeatable for additional credit:** No

**MSWEL-GS 2146 Management and Organizational Practice for 21st Century Social Work (3 Credits)***Typically offered occasionally*

The demands and opportunities for social workers today require that they be knowledgeable about management practice and organizational issues whether in a solo practice, in a supervisory position, as a direct line service provider, or as a social entrepreneur. The interrelated aims of this course are to: 1) survey selected management and organization theories and approaches; 2) demonstrate how clinical knowledge and skills can be adapted for management and organizational practice; 3) demonstrate how social media can be effectively used to advance organizational goals; 4) demonstrate the ways that anthropological, sociological, and humanistic mind-sets and methods apply to understanding organizations; 5) introduce learners to key organizational factors such as organizational culture, mission, ethics, employee relations, financing, innovation, accountability, and fund raising. In addition to the opportunity to develop a social media project for an organization, the course offers the opportunity to engage in a hands-on class project similar to what consultants might do.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2150 Ethical Social Work: Contemporary Philosophical and Practice Issues (3 Credits)***Typically offered occasionally*

In this seminar we will explore the values and philosophical foundations of social work as a practice and as a way of being in the world. This will include a critical examination of the socio-political context of the profession and individual practice. Ethical social work is presented as a way to engage with individuals, families, organizations, and communities to promote social justice and mutual caring. We will also include contemporary ethical issues of the profession and practice regarding our obligations to interspecies and environmental relationships

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2151 Ethnography and Poverty's Culture Wars (3 Credits)***Typically offered occasionally*

This course will take an in-depth look at poverty studies in the United States since 1965. The concept of the "culture of poverty" will be of particular interest in the course. Students will analyze the production of poverty knowledge using the original texts that introduced Americans to the idea that poverty is culturally produced. They will then read policy-oriented texts and ethnographies that challenge the notion of culturally produced poverty with more complex renderings of poverty and structural inequality. Students will consider the ways in which ethnographies written in the last forty-five years are writing against and in dialogue with the culture of poverty concept. The course will be attentive to the ways that poverty is named and described, as well as the ways that ethnographies of urban America approach poverty as a problem, as a culture, and as a consequence of structural forces.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2152 Practice with Families: Comparative Approaches (Paris) (3 Credits)***Typically offered occasionally*

This intensive "advanced topics" course, to be given at the NYU Paris site in June 2012, will critically examine selected recent controversies over the boundary between normality and mental disorder in the areas of depression, bereavement, and sexuality, with attention to international perspectives. Readings will draw on both the empirical-research and conceptual literatures. Guest lecturers may include French theorists and clinicians. We will also consider evidence-based approaches to treatment of depression. Emphasis will be on issues that are part of the debate over how diagnosis should be revised in DSM-5. The format is combined lecture/seminar. Reading and other assignments will be provided before the first class so that students can read ahead, due to the intensive nature of the course. Assignments include a reading log and final paper due after the course is over. The course will be graded pass/fail.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2153 Advocacy and New Media (3 Credits)***Typically offered occasionally*

This course offers an opportunity to learn how to use digital video, internet social networking and interactive media for advocacy and the promotion of social justice. Working in collaborative teams students will learn how to identify, assess, design, produce, and implement a new media advocacy project.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2154 Women's Health & Community Well-Being: A Collaborative Ethnography in Del Carmen, Philippines (3 Credits)***Typically offered occasionally*

In this course, students will be an active part of an ongoing research study that includes implementing interactive workshops and leading focus and discussion groups on women's health and resilience, reproductive health, domestic violence, and community economic development, among other issues. Students will be trained to work with local residents, conduct qualitative interviews, collect data, lead discussion groups using a curriculum, and fully engage with the community. Students will acquire basic knowledge and skills for conducting community evaluations and community needs assessments using community-based participatory action and collaborative ethnographic techniques. The first two weeks of the course will be classroom-based and dedicated to learning a curriculum focused on qualitative data collection in multiple forms, facilitation, and community engagement. Then the class will travel to the Philippines, where they will be grouped into teams with locals, using a participant-observer strategy to gain intimate familiarity with people in their natural environment. The final sessions will include students and community members in an analysis and goal priority setting process. Other strategies involved will be writing field notes, conducting one-on-one interviews, and qualitative data analysis.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No

**MSWEL-GS 2155 Anti-racism for Social Workers: Understanding the Impact of Structural Racism (3 Credits)***Typically offered occasionally*

This advanced elective is designed to help students identify and understand the impact of structural racism. The course provides students with the necessary understanding and tools to address racism in practice, policies, programs, research and evaluation. Students will be introduced to cutting edge analysis and methods of addressing racism and will be helped to consider new alternatives to practice methods that hinder effective social change. The course will include attendance at an AntiRacist Alliance event. The course will be supplemented by visiting lecturers from the People's Institute for Survival and Beyond, a national, multiracial, anti-racist collective of clinicians, organizers and educators dedicated to undoing racism in the field of social work and beyond. Since its founding in 1980, The People's Institute has trained over 110,000 people in hundreds of communities throughout the United States and internationally. It is recognized as one of the most effective anti-racist training and organizing institutions in the nation.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2156 Micro Practice: Global Mental Health (3 Credits)***Typically offered occasionally*

This course will examine key issues in global mental health in low- and middle-income countries (LMIC) as well as the United States. It will explore current health system responses to mental health needs, using WHO data, regional summaries, and more detailed narratives of case studies from Argentina, other Latin America countries, sub-Saharan Africa and the United States. This course will look at the challenges to providing mental health care in diverse settings, including resource poor settings as well as evidence-based interventions to addressing the mental health needs and psychosocial well-being of communities. In addition to general mental health, the course will examine four specific topic areas related to health and mental health from a global perspective: HIV/AIDS, Substance Use, Trauma and Positive Youth Development.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2157 Macro Practice, Policy, & Social Movements (3 Credits)***Typically offered occasionally*

This course will use concepts from the disciplines of history, anthropology, political science, public health and social work to provide students with an overview of social movements both in Argentina and the United States. The course will emphasize the role of social workers in the movements and students will be able to develop an understanding of community organizing. Students will leave the course understanding how to engage in community change processes. The course will begin with a one day intensive introduction to Argentinean history and culture, Spanish vocabulary, in preparation for arrival in Buenos Aires. Once in Argentina, classes will focus on a major topic per day, with weekends devoted to class trips, meals, and/or optional group activities, which compliment what is learned in class. The class will conclude with group projects concentrating on community organizing campaigns.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2158 Current Issues in Social Work and Social Welfare Policy: Issues and Action (3 Credits)***Typically offered occasionally*

Since the beginning of the profession in the early 1900s, social workers have engaged in systematic efforts to promote federal legislation and policies that protect the vulnerable populations they serve and that advance access to social work services. The present time is no different. Following on the Presidential election and as a new Congress prepares to begin its work, this course will bring social work students to Washington DC to learn about how advocacy work is carried out on Capitol Hill and to learn from social policy experts based in DC about key legislative issues that social workers must engage with in the 113th Congress.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2159 Social Work Practice & Primary & Behavioral Health Care Integration (3 Credits)***Typically offered occasionally*

In this course students will examine the latest developments in integrative behavioral health including service delivery and direct practice models. The course is offered in conjunction with Advanced Social Policy in Integrative Behavioral Health, and students are encouraged to enroll in both courses.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2160 Clinical Social Work Practice with LGBT Clients (3 Credits)***Typically offered occasionally*

Clinical Social Work Practice with LGBT clients builds upon the content provided in the advance concentration year. It is focused on providing the students with specialized knowledge and skills essential to complexities of application of clinical social work interventions with this client population. The course will focus on clinical examples provided by the instructor from practice in GLBT organizations and by class members in GLBT settings. The goal of this course is to deepen and extend students' knowledge of assessment and intervention by drawing on evidence based knowledge and practice wisdom that addresses the dynamics of various interventions in work with lesbian, gay, bi-sexual, transgender or questioning. It is designed to offer students enhanced practice skills in engagement and relationship development; complexity and impact of the ongoing oppression of homophobia on the helping relationship; assessment of clients' environmental and internal stressors; selection and rationale of practice intervention, implementation of intervention and evaluation of practice.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No

**MSWEL-GS 2161 Mindfulness and Social Work Practice (3 Credits)***Typically offered occasionally*

This course examines historical and contemporary understanding of contemplative practices and potential effectiveness with social work students, clinicians, and their respective client populations. Students will explore, compare and contrast Eastern and Western worldviews to gain a better understanding of the impact of mindfulness practices. The outcomes of neurological and psychophysiological studies demonstrate the relationship of mind-body connection. These empirical findings show mindfulness based practices increase level of self-awareness, clinical attunement and level of self-care to cope with emotional exhaustion, vicarious trauma and burn out. This class includes an integration of western empirical knowledge and practice wisdom of the east (i.e., breathing exercises, meditation, body scan, and eastern meridian and Qi Gong exercises). Course only offered to 2nd year students.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2162 Social Work Practice with People of Color (3 Credits)***Typically offered occasionally*

This course approaches social work practice with people of color from an integrative perspective, examining clients from multi-systemic levels including policy, socio-economic contexts, community, and family contexts.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2166 Juvenile Justice Issues: Jurisdictions Implementing Systemic Reform (2 Credits)***Typically offered occasionally*

This two-credit intensive will introduce students to the history of the juvenile justice system, examine jurisdictions that have implemented measures meant to create systemic change, and help envision a new juvenile justice system. Specifically, the course will examine the following topics: history of juvenile system system; research on the impact of reform school institutionalization on young people's recidivism, mental health, suicide risk, educational attainment and future employability; and review the outcomes of some promising approaches to working with multiple contact delinquent youth in non-institutional settings. Jurisdictions including Massachusetts, Missouri, the District of Columbia, California, Texas will be examined as well as the recent reforms undertaken and/or underway in the New York City/State.

**Grading:** Grad Silver Pass/Fail**Repeatable for additional credit:** No**MSWEL-GS 2167 International Perspectives on Substance Use Problems and Treatment Models: An Italian Approach (3 Credits)***Typically offered occasionally*

Substance use, misuse, and/or dependence is a pervasive problem throughout the world, although the treatment approaches are culture-bound. This 3-credit course will expose students to substance use issues and treatment approaches from an international perspective. While living in separate cottages, students will interact and learn from recovering drug addicts who reside and run this therapeutic community built on a restorative justice model. Formal lectures by Prof. Lala Straussner and international guest speakers will focus on European models of harm reduction, the use of the restorative justice approach, and the special issues related to drug-using men, women and their children, and adolescents, as well as international aspects of drug-related criminal justice, HIV/AIDS, and related issues.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2168 Mexican Immigrants & NYC: Understanding Puebla as a Focal Community of Origin (6 Credits)***Typically offered occasionally*

This three credit-hour experiential and service-learning course will take place in Puebla, Mexico and will provide students the opportunity to examine the impact of migration on issues of social welfare and public health in Puebla, Mexico; a state of particular relevance to New York as more than 60% of Mexican immigrants in New York City are natives of Puebla. Poblanos in New York City face unique obstacles – the policies, opportunity structures and resources in New York greatly influence the behaviors and outcomes of Poblanos in New York. Health disparities, including HIV/AIDS, mental health and substance abuse are only some of the consequences of the structural inequalities and challenges related to migration. This course will deliver a combination of cultural exchange, Spanish language classes, visits to service providers, and substantive lectures on major factors affecting Poblano health, traditional health practices, and aspects of Mexico's general health care system. Students will conduct field trips and fieldwork associated with these topics. This program described is a collaborative effort between faculty from the Universidad Popular Autonoma del Estado de Puebla (UPAEP) and NYU's Silver School of Social Work.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2170 Child, Parent and State (3 Credits)***Typically offered occasionally*

This course will focus on the legal rights, responsibilities and disabilities of parents and children in the American legal system. Particular attention will be given to the interplay and often conflicting interests of children, their parents, and the State. We will examine the historical background and development of the juvenile court, recent decisions involving due process rights of juvenile delinquents, the power of the State to intervene involuntarily into the family to protect children believed to be abused or neglected, the problems and issues involved in children in foster care, the rights of students, the rights of adolescents and "mature minors" in clashes with their parents, the right to sex-related medical treatment and the question of informed consent to medical care.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2171 Remembering, Forgetting, Imagining: Clinical, Theoretical and Practical Implications (3 Credits)***Typically offered occasionally*

This course has a number of interrelated aims, including: 1) to provide a survey of theories of memory from the classical period to the present day; 2) to demonstrate the extent to which ideas of memory permeate the fields of literature, culture, and, increasingly, clinical practice; 3) to provide a comprehensive survey of contemporary literature and research on autobiographical and collective memory; 4) to review current developments in brain science on memory and forgetting; 5) to examine clinical practice implications of recent research on memory; and 6) to explore the moral and ethical dimensions of memory and forgetting. The course also provides an opportunity to engage in a hands-on class project using multimodal methods of inquiry and presentation.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No

**MSWEL-GS 2172 Negative C. V. Jurisprudencepolicy re: Criminal Records Seminar (2 Credits)***Typically offered occasionally*

Jurisprudential and policy issues surrounding the construction, recording, availability, dissemination, consequences, discrimination based on, and expungement of criminal records. Such questions as: 1) what criminal record data bases exist, how constructed, how linked; 2) the federalism of the U.S. "crim records system" 3) should juvenile records be sealed; 4) should adult records be expunged after some period of time; 5) private employers' access to job applicants' criminal records 6) Meagan's law constitutional & policy issues 7) what dangers, if any, inhere in the fingerprint and DNA data bases; 8) how private "information brokers" are/ should be regulated; 9) the extent to which criminal records should be exchanged across national borders; 10) what privacy interests, if any, are infringed by maintenance & dissemination of criminal records; 11) what special privacy concerns attach to pre-sentence reports, prison files and other non-rap-sheet records.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2173 Core Concepts in Child and Adolescent Trauma (3 Credits)***Typically offered occasionally*

Description: This course will prepare MSW students for trauma-informed evidence-based practice by enhancing students' empathic understanding of trauma from the child's perspective and how trauma influences the child's life. The course focus is on the impact of trauma on the child and family provides a foundation for assessment, crisis intervention, and intervention. The curriculum is based on twelve guiding core concepts developed about trauma and utilizes a problem-based learning approach, in which in-depth case studies about the impact of trauma are presented so that students experience "real" cases as they actually unfold in practice. The cases focus on children and adolescents, aged 18 months to 17 years, from a variety of ethnic and racial groups representing urban, suburban and rural environments and illustrate a number of different trauma types, including interpersonal trauma such as physical, emotional and sexual abuse, and witness to both stranger and domestic violence. The Problem-Based Learning approach used in this course involves students in active, collaborative, team-oriented self-directed learning.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2174 The transition to adulthood among historically marginalized groups: Research, practice, and policy (3 Credits)***Typically offered occasionally*

This course integrates up-to-date research, practice, and policy knowledge on individuals transitioning to adulthood from historically marginalized groups (e.g., LGBTQ+ youth, racial and ethnic minority youth, immigrant and refugee youth). The course will include class sessions on both research and evidence-based practice approaches to work effectively with youth in transition to improve their overall health and well being, while also discussing the policy landscape related to current issues facing these young people. Specific topics that will be addressed include a) understanding and critiquing theories of young adult development, b) strategies for engaging young adults in mental health and social services, c) social work practice approaches with specific populations of youth and young adults including those in out-of-home care, LGBTQ+ youth and young adults, and immigrant and refugee youth, and d) the impact of various social policies on young adult access to and use of services, and overall development.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2175 Homelessness in Perspective (3 Credits)***Typically offered occasionally*

This course introduces students to the history and current status of homelessness in the U.S. and abroad focusing on research, practice and policy implications. The course will address the following topics: 1) history and causes of the homeless 'epidemic'; 2) the homeless 'industry' as understood through the lens of organizational and institutional theories; 3) the rise of Housing First as paradigm shift and the systems changes that have ensued; 3) specific populations including homeless families, youths, and the chronic homeless; 4) best practices in outreach and engagement with homeless persons; 5) homeless policies and drivers of change (legal, advocacy, research); 6) research on homelessness and homeless services in the U.S. and other countries.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2176 The Trauma Informed Social Worker: Best practices in working with our clients (3 Credits)***Typically offered occasionally*

In the past few years there has been an amazing movement in the social work field: there is a new awareness of the very difficult life experiences that have affected those people we serve. This course will provide an overview of the adverse childhood events (ACE) and trauma, its prevalence, and its effects on behavioral health and physical health. Students will learn a range of best practices for working with clients from the early engagement phase to termination in treatment with clients who have a trauma history. Students will also experience the implementation of the best practices by using their internship or personal experiences in class activities.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2178 Urbanization and Social Development in China (3 Credits)***Typically offered occasionally*

This course, in collaboration with the School of Social Development at East China Normal University (ECNU), is an intensive summer course focused on social policy development in the context of Urbanization and Migration. This course provides students with the opportunity to learn about key issues concerning the nature and contributing factors to urbanization, migration, and poverty and inequality in the context of globalization. Social policies and social work practices in response to these issues will be explored and discussed. This 2-week course will take place in Shanghai, China. It is intended to be locally grounded in China, combining lectures, seminar discussion, and site visits to provide students with an intensive introduction to the ways in which urbanization, migration, and a host of consequential social issues are viewed and responded in China. This course will also provide the opportunity for regional comparison within China including a focus on rural-to-urban and west-to-east migration. The program is open to the master graduate students at the Silver School of Social Work and students from disciplines in sociology or social work across China. This course will thus also provide the opportunity for students from the US and from China to interact, exchange, and learn from each other.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No

**MSWEL-GS 2179 Global Mental Health Care Practice in Argentina (3 Credits)***Typically offered occasionally*

This course will examine key issues in global mental health. We will explore current health systems responses to mental health in Argentina (a middle income country) and discuss how that compares to the US (a high income country). Through lectures and site visits, the course will examine direct practice issues related to providing mental health and psychosocial support to vulnerable populations in diverse settings in Buenos Aires.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2180 Writing Seminar (3 Credits)***Typically offered occasionally*

The purpose of this course is to prepare students for effective professional writing in social work. Although the course is grounded in the context of the social worker's daily practice, it will be informed by the fields of Rhetoric and Composition, Professional Writing, and Second Language Writing. Students will apply selected social work concepts to prepare and revise writing samples such as case summaries, sample treatment plans, advocacy letters, policy proposals, and funding/grant applications. Research and writing skills emphasized include conducting electronic literature searches; outlining; rhetorical and genre awareness; sensitivity to Higher Order Concerns (e.g., thesis, argument development, organization, contextual appropriateness); and sensitivity to Lower Order Concerns (e.g., paragraph and sentence structure, using APA format, proofreading).

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2181 Writing Seminar II (3 Credits)***Typically offered occasionally*

The purpose of this course is to familiarize students with the types of writing that are required in social work practice. Students will practice different forms of writing including but not limited to intake forms, client progress notes, case summaries, policy briefs, op eds, and program proposals.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2182 Forensic Social Work: Practice with the criminal justice involved client (3 Credits)***Typically offered occasionally*

Since its inception, the social work profession has provided front line services to the criminal justice field, becoming instrumental in forensic policy and practice. During this class, students will learn the philosophies of forensic social work and discover the diversity of social work practice opportunities within the forensic field. Students will be introduced to social work with a mandated client population; including work with victims of crime and offenders. Characteristics of specialized offender populations will also be discussed, from perpetrators of sexual crime, to extreme violence, domestic violence, and beyond. An understanding of the intersection and overlap between mental health and criminal behavior will be developed and students will become familiar with the evidence based social work techniques currently used in the forensic social work field."

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2183 Human Rights and Social Justice in Social Work Research and Practice: (3 Credits)***Typically offered occasionally*

This course uses a cross-national and cross-cultural approach to examine human rights and social justice, the relationship between them, and how they are applied to social work research and practice. In order to do so, the course will use as its primary examples children, and sexual and gender minority youth and adults; students will be encouraged to apply their learning to other marginalized, disempowered, and oppressed populations. Germany is a particularly interesting country for learning about social justice based on human rights, as its catastrophic experience with National Socialism, the Holocaust, and the Second World War was the catalyst for the development of the Universal Declaration of Human Rights. For 45 years after the end of the War, Germany was divided into two countries, one primarily occupied and shaped politically, socially, and economically by the United States, and the other occupied and shaped by the Soviet Union. Since the fall of the Berlin Wall in 1989 and Germany's subsequent reunification, it has been a world leader in advocating for human rights both domestically and throughout the world. Because NYU Silver students will be taking this course together with social work students from RheinMain University of Applied Sciences, there will be many opportunities to examine cross-national differences and commonalities in understanding about rights and social justice, the ways in which rights are denied in the two countries, and the approaches taken by social work to address social injustice. The result will be a deeper understanding of human rights and social justice, and of the ways in which social workers can address these issues in an increasingly globalized world.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2184 Anthropological Perspectives in Global Health (3 Credits)***Typically offered occasionally*

As the profession of social work expands globally, its role in health and social welfare can be informed by the contributions of anthropology. Medical anthropology in particular highlights the importance of cultural, social and structural factors in health and illness. The field embraces micro-perspectives relevant to social work practice (patient explanatory models, structural competence, bio-cultural and intersectional identities in gender, race, sexuality). It also includes structural critiques relevant to global health and social policy (social suffering, bio-power, structural violence and capabilities theory). This course will introduce students to anthropological perspectives and their application to global problems such as human trafficking, addictions, HIV/AIDS, mass violence and mental disorders. Emphasis will be placed on the synergy between global social work and medical anthropology.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No

**MSWEL-GS 2185 Depressive and Grief Disorders: Conceptual Controversies and Clinical Perspectives (3 Credits)***Typically offered occasionally*

Description: Depression is the most diagnosed mental disorder in the United States and a leading cause of disability worldwide. Yet, during the recent revision of the American Psychiatric Association's diagnostic manual (DSM-5), vehement debates took place over proposed changes to the diagnostic criteria that determine when experiences of sadness and grief are classified as mental disorders. This course will critically analyze the DSM-5 debates over depressive and grief disorders, consider relevant research as well as philosophical and theoretical arguments about when grief and sadness are mental disorders, and critically review evidence-based approaches to treating these disorders using video demonstrations when possible. Readings range from empirical research to conceptual/philosophical analysis.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2186 NARRATIVE, SOCIAL JUSTICE, AND CHANGE (3 Credits)***Typically offered occasionally*

This course explores the connection between narrative, social justice, and social change, and draws from such fields as literary and cultural studies, medicine, public health, psychology, sociology, and anthropology. We will explore how narrative—in its many forms—can express and promote oppression, violence, and disease, but also can be a means for healing, community building, collectivity, and activism. The course takes a critical perspective on the stories we tell ourselves, and the collective and master narratives that shape our social relations. The course will be framed around the development of narrative literacy – an understanding of narrative theory drawn from literature and the social sciences, understanding ourselves and others as narratively constituted, and an understanding of how narratives work in the world. In order to do so, the course draws upon various forms of narrative including literature, popular culture, theater, film, TV, social media, and mass media.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2187 Macro Level Theories in the Social Sciences (3 Credits)***Typically offered occasionally*

This course provides an overview of social science theories that are relevant to social work. Students will develop a critical understanding of the history and application of social science concepts. Wherever possible, we have selected theories that have an historical foundation and a forward trajectory toward contemporary issues. We also include articles or research with an alternative or critical view of the theories in question.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2188 Conversational Mandarin (2 Credits)***Typically offered occasionally*

This course will help native English speakers improve their Mandarin skills, in the context of the global MSW program in Shanghai.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2189 Anthropological Perspectives in Global Health (3 Credits)***Typically offered occasionally*

As the profession of social work expands globally, its role in health and social welfare can be informed by the contributions of anthropology. Medical anthropology in particular highlights the importance of cultural, social and structural factors in health and illness. The field embraces micro-perspectives relevant to social work practice (patient explanatory models, structural competence, bio-cultural and intersectional identities in gender, race, sexuality). It also includes structural critiques relevant to global health and social policy (social suffering, bio-power, structural violence and capabilities theory). This course will introduce students to anthropological perspectives and their application to global problems such as human trafficking, HIV/AIDS, mass violence and mental disorders. Emphasis will be placed on the synergy between global social work and medical anthropology.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2190 Clinical Social Work with Military Service Members and Veterans (3 Credits)***Typically offered occasionally*

This elective course is intended to provide social work graduate students with specialized knowledge to deliver informed, culturally competent, and ethical clinical social work services to current U.S. military service members and Veterans. This course will help student intervene to meet the mental health and psychosocial needs of this growing population. The course utilizes research data, case examples, and Veteran first-hand accounts such as documentary film and fiction, to illustrate the range of experiences and psychosocial reactions to war-zone deployment, homecoming, and military sexual trauma. Emphasis is given primarily to Iraq and Afghanistan Veterans, but the course also attends to diverse populations and Veterans from other war eras and peacetime. Focus is paid to the role military culture can play as protective and risk factors, and to the clinical implications of service members' concerns about stigma. The course highlights ethics and ethical dilemmas of providing social work within the military sector.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2191 Mass Incarceration: Implications for Social Work (3 Credits)***Typically offered occasionally*

There are more than 2 million people incarcerated today in the United States, and there are over 7 million people under the surveillance mechanisms of parole, probation, and other forms of community supervision. Women are the fastest growing prison population, and over 2 million children have a parent in prison. Some have aptly titled the constellation of problems associated with this period "mass incarceration," a period which has also greatly exacerbated the challenges facing social workers in their pursuit of social justice. This course provides a critical historical analysis of the criminal justice system in the United States. It examines the implications of varying criminal justice and social policies such as the Rockefeller Drug Laws, 3-Strike Legislation, and Mandatory Minimums and their legacy vis a vis the current state of incarceration, as well as the phenomenon of "recidivism." The course is intended to facilitate a more informed/holistic practice for MSW students working directly or indirectly within the varying intersections of criminal justice and social work practice and, by extension, advocacy and policy.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No

**MSWEL-GS 2192 Narrative, Social Justice and Social Change (3 Credits)***Typically offered occasionally*

This seminar explores the connection between narrative, social justice, and social change, and draws from such fields as literary and cultural studies, medicine, public health, psychology, sociology, and anthropology. The course is primarily designed for social work students but also may be of interest to those in other fields, law, journalism, writing, theater, and film studies. A narrative approach is applicable to all forms of social work practice: therapeutic, developmental, preventive, organizational, community, advocacy, research, and policy. What distinguishes the approach is that it has social justice as its organizing principle. We will explore how narrative—in its many forms—can express and promote oppression, violence, and disease but also be a means to healing, community building, collectivity, and activism. The course takes a critical perspective on the stories we tell ourselves, and the collective and master narratives that shape our social relations. The course will be framed around the development of narrative literacy – an understanding of narrative theory drawn from literature and the social sciences, understanding of ourselves and others as narratively constituted, and an understanding of how narratives work in the world. The course, which uses selected digital pedagogical methods, including Scalar <http://scalar.usc.edu> is designed for collaborative learning, and draws upon various forms of narrative including literature, popular culture, theater, film, TV, social media, and mass media.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2193 Drug Policy and the City (3 Credits)***Typically offered occasionally*

Drug use can cause harm to users, and cause them to harm others. That doesn't make all drug use harmful or wrong; it just makes it risky. Allowing the free use and sale of drugs will multiply those harms. On the other hand, restrictions on sale and use never work perfectly, tend to increase the riskiness of drug use both to users and to others, and can generate illicit markets, which can create violence and disorder. Good drug policy tries to steer between these two sets of risks, with the goal of minimizing the total social damage from drug abuse and drug control efforts. This course has a double purpose: - To introduce some ideas about the drugs, drug control, and drug-control side-effects. - To illustrate techniques of policy analyses. The goal is to enable students to formulate responsible opinions on drug policy issues, to defend them with good analysis, and to understand the logic behind opinions different from yours. The emphasis will be on reading and thinking rather than research and writing.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2194 Clinical Practice with Trauma Survivors (3 Credits)***Typically offered occasionally*

A high percentage of clients in outpatient treatment and a higher percentage of patients of inpatient hospitals report histories of trauma including neglect, abuse and/or attachment failure. In addition to being diagnosed with PTSD, this client population often presents as affectively dysregulated, chronically depressed, exhibiting symptoms of bipolar disorder, anxiety disorder or personality disorders. This course will help the students understand the symptoms, issues and neurological basis of traumatization and how to work with patients in an effective way. This course will introduce students to a wide variety of modalities to trauma treatment and interventions including safely exploring trauma-related somatic activation, mindfulness for symptom reduction, emotional processing, body-oriented therapy, cognitive behavior therapy (including cognitive restructuring), and art and creative therapies.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2195 Exercising Leadership in the Non-Profit and Public Sectors (3 Credits)**

A key premise of the course is that leadership requires helping communities and organizations make the adaptations needed to thrive and survive in rapidly changing contexts. Effective management must be deployed to preserve successful institutional behaviors whereas leadership is needed to ensure that practices no longer serving organizational or community interests are discarded and that new innovations are pursued to generate greater impact. However, such adaptive work can be extremely challenging when longstanding practices are hardwired into the DNA of organizations through years and even decades of practice. In this context, the work of leadership is about accompanying people through the realities and losses of necessary change while opening them up to the promise of the future. The course will introduce students to a set of tools and strategies for effectively bringing about that change within organizations and communities, without getting sidelined in the process.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No**MSWEL-GS 2196 Where Do You Come From? (Im-) Migration Discourses in Germany and the USA. (3 Credits)**

This course is a global learning experience taught at NYU that is part of Half of the students participating in the course will be NYU students, and the other half will be German social work students enrolled at HSRM an ongoing collaboration between NYU Silver and RheinMain University of Applied Science (HSRM), Wiesbaden, Germany. Half of the students participating in the course will be NYU Silver students, and the other half will be German social work students enrolled at HSRM. The course uses a cross-national and cross-cultural approach to examine the patterns of migration and immigration to the USA and Germany, the experiences of migrants, and how migration is differentially understood in these two countries. Fraser's Status Model of Recognition will be introduced as a theoretical framework for understanding migration discourses. Students will also learn how to use the research method of Photovoice to learn how views and narratives about the self and the other are constructed in social contexts. Students will reflect on the way meaning and constructions of difference, which are implicit in migration discourse, are connected to one's local biographical experiences and standpoint. The course will include several excursions to important New York City sites having to do with immigration.

**Grading:** Grad Silver Graded**Repeatable for additional credit:** No

**MSWEL-GS 2197 Advocacy and Social Justice in Social Work Practice (3 Credits)**

Advocacy and the pursuit of social justice have long been core values of the social work profession. The NASW's Code of Ethics stipulates that social workers challenge social injustice as one of its six Ethical Principles. Advocacy, as a set of actions taken to achieve social justice for individuals, communities or systems, is a professional mandate and the cornerstone upon which social work is built. This course seeks to prepare students to engage in advocacy practice oriented towards social justice. Students will receive an overview of the historical roots of advocacy in the social work profession and the role of structural racism, oppression, and marginalization in contemporary social injustices. Students will also learn how to apply Hofer's (2016) Unified Model of Advocacy Practice in their work with clients or communities.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 2198 Comparative Mental Health Policy and Practice in the United Kingdom and the US (3 Credits)**

This elective course will be taught at the University of Strathclyde in Glasgow, Scotland. The course takes a cross-cultural and cross-national approach to mental health, mental health services, and policy in the United Kingdom and the United States. Informed by the social determinants of health framework, the course will focus on how mental health relates to issues of social and economic justice. The first part of the course will compare and contrast the approach to social welfare in these two countries with a particular focus on the differing health care systems. Differences and similarities with regard to government role, funding and role of social workers will be explored. The second part of the course will present understandings of mental health within the global context, the social determinants of mental health, and mental health reform in the UK and the US. We will focus on the promotion of integrated health care and mental health recovery in the two countries and their influence on practice and policy. The course will conclude with a discussion of social inclusion, comparing its meaning in US and the UK, and presenting innovative developments in the field aimed at including people with lived experience of mental illnesses in all aspects of society.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 2199 Theories and Issues of Aging (3 Credits)**

This course examines a broad range of theories and contemporary issues in aging that relate to social work practice with older adults and their families. Domains of inquiry include biological, psychological, and sociological perspectives of aging and older adults. There is a critical examination of the social constructions of old age, social work values and ethics, and social work practice within an aging society at the individual, community, and institutional level. Specific consideration is given to heterogeneity of the older adult and aging population in the areas of age, gender, race and ethnicity, class, sexual orientation, religious, physical or mental disability, and national origin. Additionally, the diversity of experiences, activities, roles, and responsibilities of older adults are evaluated as they related to aging theories and issues such as productive aging, intergenerational relationships, and cultural norms. Social and economic justice, evidence-based practice, and capacity building are highlighted throughout the course. Students will participate in community/applied learning projects as an integral part of this course. Professional communication skills will be practiced. Throughout the course, we will discuss how to apply the tenants of evidence-based practice and prevention to the theories and issues that impact aging.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 2200 Clinical Practice with Chronic and Life-Limiting Illness (3 Credits)**

This course focuses on preparation for working with those who have chronic and life-limiting illnesses as well as their families and support systems. Students will examine the nature of what it means to live with or care for someone with a chronic or life-limiting illness; learn about major theories of chronic illness experience and caregiving; and acquire understanding about the impact of multiple illness and disease trajectories on clinical practice. They will gain confidence and skills in assessment and intervention across a variety of conditions and settings, and in critically analyzing their own experience with illness and suffering as it relates to what feeds and informs their work.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 2202 Evidence-based Practice Models for Trauma (3 Credits)**

This course will focus on clients who have been affected by a wide scope of traumatic events, ranging from interpersonal violence and sexual abuse to single event individual, family, group and community traumas such as school and workplace violence to national and international disasters. Students will learn evidenced-based practice models of trauma as well as issues related to secondary and shared trauma experienced by service providers.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 2203 Advanced Diversity, Racism, Oppression, and Privilege for Social Work Practice (3 Credits)**

The Advanced Diversity, Racism, Oppression, and Privilege for Social Work Practice elective aims to shift the clinical focus away from dominant mental health paradigms and toward a multicultural praxis base that is inclusive and reflective of the diversity of valued health and well-being outcomes across cultures, peoples and communities. The curriculum is informed by a multi-disciplinary foundation of critical theories, an understanding of the significance of intersectionality and identity in context, integration of systems and strengths perspectives, and active anti-oppressive practice. Opportunities to integrate learning into practice will include case presentations, practice reflections, and peer collaboration.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 2204 Critical Digital Practices for Social Justice Advocacy (3 Credits)**

This course provides an overview and critical perspectives on digital practices for social justice advocacy, and hands-on experience with a variety of modes, methods, and applications. The course itself is designed with principles of digital pedagogies so that students have the opportunity to learn by using many of the tools now available that have potential for advocacy practice. The emphasis is social justice advocacy, community support and development, group building, communication, and client support. The course is informed by a critical perspective on digital platforms, which means that both the affordances and constraints of the platforms will be under observation. In addition two learning to recognize fake news and conspiracy mongering sites, student teams will be assigned to investigate the auspices and business models of the platforms we use and consult.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 2205 Human Services and Social Work in China (3 Credits)**

Social work profession and practice have presented a significant progress in China in the last decade. China has adopted social work as a means of sustaining economic development and actualizing a "harmonious society." Given that social work practice skills (clinical and community) have been used in a different context, the focus of the course is to learn the different practice models, approaches and perspectives in China, and investigate how local practice can help promote human well-being and social development. It is expected that students would be able to develop a critical and analytical understanding of cross-cultural practice.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 2206 The Role of Emotions in Clinical Social Work (3 Credits)**

This course aims to provide a basic understanding of the complexity of research on emotions since Darwin's seminal work, and to provide practical and clinical knowledge and experience in two prevalent and different therapy techniques that focus on emotions. Theory, study and experience of emotions will first be examined generally and then through the clinical and theoretical underpinnings of Accelerated Experiential Dynamic Therapy (AEDP) and Dialectical Behavioral Therapy (DBT). The course will provide an overview of these therapy techniques specifically concentrating on the way they view and utilize emotions in the work with clients. In class we will ask and try to answer: What are emotions? Are there basic and universal emotions? Why and how are emotions wired into our mind and body? What is the connection between emotions and attachment? What happens when we don't allow our emotions to be felt? What are pathologies that are connected with emotion suppression and regulation/dysregulation, and how do DBT and AEDP suggest to treat them? This class will also have an experiential component allowing students to practice skills teaching and watching videos of real sessions utilizing these techniques.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 2207 The Human-Animal Bond (3 Credits)**

This three-credit elective examines the Human-Animal Bond (HAB) and its importance to client and community health. HAB is a dynamic and mutually beneficial relationship between people and animals that is influenced by behaviors that are essential to the health and well-being of both. This includes, but is not limited to, emotional, psychological, and physical interactions of people, animals and the environment. Veterinary Social Work is an area of social work practice that attends to the human needs that arise in the intersection of veterinary medicine and social work. Current issues in Veterinary Social Work will be discussed, including HAB in disaster relief, homelessness, and domestic violence, animal-assisted therapy, and grief counseling for pet Loss. Attention will be given to the importance of advocacy and promoting change in existing policies to incorporate the human-animal bond.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 2208 Introduction to Mental Health in Athletes and Clinical Social Work (3 Credits)**

This course introduces students to theories, assessments and interventions specific to working with athletes on and off the playing field. The course examines the roles and functions of sport clinical social workers with athletes in areas of mental health and well-being, advocacy, and interdisciplinary consultation through the lens of intersectionality and anti-oppression perspectives. Diversity and social justice issues such as racism, sexism, ableism, classism, exploitation, and equity are explored. Students will examine current research and best practices including biopsychosocial factors, risks, and barriers that athletes face for overall mental health and well-being. Case examples, group discussion, interactive role play, and lecture methods are utilized to enhance student learning.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 2209 Simulation-based Learning: Practicing Advanced Clinical and Advocacy (3 Credits)**

Five Sessions is a play written and directed by Professor Jaime Estades. Five Sessions is a depiction of a recently graduated white, cisgender woman clinical social worker providing therapy to a Latinx, cisgender male, working class father presenting with depression and suicidal ideations. The resulting interactions between the two characters highlight the unaddressed tensions and resulting repercussions between culture, race and gender and other positionality factors relevant in the therapeutic alliance. This simulated play version of a therapeutic alliance offers a multitude of opportunities to examine best practices on micro, mezzo and macro interventions because the interactions in the play are fraught with imperfections, tensions and missteps ripe for discussion and re envisioning in a social work classroom setting. Students watching the excerpts will have ample examples to critique and replay critical interventions that include a PROPS analysis, missing within the interactions in the play Five Sessions.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 2210 Core Components and Skills for Trauma-Informed Practice (3 Credits)**

This course facilitates students' acquisition of the knowledge, skills, and attitudes necessary to effectively use 12 common trauma-informed practice elements in interventions for and the treatment of traumatized children and their families. The course conceptualizes a trajectory of intervention that considers the impact of trauma, intervention objectives, and the practice elements needed to facilitate the intervention objectives. This course is taught using an inquiry-based learning (IBL) pedagogy to enhance students' engagement and learning using full-length cases to exemplify a range of different clients a clinician might encounter. The course uses discussion and active participation in examining the cases.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 2211 The Role of School Social Workers in the Micro, Meso, and Macro Relationships of the Department of Educ (3 Credits)**

This elective will focus on the micro, meso, and macro issues in the New York City School System. School social workers bear witness and address multi disparities that students in our system experience, including, but not limited to, housing and food insecurity, rise in suicidal ideation, violence with the NYPD, interactions with ICE and family member deportations, poverty, and daily trauma. Schools are closely linked and required to partner with many other systems in our city, including hospitals, mental health organizations, NYPD, and ACS. This course will first address the challenges we see within the school system and the partnership with school social workers and then address the systemic changes we can make in the required outside partnerships, including, but not limited to, mental health resources, NYPD, and ACS. Finally, this class will closely address the segregation and racism in the NYC School System and strategies to create systemic change.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 2212 Ethics and Social Justice (3 Credits)**

This course is an introductory survey of the principles and practice of social ethics. Students will first learn the foundations of ethical theory (normative ethics and some metaethics). The bulk of the class will be spent in applying these theoretical frameworks to a range of social problems - affirmative action, abortion, substance use, and migration, among others - using cases and current news articles. Students will disseminate these applications through an ethics blog, and learn to participate in the marketplace of ideas in a reasoned way.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 2213 Social Work Practice & Interventions in Urban School Settings (3 Credits)**

This practice elective is focused on the development of expertise in social work practice and interventions within school settings. The focus is on developing knowledge, values, and skills applicable to social work practice within schools (elementary, junior high, and high schools) addressing the needs of diverse populations. The course provides an overview of a wide range of social work roles, evidenced-based program models, modalities, and interventive strategies for practice in school settings including, public and charter schools, school-based health clinics, agency-school collaborations, and/or after-school programs. Attention will be given to anti-oppressive and culturally responsive clinical practice with students, parents, families, and groups; advocacy, consultation, and collaboration with interdisciplinary staff within schools and neighboring communities; crisis intervention and prevention, program development, and organizational/systems work within schools.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 2214 Summer Experiential Seminar (3 Credits)**

This course examines a broad range of theories and contemporary issues, including COVID-19, that relate to social work practice across various populations. Domains of inquiry include biological, psychological, economic, and sociological perspectives to identity, health, and development. There is a critical examination of the social constructions of age, social work values and ethics, and social work practice at the individual, community, and institutional levels. Specific consideration is given to heterogeneity of the populations in the areas of age, gender, race and ethnicity, class, sexual orientation, religious, physical or mental disability, and national origin. Additionally, the diversity of experiences, activities, roles, and responsibilities of clients as they relate to cultural and institutional norms. Social and economic justice, evidence-based practice, and capacity building are highlighted throughout the seminar. Students will participate in community/applied learning projects as an integral part of this course. Professional communication skills will be practiced. Throughout the course, we will discuss how to apply the tenets of evidence-based practice to the theories and issues that develop. Discussion of relevant theories and evidence of COVID-19 will be a theme throughout the semester. This course aims to have students critically integrate academic concepts into their paid summer internship experience. Prerequisites: 1) It is expected that students would have already identified a paid internship, preferably in their substantive area of interest, before registering for the course. 2) Students must receive approval by their academic advisor prior to registering for the course.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 2300 Seminar on Preparation for Social Work in the United States (0 Credits)**

The purpose of this Seminar is to prepare international students for professional development, Field education in the MSW Program, and social work practice in the United States. The Seminar will meet five times and will be taught online. The sessions will focus on an integrative approach to social work practice in the United States, Field education and agency practice, communication skills, and professional development skills. Students will participate in reflective and interactive exercises and discussions on readings that will help them develop an understanding of agency social work practice in the United States. Seminar instructors will guide their discussions through a diversity, equity, inclusion lens and also will promote discussions around anti-racist practice.

**Grading:** Non-Graded

**Repeatable for additional credit:** No

**MSWEL-GS 3001 Grief, Loss and Bereavement (1 Credit)**

*Typically offered occasionally*

This course will focus on expanding our understanding of the many aspects of bereavement using a developmental, cultural and a situational perspective. Highlighted in this course will be the issues and concerns of the disenfranchised, the adolescent and those bereaved due to suicide, homicide or intentional human acts. Through lecture, discussion and role-play we will explore various counseling techniques with a focus on bereavement groups. Finally, we will explore how the social worker's loss history can affect the nature of the work with a bereaved individual or a group.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3002 Current Approaches to Trauma (1 Credit)***Typically offered occasionally*

This course will be an introduction to the assessment and diagnosis of psychological trauma, with an emphasis on its physiology. It will provide an overview of the history of psychology's understanding of traumatic experience and how that has shifted over time. Dissociative disorders, as traumatic sequelae, will be discussed. New diagnostic categories of Complex PTSD and DESSOS, Disorders of Extreme Stress Not Otherwise Specified, will be explained. Then, an in-depth exploration will highlight cutting edge research into current treatment modalities, including body-oriented psychotherapies and EMDR. Vivid clinical case material will be presented and films will be used to illustrate phase-oriented treatment of trauma.

**Grading:** Grad Silver Pass/Fail**Repeatable for additional credit:** No**MSWEL-GS 3005 Psychopharmacology (1 Credit)***Typically offered occasionally*

This mini-course will review diagnostic categories and symptoms of the major mental illnesses. Appropriate medications for particular conditions will be described along with potential side effects. Clinical issues around social work with clients on medication, such as taking or not taking meds, will be discussed. Issues that arise in collaborative work with interdisciplinary teams will be described.

**Grading:** Grad Silver Pass/Fail**Repeatable for additional credit:** No**MSWEL-GS 3007 Disaster, Trauma and Loss (1 Credit)***Typically offered occasionally*

This course will introduce a cohesive perspective from which to consider immediate, emerging, and long-term community engagement and clinical practice in the aftermath of disaster. Considering collective and individual impact, as well as resourcefulness, as disasters evolve, discussion will include dimensions of distress, trauma, loss, and traumatic loss, within a cultural frame. Providing a global and historical context, the class will consider a variety of disasters, and the social realities of inequity and violation often accompanying them. Cumulative police shootings/choking within a context of race, no indictments, collective grief, and community protest; the Sydney, Australia hostage situation accompanied by #illridewithyou hashtag in solidarity; the recent Philippine typhoon, so soon after last year's typhoon devastation as many still mourn and recover; the epidemic of Ebola in West Africa, as here in the city diaspora families mourn for loved ones and experience others' animosity and suspicion, and as health workers plead for respect, and the city community grapples with fear; unaccompanied children from Central America fleeing violence and violation; the context of humanitarian catastrophe across the Middle East; the continuing impact of the Newtown, Connecticut, school shooting, and the context of other school and community shootings; the unprecedented devastation of Superstorm Sandy, with long-extended regional and local impact, still; the East Harlem building explosion and collapse; and the Boston marathon bombing, are only some. In addition, the Japan earthquake/tsunami/nuclear power plant disaster, amid uncertainty and worry; the Haiti earthquake, with attendant health and infrastructure problems; the Gulf Coast region hurricanes of Katrina and Rita, amidst issues of race and class; the Indian Ocean region tsunami in the context of civil war; and the aftermath of September 11, 2001, framed by a context of bias, also offer context and will be viewed within a long-term perspective. The course will identify the diversity of social work roles and practice with individuals, groups, and communities having distinctly unique situations, and will look at the significant roles of community, support networks, and cultural foundations. The inevitable impact on clinicians of providing community engagement and clinical practice across the long-term continuum of unfolding disaster, along with their own resourcefulness and resilience, will be addressed, highlighting the importance of reflective self-care for student and social worker, on-going support, continued learning, and active social engagement.

**Grading:** Grad Silver Pass/Fail**Repeatable for additional credit:** No**MSWEL-GS 3011 Clinical Practice with African Americans (1 Credit)***Typically offered occasionally*

Upon the completion of this mini course, student will have acquired a beginning understanding of what makes social work practice with African American individuals and families unique. The course will examine the past and current status of African American individuals and families in the United States and will alert students to the specific knowledge, skills, values, and strategies required to work successfully with this population.

**Grading:** Grad Silver Pass/Fail**Repeatable for additional credit:** No

**MSWEL-GS 3012 Interpersonal Psychotherapy: Principles and Practice (1 Credit)***Typically offered occasionally*

The Interpersonal matrix is at the heart of clinical work and human development. This mini course will review Interpersonal theory perspectives from Sullivan, Bowlby and Interpersonal Psychotherapy (IPT) research to provide a basic framework for understanding human relations. In addition to the theoretical perspective, a practical integrative skills methodology incorporating Interpersonal/Cognitive Behavioral principals will be reviewed and applied to case examples. This course offers a practical skills approach for students to utilize in clinical settings.

**Grading:** Grad Silver Pass/Fail**Repeatable for additional credit:** No**MSWEL-GS 3016 Social Work with Adolescents in Schools (1 Credit)***Typically offered occasionally*

This course examines the challenges and opportunities of social work practice in educational settings. It addresses roles and functions of social workers within a complex ecological system of home/school/community. Development of assessment, engagement, and intervention skills in crisis intervention, consultation, group work, advocacy, and mediation are emphasized. The course addresses current urban issues that influence school practice such as violence, homelessness, AIDS, substance abuse, physical and sexual abuse, diversity, and cross-cultural communication.

**Grading:** Grad Silver Pass/Fail**Repeatable for additional credit:** No**MSWEL-GS 3017 Cognitive and Behavioral Intervention (1 Credit)***Typically offered occasionally*

The purpose of this course is to provide the student with an introduction to the principles and theory of cognitive behavioral therapy. A primary goal of this course is to demonstrate specific therapeutic techniques and interventions in order to provide the student with a firm grounding in the clinical application of the theory.

**Grading:** Grad Silver Pass/Fail**Repeatable for additional credit:** No**MSWEL-GS 3021 Introduction to Contemporary Child Practice (1 Credit)***Typically offered occasionally*

This two day class will review child treatment from a contemporary perspective. The course will review treatment techniques in child treatment (play therapy), child and family treatment, interpretation of play and metaphors, the use of narration in child treatment, and issues of self and other regulation in the child therapy setting. We will review innovations from infant research and concepts such as mentalization, self and mutual regulation, children and narrative functioning. The course will also examine clinical issues in addressing trauma, physical and sexual abuse, loss, school problems, and other related issues that emerge in work with children. Clinical materials will also be used to illustrate course content.

**Grading:** Grad Silver Pass/Fail**Repeatable for additional credit:** No**MSWEL-GS 3024 Eating Disorders: Diagnosis and Clinical Treatment Issues (1 Credit)**

This intensive class will explore eating disorders as a metaphor for relationship. The etiology, assessment, types of eating disorders, signs and symptoms, co-morbidity, and differential treatment and levels of care will all be addressed. Lecture, video and case vignettes will be used to illustrate course content.

**Grading:** Grad Silver Pass/Fail**Repeatable for additional credit:** No**MSWEL-GS 3025 Severe Mental Illness: Contemporary Neuroscience & Psychosocial Perspectives (1 Credit)**

This 10-hour course will address current neuroscience and psychopharmacological research in schizophrenia and bipolar disorder as well as the significant contributions of psychosocial research and intervention. The latter will include, but not be limited to, the following: group and individual psychotherapy, need-adapted treatment, psycho education, multiple family groups, cognitive-behavioral approaches, case management, therapeutic communities, etc.

**Grading:** Grad Silver Pass/Fail**Repeatable for additional credit:** No**MSWEL-GS 3026 Dialectical Behavior Therapy (1 Credit)**

Individuals diagnosed with borderline personality disorder are considered among the most difficult to treat in psychotherapy. They frequently engage in high risk behaviors such as suicidality and self injury which result in risk management challenges. In addition, these patients' unstable affects and relationships jeopardize social and occupational functioning and therapeutic alliances. This course introduces students to theoretical perspectives and treatment interventions of DBT, an empirically validated psychotherapy designed by Marsha Linehan, PhD, for the treatment of individuals diagnosed with borderline personality disorder. The course utilizes case material to illustrate key issues in assessment, diagnosis, engagement and treatment planning.

**Grading:** Grad Silver Pass/Fail**Repeatable for additional credit:** No**MSWEL-GS 3027 Substance Abuse Among Women Through the Life Cycle (1 Credit)**

Recent studies show that women's use and abuse of alcohol and other drugs not only differs from that of men, but varies over their life cycle. In order to provide appropriate treatment, it is critical that the nature of substances used and abused by women be examined in light of women's lifespan - from adolescence to late life.

**Grading:** Grad Silver Pass/Fail**Repeatable for additional credit:** No**MSWEL-GS 3028 Practice with Spanish Language/Latino Families (1 Credit)**

This one credit intensive explores both clinical and social policy considerations with respect to understanding and treating Spanish Language/Heritage families in the United States. Distinct modules address Basic Values of Respect, Dignity, and "Personalism;" Family and Kinship Organization and Dynamics; Belief Systems of Health and Illness across Ethnicities; Signs and Symptoms of Substance Abuse (includes English and Spanish "street" terms); U.S. and U.N. Immigration Classifications, and Communication Styles: Conducting the Biopsychosocial Interview across Cultures and How to Work with an Interpreter. To facilitate comprehension, students use a downloadable workbook that aids in note-taking. The method of instruction includes lecture, discussion, and role play. This course is taught in Spanish; a level of "fair fluency" is sufficient.

**Grading:** Grad Silver Pass/Fail**Repeatable for additional credit:** No

**MSWEL-GS 3031 Positive Psychology (1 Credit)**

Positive psychology is the study of what constitutes and contributes to personal happiness, life satisfaction, and sense of well being; the identification and enhancement of individual strengths and positive emotions such as optimism, creativity, courage, and gratitude; and the methods of applying this knowledge in order to strengthen what is positive in individuals and in institutions. The course will describe the history, philosophy, major tenets, and empirical base of positive psychology, and the interventions and measures that have been designed to foster and monitor positive development.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3033 Group Work with Children and Adolescents (1 Credit)**

This course will provide an overview of the various dynamics that group leaders should consider when leading short- or long-term groups with children, adolescents, or parents of children and adolescents. These elements include: the agency and community setting, the needs of the group members, the purpose of the group, the diverse composition of the group members, and the content and structure of the group. The objective of this course, which will include lecture, discussion, role play, and case vignettes, will be to explore in detail the dynamics of group work with children and adolescents and parents of children and adolescents to assure that students are fully prepared in the future to lead groups with these three populations. Special attention will be given to preparing students to lead groups that address specific issues and challenges such as abused children, acting-out adolescents, as well as parents of hospitalized children and adolescents.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3034 Mental Health & Juvenile Justice Involved Youth (1 Credit)**

This course focuses on Emotionally Disturbed Youth in the Justice system. It reviews the size/scope of emotionally disturbed youth in the system. It explores the reasons for this including system failures, it examines pathways of youth into criminal justice. It reviews the need for assessment and treatment and explores community based service options for these youth.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3040 Acceptance and Commitment Therapy (1 Credit)**

Meditation, Yoga, Metaphors, Gestalt exercises—Can these facilitate behavior change? What do they have in common with behavior therapy? Students attending Latest Developments in Acceptance and Commitment Therapy (ACT) will learn ACT techniques, theory, and the mechanisms of change that may be (in part) responsible for the benefits of other practices, like yoga and meditation for our clients. Differences, similarities, and challenges to integration will be touched on as ACT and other “Third Wave” therapies are put in the context of traditional behavior therapies and cognitive therapies.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3041 Contemporary Gestalt Therapy Approach to Social Work Practice (1 Credit)**

This course will focus on learning to use the basic concepts of Gestalt Therapy, an evidence-based humanistic psychotherapy that intensely focuses on the client's experience of living in the world. Gestalt therapy theory, with its holistic, relational, and existential approach to working with clients at the interface of the person and environment, provides a multidimensional frame for clinical social work practice. Much of this course will be experiential, with a great deal of time spent on enhancing students' ability to track their clients' thoughts, feelings, and behaviors in order to deepen their clinical work. Case examples will also be discussed utilizing Gestalt therapy's strength-based approach to working with all populations

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3042 Therapy Interventions for Traumatized Children: How to Incorporate Play Therapy (1 Credit)**

This mini-elective will provide an overview of the impact of various forms of trauma on children, including Posttraumatic Stress Disorder and Attachment problems, and how these experiences and difficulties inform treatment interventions and course. Students will learn the importance of entering the child's world at their own level through play, and how play techniques and interventions open the door to processing trauma and healing in a way that traditional talk therapies cannot. The use of symbolism and metaphor will be emphasized in the exploration of various interventions. Care of the therapist in this work will also be discussed.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3046 Preventing Burnout & Understanding Vicarious and Secondary Trauma (1 Credit)**

Students entering the social work profession are well aware of the potential for burnout, especially when faced with traumatized clients such as those in foster care, criminal justice, child welfare, sexual abuse, domestic violence, and military communities. Although there is extensive literature illuminating the problem of burnout and vicarious trauma, there remains a dearth of practical solutions or available programs to help workers and agencies cope. The usual approach to reducing burnout is defined as “self-care”: setting up a troubling assumption that secondary or vicarious trauma is the worker's fault. This course will present evidence that this paradigm is counterproductive. We will explore more recent evidence-based and promising practice approaches to the resolution of burnout and vicarious trauma that include clear definitions of the problem and do not rely solely on the practitioner “taking care” of him or herself.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 3047 Introduction to Mindfulness and Emotional Regulation in Social Work (1 Credit)**

This class is an experiential and theoretical step and study into mindfulness practice, emotional regulation and the subcortical, implicit inner world of relational neuroscience. Students will develop an understanding of the neuropsychological mindfulness framework and ways to incorporate this into social work practice. This includes an expanded understanding of right-brain to right-brain engagement—and developing a relational perspective. Class discussion, lecture, video and case presentation, along with practice of mindfulness meditation will be incorporated to demonstrate these principles help students develop an appreciation of a mindful approach.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3048 Neurobehavioral Disorders in Children (1 Credit)**

This one credit elective will introduce students to fundamental aspects of neurobehavioral disorders, with a focus on children and adolescents. These disorders typically have a genetic origin, are usually recognized in childhood, are modified by environment and nurture and continue throughout the life cycle. The manifestations are cognitive, neurological, behavioral and emotional.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3049 Social Work Practice with Military Families (1 Credit)**

This one credit elective describes the manner in which global conflict and unrest have led to the deployment of large numbers of military personnel, its effect on those deployed and their families. The course further describes the military family and how the family exists within the social context of the military. The course will review both normative and unique stressors that the military family navigates and how social workers can intervene effectively to aid with those stressors. Specific issues of family violence, coping with pre-deployments, separation, post deployment, reintegration periods, adjustments through the family life cycle, and advocating with the military for change are covered. The course illustrates how the ethnic identity and diversity concerns of the military family are addressed within the military. The course illustrates the macro and policy concerns that impact on the military family. The course emphasizes a strengths perspective that can be used to empower the military family. Finally, a close look at issues related to service delivery, stigma associated with accessing behavioral health services, field/practice competencies and implications for the social work profession.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3050 Overview of Learning Disabilities & Deficits in Attention (1 Credit)**

This course provides a basic understanding of learning disabilities as well as deficits in attention. Students will gain knowledge regarding behavioral and academic symptoms and differential diagnoses regarding behavior and underlying learning issues. In addition to identification of the problems, the course will address interventions including referral, advocacy, and family support. A case seminar format will be used to discuss actual cases.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3051 Sexual Health in Social Work Practice (1 Credit)**

This one-credit intensive will function as a primer for social workers on how to begin and sustain discussions about sexual health and sexuality with their clients, treating sex as a quality of life issue, whose understanding is essential for diverse practice. The course will provide a basic understanding of clinical sexuality issues and will provide students with the skills to do a basic sexual health assessment. There will be a special focus on often pathologized and underserved groups, including: transgender/gender non-conforming/non-binary identities; queer and non-straight identities; consensual non-monogamy/polyamory relationship structures; and kink/BDSM-oriented individuals.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3052 Entitlements Seminar (1 Credit)**

Students will learn about entitlements in the areas of child welfare, income level, and age. The class will examine eligibility and how to advocate for clients to have access to entitlements.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3053 Neurobiology in Social Work Practice (1 Credit)**

Scientific research in the field of neurobiology over the past decade has led to profound discoveries regarding brain systems, neurobiology, and their implications for social work practice. This course will provide foundations in neurobiological study through a social work perspective, and discuss its effectiveness as a rapidly expanding theoretical model in the field of social work. Students will acquire a fundamental understanding of interacting brain systems as they influence clients' behavioral, social, and emotional worlds, and will be taught the skills to apply this theory in a variety of treatment settings. Special attention will be paid to trauma, mood disorders, and anxiety disorders, though the practical application of neurobiological processes is relevant to students seeking to engage in any empathic, culturally competent area of practice.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3054 Art and Activity-Based Therapies with Groups and Families (1 Credit)**

This course will cover the application of creative arts therapy theory and practice within a social work framework. The class will focus primarily on the field of art therapy, but will also include some exposure, through guest lecturers, to other non-verbal creative arts modalities such as: music therapy, drama therapy, and movement/dance therapy. The class is designed to include a substantial amount of hands-on art-making and role-play to provide students with practical tools for incorporating the arts into practice with a variety of populations. The course will utilize case material from students' field work when appropriate to illustrate how to design effective art therapy interventions. The following populations and topics will be covered as they relate to art and therapy interventions: client engagement; treatment planning; developmental stages of drawing, work with children, adolescents, adults and families; trauma; relational abuse; cultural sensitivity, and the unique counter-transference issues of non-verbal therapies.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3055 Intergroup Dialogue Facilitator Training (1 Credit)**

Facilitate a 1-credit course for NYU undergraduate students related to diversity and social justice through the Intergroup Dialogue (IGD) Program. IGD is a nationally recognized credited course that brings together small groups of students from diverse backgrounds to share their experiences and gain new knowledge related to diversity and social justice. This two-day mini course will teach the pedagogy and theoretical framework for the IGD model.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3056 Intergroup Dialogue Practicum (1 Credit)**

Co-Facilitate a 1-credit course for NYU undergraduate students related to diversity and social justice through the Intergroup Dialogue (IGD) Program. IGD is a nationally recognized credited course that brings together small groups of students from diverse backgrounds to share their experiences and gain new knowledge related to diversity and social justice. This weekly practicum will provide the support and curricular resources necessary to co-facilitate your IGD group.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3058 Bullying at School, Work and in Cyberspace: What Can We Do? (1 Credit)**

Bullying has been around a long time but is finally coming out of the shadows as a social problem. Social workers are being called upon to solve this problem. This course will provide a knowledge base and a set of skills and materials to deal with its consequences and to prevent bullying from occurring.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3059 Emotional Regulation in Family Practice (1 Credit)**

This one credit elective course will introduce students to the importance of emotional regulation in achieving family security and resilience. Students will learn how to work with couples as well as families with children and learn ways to intervene in dysregulated or unproductive reactions. Students will also learn ways to recognize cognitive mechanisms related to emotional dysregulation, and ways to help families achieve stability.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3060 Collaborative Care: Using Peer Support in Mental Health Recovery (1 Credit)**

This course focuses on the understanding and application of peer support in recovery and in mutual aid. Peer support services are designed and provided primarily by peers who have gained practical experience in both the process of recovery and how to sustain it. In this course, social work students will learn how to promote and integrate peer support services based on the premise that a crucial factor in helping people move along the recovery continuum is social support. Peer support services may be offered at different stages of recovery: services that precede formal treatment which can strengthen motivation for change; services that accompany treatment provide community connection during treatment, and services that follow treatment, support and sustain recovery.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3061 Healthy Living (1 Credit)**

This course focuses on the understanding and application of the theoretical principles and evidence base of public and community health nursing practice and culturally competent care. In this course, the unique health needs of women, civilian and veterans, in underserved communities and how associated factors with living in poverty-impacted underserved communities impact health. The focus of community health is on protecting and enhancing the health of communities and diverse populations, including those at risk and those challenged by health disparities, developmental needs, mental health concerns, and clients living with poverty. Emphasis is placed on health promotion and education, health care policy and ethics/social justice.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3062 Anxiety Disorders, Panic Disorder, OCD & PTSD: Diagnosis, Biology & Treatment (1 Credit)**

This course will provide an overview of the most significant anxiety disorders. Special focus will be given to Panic Disorder, Obsessive Compulsive Disorder (OCD) and Post Traumatic Stress Disorder (PTSD). The first part of the class will be a review of the diagnosis and sequelae of each disorder as well as the cognitive and biological drivers related to each diagnostics category. The psycho-physiology portion of the course will emphasize the use of this information to enhance client psycho-education, normalization and clinical actions. Treatment approach will be primarily from a cognitive behavioral point of view. Students will be exposed to standard cognitive techniques, relaxation training, biofeedback and exposure techniques used in treatment. A basic review of psychopharmacology will be provided. We will review components of Panic Disorder treatment including exposure, psycho-education, specific cognitive reframing, hyperventilation syndrome and somatic interventions. Students will be exposed to special nuances related to treating OCD. PTSD treatment will include an introduction to Eye Movement Desensitization and Reprocessing (EMDR). Discussion will include real world use of these interventions. Student will learn the specific application of techniques including EMDR, biofeedback and some hands on learning of relaxation techniques.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3063 Cultural, Social, Clinical, and Organizational Perspectives on Trauma: Argentina (3 Credits)**

Content related to evidence-informed trauma assessment and intervention targeting individuals, families, groups, organizations, and communities will be provided via a combination of classroom instruction and experiential field-based learning in Buenos Aires, Argentina. Students will learn about the unique Argentine experience with state-sponsored terrorism and the cultural, psychological, and familial impact, consequences, and responses to country-wide traumatic events. The course will equip students with evidence-based, trauma-informed content and skills meant to prepare social work practitioners to provide direct services to populations affected by traumatizing events, including war, terrorism, natural/man-made disasters, poverty, interpersonal and community violence, and the sudden or violent death of a loved one. Students will be able to apply trauma-informed practice learning to their current field settings, as well as in future social work practice in domestic and global settings.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 3064 Evidence-based Practice Models for Trauma (3 Credits)**

This course will focus on clients who have been affected by a wide scope of traumatic events, ranging from interpersonal violence and sexual abuse to single event individual, family, group and community traumas such as school and workplace violence to national and international disasters. Students will learn evidenced-based practice models of trauma as well as issues related to secondary and shared trauma experienced by service providers.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 3065 Oral Health: A Window to Health (1 Credit)**

This course focuses on the understanding and application of theoretical principles and evidence base of oral health education and competent dental care. In this course, the unique oral health needs of women, civilian and veterans, in underserved communities will be addressed in addition to focusing on how associated factors living in poverty-impacted under-served communities impacts oral health. Furthermore, dental procedures, medications, or treatments that reduce saliva flow, disrupt the normal balance of bacteria in the mouth or breach the mouth's normal protective barriers, as well as the intimate connection between oral health and overall health will be discussed. Finally, stigma, fear and access to dental care as well as practical information regarding oral health will be presented.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 3066 Clinical Practice with Couples (1 Credit)**

This one-credit elective will provide students with an introductory understanding of diverse theoretical and cultural perspectives on couples' relationships, core clinical skill sets pertinent to couples therapy, and special treatment issues.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3069 Policy Analysis & Social Practice with Focus on Inequality, Poverty and Public Policy (3 Credits)**

Abstract: Through lecture and discussion this course will address issues relating to poverty, inequality, and opportunity with special, but not exclusive, emphasis on these phenomena in American society. The course will examine alternative definitions of income poverty and inequality, trends in poverty and inequality, the causes of poverty and inequality, the role of wealth, the perpetuation of inequality across generations, and public policies designed to reduce poverty and inequality and promote opportunity.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 3070 Emotionally Focused Therapy for Couples (1 Credit)**

This one credit intensive elective will offer an introduction to Emotionally Focused Therapy for Couples (EFT), an evidence-based approach to couple treatment. This model emphasizes the importance of attachment, and the relationship distress that results from threats to safety, security and closeness by focusing on the emotions each one in the couple is experiencing. Through lecture, slides, video tapes and experiential exercises, students will become familiar with the nine steps of EFT as well as the specific skills and interventions used in this model.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3071 Social Work in the Emergency Room (1 Credit)**

This course provides students with an overview of assessment and referral in the Psychiatric Emergency Room. Students will become acquainted with the role of the social worker and how the social worker interfaces and interacts with other professional staff. Students will also learn the basics of the biopsychosocial assessment models that are used and how psychiatric evaluations are conducted.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3072 Policy Practice with Gender Issues in an International Context (3 Credits)**

This course will address the complex and emerging global issues in gender perspectives within the overarching framework of international development policy and human rights. The focus will be on understanding historical and current efforts to promote social justice for women and girls in many areas of the world where social and cultural roles are rapidly changing and poverty, economic disparity, migration and gender-based violence are increasing. With comparative references to developing and developed regions of the world, we will explore the social, political, economic and environmental factors that impact women's status including their mental health and well-being. Course topics include emerging gender issues such as understanding the international human rights framework, reproductive rights, physical and mental health, media and representations of women, men in partnership, and the impact of complex emergencies including conflicts, climate change and natural disasters. We will explore current efforts to define a comprehensive gender approach from the health, development and social sectors, and the need to develop effective global campaigns and advocacy strategies to ensure that women's interests and rights are strongly represented in the future global Post-2015 Development Agenda.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 3073 Grant Writing for Non-Profit Organizations (1 Credit)**

This course will provide basic knowledge and skills for grant writing for non-profit organizations, and will assist students who are interested in working in leadership roles in non-profit organizations. The course will also help students apply for grants for projects as direct practitioners.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3075 Social Work & Legislative Advocacy: Developing Skills and Knowledge (3 Credits)**

The profession of social work, historically and currently, seeks to promote social justice through the equitable provision of benefits and services to assist all individuals, families, and communities to develop and function to their fullest potential. Advocacy for federal social welfare policies has historically been an important professional activity, remaining so in the present as part of "policy practice." In addition, all professions and occupations must work to advance their own interests in order to fulfill their social aims and ensure economic survival. Since social workers' services are often funded through federal and other health and social welfare programs, federal-level advocacy is needed for these purposes as well. This course will introduce students to some key social welfare policy issues with significance to social work and the people we serve, and help students develop skills for legislative advocacy.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 3076 Policy Practice : An International Perspective (3 Credits)**

This course will introduce the concept of 'policy practice' to students and will enable them to better understand how social workers can integrate interventions into the policy process as part of their professional activities. It will offer the students insights into various aspects of policy practice by social workers drawing upon existing knowledge on policy practice in the United States and in other countries throughout the world.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 3079 Dynamic Systems Change: Clinical Social Work Practice & Criminal Justice Reform (1 Credit)**

This experiential mini-course will prepare social work students for work in criminal justice settings by exploring case studies, applied ethics, relational theories, anti-oppressive praxis, and systems change perspectives. Students will explore some of the most salient dynamics of clinical practice in the criminal justice system, learn a diagnostic framework for client and systems change, and develop skills for meaningful social work in this unique setting.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3080 Working with Transgender Youth (1 Credit)**

This One-Credit Intensive will focus on best practices for working with transgender populations in agency settings. Approached from a developmental perspective, focus will be given to transgender youth populations (childhood to adolescence through early adulthood) and the effects on identity formation. Class discussions will cover basic language and vocabulary and concepts of heteronormativity and homophobia and cisnormativity and transphobia. Special attention will be paid to the intersectionality of race and class, policy and practice, and the interaction between family rejection and trans youth homelessness through a trauma lens. We will examine the pathologizing effects of our clinical community and the debate surrounding the DSM-5 and how diagnosis affects access to care. Gender affirming best practices for working with transgender clients from a de-stigmatized, clinical viewpoint will be presented. Classes will be interactive and involve a combination of lectures, videos, small group discussions and activities, and guest speakers.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3081 Assessment & Treatment of Children of Substance Abusing Parents: An International Course in Tel Aviv (3 Credits)**

Throughout the world, millions of children grow up with parents who are dependent on or abuse alcohol and other licit as well as illicit substances. Such children are found in every socioeconomic, ethnic, religious, and racial group, and in every setting ranging from preschools to community agencies to universities to mental health facilities. Numerous research studies show that these children are at greater risk for various problems, which vary depending on a number of factors, including the age of the child. Because these children exhibit not only problematic behaviors but also strengths or resilience, careful individual assessment is warranted. This course will examine the nature of substance use, abuse and addiction and its impact on the family, particularly young and adolescent children within an international perspective. Assessment, treatment, policy and research issues in the U.S. and in Israel will be explored. A visit to a local agency and presentations from guest lecturers dealing with this population in Israel will be included.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 3082 Social and Affective Neuroscience for Social Workers (1 Credit)**

This mini-course will focus on the relevant and interesting aspects of contemporary neuroscience research for social workers, particularly social and affective neuroscience, epigenetics and the transgenerational transmission of trauma and resilience, developmental traumatology and psychobiology, and psychoneuroimmunology (brain-immune interface), stress circuitry in the brain, etc. We will study the effects of childhood trauma and maltreatment (physical, sexual and emotional abuse; neglect; social isolation; peer verbal abuse and bullying; witnessing domestic violence, etc.) on the central nervous system and person and its implications for social relationships. We will study the neuroscience of primary subcortical emotional systems (e.g., fear, rage, lust, play, care, seeking, separation distress, etc.), attachment, neuroplasticity, memory systems, dreams, the relationship between brain and mind, anxiety, a possible complex neuroscience of the self, empathy/emodied simulation and mirror neuron systems, the effects of psychotherapy on the Mind/Brain and models of therapeutic action. Brief mention will be made of neuropsychopharmacology and psychopharmacology, somatic psychiatric treatments (e.g., rTMS, ECT, vagal nerve and deep brain stimulation, etc.), and neuroimaging techniques (sMRI, fMRI, DTI, MEG, PET, SPECT, high density EEG, etc.). At the start of the course we will review relevant neuroanatomy and genetic/epigenetic processes. Time permitting we will look at the neuroscience findings in a diversity of DSM disorders, including major depressive disorder, bipolar disorder, borderline personality disorder, schizophrenia, anxiety disorders, addictions, etc.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3084 Racial and Social Class Micro-Aggressions: Making/Invisible Visible/Clinical Practice (1 Credit)**

Micro-aggressions are everyday occurrences, which reflect a person's internalized stereotypes and prejudices. These verbal and/or nonverbal interactions are often unconscious and unintentional, and are difficult to recognize because they are subtle and appear innocuous. Good well-meaning people frequently commit micro-aggressions. Social workers often bear witness to clients' experience of micro-aggressions that leave them feeling inferior, dismissed or devalued. But, what happens when practitioners are the ones committing the micro-aggressions? This course will focus on the self-of-the-practitioner and how their personal experiences and/or lack thereof may unconsciously inform the professional treatment of clients. While there are several types of micro-aggressions, this course will focus on micro-aggressions committed as a result of race and class. Through the use of videos, questionnaires/scales and experiential exercises, students will be provided with a safe venue in which they are encouraged to examine their own beliefs (in terms of race and class) and how they may manifest as micro-aggressions in the therapeutic relationships and/or treatment. The class will also examine the consequences of microaggressions on clients and how to engage in conversations with clients around these issues.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3085 Social Work and Leadership (1 Credit)**

Description: As the field of human services has grown and become more complex, social service agencies are increasingly turning to professionals from fields other than social work for senior leadership. While understandable, this often deprives human service agencies of senior leaders who have worked in the vineyards of the human services and thus are more familiar with the challenges and opportunities that face both the field and practitioners at all levels of their agency. This course will provide a context for social workers to consider their own leadership potential: what will be required so they can strengthen their organizations to more effectively serve and respond to change? Students will be invited to consider their own aspirations and potential for eldership in the field and in human service agencies.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 3089 Integrative Behavioral Health Concepts (1 Credit)**

Description: This elective course provides an overview of the essential concepts and specific social work skills that are integral to the practice of Integrated Behavioral Health. The course prepares social work interns to become effective "behavioral health specialists." The course focuses on preparation for key social work competencies needed for social work practice in Integrated Behavioral Health including Functional Assessment, Motivational Interviewing, Cognitive Behavioral Therapy in Primary Care, Cultural Competence, Relaxation Training/Mindfulness, Psychoeducation, Psychotropic Medications, Alcohol and Drug screening, Case Management and interdisciplinary practice in primary care and school settings.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3090 Social Work Treatment with Survivors of Trauma (1 Credit)**

This mini course will examine the assessment, diagnosis and treatment of trauma with an emphasis on physical abuse and child sexual abuse. We will identify trauma symptomatology and review the psychological and physiological impact of trauma along a continuum with acute stress disorder, post-traumatic stress disorder and dissociative disorders. Students will learn about current research on trauma as well as those theoretical frameworks, which inform treatment. Trauma treatment, specifically EMDR, somatic therapies and other interventions, will be reviewed. The use of lecture, case material, class discussion, video and group exercises will be incorporated to illustrate course material.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3091 Introduction to Object Relations (1 Credit)**

This course introduces students to the concept of British and American Object Relations Theorists. The course will introduce the seminal concepts of the Object Relations School. We will examine the works of Melanie Klein, WRD Fairbairn, DWW Winnicott and Wilfrid Bion from the British School. We will also examine the more salient concepts of Edith Jacobson and Otto Kernberg. We will contrast the Object Relations Model with Self Psychology. The course will also utilize critical thinking by utilizing contemporary attachment research to verify, underscore or critique the concepts of the theorists we have read. A lecture format will be utilized to apply the basic concepts of each theorist to case examples provided by the instructor and by students.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3092 Drama therapy and Social Work Practice (1 Credit)**

This course will demonstrate the use of drama as a therapeutic tool in social work practice. Through lectures, case presentations, and class interaction, students will learn the essentials of drama theory and when and how to utilize this intervention with a variety of populations. Students will be expected to analyze case studies, engage in role plays, and demonstrate the acquisition of practice skills i.e. conflict resolution and communication skills through the use of various drama therapy techniques.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3093 Preparation for Social Work Education and Practice in the US (1 Credit)**

This course is open to students who have completed their first year MSW Program in Shanghai. Students will enroll in the course before they commence their second year courses at the Washington Square campus.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3094 Interprofessional Practice: Multidisciplinary Seminar (1 Credit)**

The course examines the challenges and opportunities for collaborative, interdisciplinary practice in behavioral health settings for social workers, educators, and healthcare professionals. The course will bring together social workers, educators, and health care professionals to provide an integrated understanding of health, behavioral, and mental health perspectives. Health concerns will be considered from a broad perspective including attention to home and community environment, family, culture and language, socioeconomic status, mental health concerns, and behavioral patterns. The focus on interprofessional team-based care leads to increased understanding of interprofessional roles, as well as relationship development and conflict resolution across professions. Attention will be given to issues of hierarchy, power, professional culture and roles among diverse healthcare, education, and social work professionals.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3095 The Clinical Impact of Doing Time (1 Credit)**

The concept of "cultural competence" is applied to the experience of correctional incarceration in general and to the experience of the incarcerated seriously mental ill in particular. Characteristic patterns of "jailhouse" thinking and behavior are examined from an adaptational perspective. The variety of effects of incarceration on persons suffering from mental illness and their typical adaptational responses are discussed. Particular emphasis is placed on the residual attitudes, beliefs and behaviors of those released from jails and prisons to the community and the difficulty of distinguishing them from the signs and symptoms of mental illness. A targeted cognitive behavioral treatment approach is presented.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3096 Understanding Immigration in the 21st Century (1 Credit)**

Dubbed the age of migration, the flow of migrants and refugees will be one of the single most important practice issues of the next two decades. Social workers will have to possess high dexterity in working with an array of cultures and with populations with varying migratory experiences. This course will provide practitioners with a solid understanding of the root causes at the macro level that affect the collective fortunes of human communities and have caused waves of migration and refuge seeking. Participants will become familiar with models for understanding cultures and will recognize paradigms of how cultures interact - whether they are the "host" culture or the immigrant culture. Models of acculturation, accommodation or integration and the role for practitioners in facilitating cross cultural relationships in changing communities and in working directly with immigrant families and individuals will be discussed.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3097 An Introduction to Palliative Care Social Work (1 Credit)**

All social workers will inevitably work with clients and families facing acute, serious or life-limiting illnesses. The needs of these clients and families across the life span are well-served by social workers trained in generalist palliative care. This course will provide an introduction to palliative care, its core principles and models of service delivery. It will focus on the role of social work on the inter-professional team, especially as a voice for social justice, advocating for culturally congruent patient-centered care and respect for patient and family self-determination when faced with ethical challenges. Basic precepts of adequate pain management, advance care planning and bio-psychosocial spiritual approaches across the illness trajectory will also be discussed.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3098 Spiritually Integrated Practice (1 Credit)**

The purpose of this one-credit course will be to provide students with an introduction to key concepts and techniques of spiritually integrated practice. This course will introduce a definition of spirituality, centered on meaning making, hope and connection. It will present arguments for spiritually integrated practice and criticism of its use. Applied to social work and healthcare, gerontology, death, dying and bereavement, it will consider what spiritual issues look like, how spiritual assessment tools identify them and what spiritually integrated practice techniques may be appropriate.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3099 Digital Basics for Social Work (1 Credit)**

Internet-based technologies and social networking tools have created a sea change in the practice of social advocacy, community organizing, and social work practice. This one-credit elective course is designed to provide students with a basic understanding of the processes and techniques of digital practices applicable to all forms of social work practice. The course requires some basic familiarity with the Internet and computers, but no programming is required. The course is designed as a social media classroom. As such, students play an active role in building course resources.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3100 Forensic Social Work: Practice with the criminal justice involved client (1 Credit)**

Since its inception, the social work profession has provided front line services to the criminal justice field, becoming instrumental in forensic policy and practice. During this class, students will learn the philosophies of forensic social work and discover the diversity of social work practice opportunities within the forensic field. Students will be introduced to social work with a mandated client population; including work with victims of crime and offenders. Characteristics of specialized offender populations will also be discussed, from perpetrators of sexual crime, to extreme violence, domestic violence, and beyond. An understanding of the intersection and overlap between mental health and criminal behavior will be developed and students will become familiar with the evidence based social work techniques currently used in the forensic social work field.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3101 Sex Trafficking in the United States and Around the World (1 Credit)**

This course will offer an in depth look at sex trafficking around the world, in the United States, and in New York City. The course will focus on the root causes of exploitation, the role of survivor leadership, effective prevention, successful advocacy, and legal and non-legal remedies. This course is designed to help social work students gain a better understanding of contemporary human trafficking, modern day slavery, and related aspects of sexual exploitation, with a focus on sex trafficking and remedies within the United States. Students will learn about the scope of the issue, important terminology in this field, and various types of human trafficking. Through survivor testimony, students will also learn about the physical and psychological trauma experienced by victims of human trafficking. The role of government, the media, and culture in defining and addressing sex trafficking will also be examined.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3102 Dynamic Concurrent Parent-Child Work (1 Credit)**

This course focuses on how to include parents in clinical work with a child or young adolescent in order to accomplish constructive change. Concurrent Parent-Child Work is different from family therapy since it involves working separately with the child and parents, and the focus of the work is on the child or young adolescent. Students will learn techniques for forming and maintaining multiple therapeutic alliances. They will also learn to assess resistances to working with parents and to develop the empathic and interpersonal skills necessary for dealing with challenges such as guilt, shame, anxiety, and feelings of failure. This course also aims to strengthen students' confidence for work with parents at each stage of a child's treatment. Students will learn about parenthood as a developmental phase, and that at each stage of a child's development there are corresponding parental tasks for progressive development to take place with both. Detailed clinical material will be used to illustrate clinical techniques and the concepts behind them.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3103 Introduction to Social Work With U.S. Military Service Members & Veterans (1 Credit)**

This one-credit elective course is intended for social work graduate students with little or no experience with U.S. military service members, veterans, and military culture. It provides an introductory, culturally competent overview of military social work (social work in the military and veteran sectors). The course reviews essential components of the U.S. military structure, organization, current demographics, and culture. Included is a discussion of social work's history with this population and a range of contemporary military and veteran resources. Social work graduate students are introduced to pertinent military social work topics such as deployment to the warzone, combat PTSD, military sexual trauma (MST), traumatic brain injury (TBI), family and transition issues, suicide prevention, and barriers to care and the challenges of engagement. Attention is paid to the identification of social workers' biases about military/veterans as an essential component of ethical military social work practice. The course relies upon academic literature, video, case presentations, and class discussion.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3104 Social Work Practice with Asian Pacific Islander/ American Populations (1 Credit)**

The purpose of this course is to provide a learning environment for students to investigate the needs of API communities in the US, and to explore ways to provide evidence-based culturally appropriate social work services to API populations. The course will be grounded in biopsychosocial theory, family systems theory, and critical race theory. API communities in the US consist of over 56 ethnic groups who speak 100 different languages. It will be impossible to address each group, and therefore the class will focus on issues that are common to first- and later-generation APIs across different nationalities. The issues include 1) acculturation and intergenerational conflicts; 2) immigration and racial trauma; and 3) low mental health service utilization. Students will be encouraged to deepen their understanding of specific topics and specific groups through their final assignment. This course will also introduce students to social work practitioners, administrators, and community leaders who provide social services in the API communities in the greater New York area.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3105 Social Work Practice and the Human Animal Bond (1 Credit)**

This one-credit intensive (OCI) course examines the Human-Animal Bond and its importance to client and community health. The human-animal bond is a dynamic and mutually beneficial relationship between people and animals that is influenced by behaviors that are essential to the health and well-being of both. This includes, but is not limited to, emotional, psychological, and physical interactions of people, animals and the environment.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3106 Autistic Spectrum Disorder (1 Credit)**

This one credit elective will introduce students to Autistic Spectrum Disorder (ASD). These disorders are highly heritable, manifested since infancy, and continue throughout the life cycle. The main clinical signs are abnormalities of social relatedness and communications, and stereotypic behaviors. Additional symptoms including language abnormalities, cognitive deficits, neurological, and behavioral abnormalities are common. Students will learn how the brain develops social skills and communication; the role of genetic mutations as a cause of ASD; the core and associated symptoms of ASD; pharmacological treatments including emerging translational therapies; and the roles of the social worker in the treatment of ASD individuals and their families.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3107 Accelerated Experiential Dynamic Psychotherapy (AEDP) (1 Credit)**

This one-credit elective will introduce students to Accelerated Experiential Dynamic psychotherapy (AEDP). AEDP is a model of psychotherapy that focuses on healing-oriented techniques and aims to achieve a transformation in client behavior by exploring the in-depth processing of difficult emotional and relational experiences, actively helped by an engaged therapist. This innovative model has roots in and resonances with many disciplines including interpersonal neurobiology, attachment theory, emotion theory and affective neuroscience, body-focused approaches, and transformational studies. Evidence demonstrates AEDP to be effective with Depressive Disorders, trauma, and creating secure attachment. This course will enable students to have an understanding of the theoretical foundations of AEDP and to gain competence in its strategies of intervention. Classes will consist of lecture and discussion, viewing videotaped sessions of clinical work, and practice of interventions in small groups.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3108 Political Social Work for Advocacy and Social Change (1 Credit)**

Section 6.04 of the NASW Code of Ethics states that social workers should engage in social and political action that seeks to ensure all people have access to the resources, employment, services, and opportunities they require to meet their basic human needs. It also states that social workers should be aware of the impact of the political arena on practice and should advocate for social justice. This one-credit elective serves as introduction to political social work and offers an overview on the role of social workers in the political sphere. Taught by one of the very few social workers currently serving in the New York State Legislature, the course will cover multiple aspects of the political process including running for office, crafting legislation, and utilizing public policy for social change.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3109 Coping Skills for Stress and Anxiety (1 Credit)**

In this one-credit intensive course, students will fill their therapeutic toolbox with concrete coping skills for helping clients manage symptoms of stress and anxiety. Biological, psychological and social/environmental techniques are drawn from some of the most effective evidenced-based treatments including CBT, DBT, EMDR, mindfulness, positive psychology and motivational interviewing, all demonstrated and practiced in class. In addition, an overview of the latest neurobiological findings about stress and anxiety will lay a foundation for understanding why the techniques work and how to prevent stress and anxiety accumulating in the future. Applications to clinician self-care and burn-out prevention will be explored.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3110 Understanding Structural Racism: Its History and Current Impact, Part I (1 Credit)**

This is the first half of a two-part sequence of one-credit electives that focuses on the impact of institutional racism in the United States, and social and economic injustices on people of color in health and human services, as well as how structural racism can be undone. Using principles taught in the People's Institute for Survival and Beyond workshop, the course examines the history of racism in the United States and current manifestations in health and human services delivery systems with an emphasis on the mental health system and implications for direct social work practice. A generation after the Civil Rights Movement and the election of an African American President, racism continues to be the nation's most intractable social problem, and the gap between Whites, Blacks, and Hispanics has increased. A systems perspective reveals persistent disproportional outcomes on all measures of quality of life in the United States. From wealth accumulation to health care, incarceration rates to employment and unemployment, immigration policy to the opposition of ethnic studies, dramatic ethnic and racial disparities continue to vex the nation. Social workers interface with clients of color in virtually all practice settings, and they have the highest visibility among clinical disciplines in the mental health system. Therefore, an understanding of the dynamics of race and racism is an essential requirement if we are to "do no harm" and engage clients in effective therapeutic alliances. The course introduces students to the many dimensions of race and racism that influence service outcomes, and implications for direct practice in agency-based settings with clients of color. Note that students must take both courses in this two-course sequence.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 3111 Understanding Structural Racism: Its History and Current Impact, Part II (1 Credit)**

This is the second half of a two-part sequence of one-credit electives that focuses on the impact of institutional racism in the United States, and social and economic injustices on people of color in health and human services, as well as how structural racism can be undone. Using principles taught in the People's Institute for Survival and Beyond workshop, the course examines the history of racism in the United States and current manifestations in health and human services delivery systems with an emphasis on the mental health system and implications for direct social work practice. Note that students must take both courses in this two-course sequence.

**Grading:** Grad Silver Graded

**Repeatable for additional credit:** No

**MSWEL-GS 3112 Introduction to Oncology Clinical Social Work (1 Credit)**

This course introduces students to knowledge and skills necessary to address the psychosocial/spiritual needs across various practice settings of persons with cancer and their loved ones. The course begins by providing a defining framework on cancer and its myths, and the meaning of cancer to patients and families. The role of the oncology clinical social worker, interdisciplinary care, ethnic and cultural dynamics, and treatment phases will be explored utilizing the biopsychosocial/spiritual model. Trajectories of illness and care from diagnosis through to bereavement or long term survivorship are considered. Students will learn how to apply clinical skills such as psycho-social assessments, counseling, leading family meetings, setting goals of care and making treatment decisions across the cancer continuum, focused on issues directly affecting individuals, couples, and families. Theoretical models and assessment approaches and the research that supports them are studied. Policy and ethical concerns are examined, including matters related to access to care. Sustaining self-care while meeting the demands of oncology focused work will be explored.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3113 Ending Ageism (1 Credit)**

Ageism is alive and well. A growing and consistent body of research has documented how ageism and other forms of prejudice and oppression undermine health, educational and employment opportunities, as well as compromises health care delivery across systems of care. Only until recently has evidence begun to support theories for interventions and at key developmental life stages and across the ecological framework. The objectives of this course are to a) incorporate theories and supporting evidence on prejudice and discrimination broadly, with an emphasis on ageism; b) identify psychological, social, organizational, legal, cultural, and developmental theories on how to overcome ageism, inclusive of Standpoint Theory, Critical Race Theory, and Social Justice perspectives; c) propose real-world interventions to overcome ageism. Pedagogical approaches include lectures, discussions, and experiential learning opportunities. Professional communication skills will be practiced. Throughout the course, we will discuss how to apply the tenants of evidence-based practice to the theories and issues that impact aging.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3114 LGBTQ+ Acculturation, Public Mourning, and the Role of Religion In Movements for Equity (1 Credit)**

This course explores the process of LGBTQ acculturation in the United States, particularly from the 1970s through the present day. The class will pay special attention to the roles religion and public mourning have played in delimiting the boundaries of sexual and gender minority acculturation. The course will consider how prominent LGBTQ activists used religion and public memorialization to bolster their arguments for social inclusion and how religion has shaped the parameters of social acceptance in the United States. We will also examine how prominent deaths, public mourning, and religion have influenced other movements for equity among racial and ethnic minority groups in the United States.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3115 Psychotic Disorders: Psycho-Social-Bio Perspectives (1 Credit)**

This one-credit elective will introduce students to a comprehensive, non-reductionistic model of psychotic disorders (schizophrenia and bipolar I disorder): From DNA to Neighborhood. We will review the most recent genetic, epigenetic (chemical processes controlling gene expression which are also regulated by social and psychological experiences) and neurobiological findings as well as their relationship to chronic stress, trauma, and adverse social experiences. We will concentrate on sociocultural and psychosocial factors identified in research to be involved in the initiation, course, and outcomes of psychotic disorders. Our course will also concentrate on the many evidence-based psychosocial therapies for these disorders, e.g., psychodynamic supportive therapy, CBTp, psychoeducation, Open Dialogue, Compassion Mind Therapy, Avatar Therapy for Voices, Voice Hearers Network, Acceptance and Commitment Therapy, Care management and ACT, PROS Programs and Milieu Therapies, Multiple Family Therapy Groups, Pre-Therapy, etc. We will also review all FDA approved medications for schizophrenia and bipolar disorder, as well as the use of off-label medications.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3116 Communicating with Children Facing Serious Illness (1 Credit)**

Social workers often play a crucial role in supporting and educating children facing serious illness in a variety of settings, including hospitals, schools, community organizations and social services. Optimizing communication using age appropriate language is crucial in supporting short-term coping and long-term mental health and developmental outcomes. Employing cultural humility is critical in understanding individual and family needs with regards to language, medical literacy and information sharing norms. Family systems theory and psychosocial development theory are used to guide assessment of communication needs. The crisis intervention model, play therapy, resiliency and coping model and bio-psycho-social-spiritual assessment models are drawn upon to best understand individual and family needs at various points throughout the illness trajectory. The objectives of this course are a) to incorporate theories and supporting evidence regarding children's needs across the developmental spectrum and throughout the disease process b) to identify relevant psychological, social, organizational, cultural and developmental perspectives related to communication with children about serious illness from diagnosis and into bereavement, c) to introduce assessment and intervention tools for engaging with this population. Pedagogical tools will include PowerPoint lectures, in-depth class discussions and experiential learning opportunities such as role play and case discussions. Clinical and professional communication skills will be practiced and evidenced based practices will be emphasized.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3117 Animal Companion Bereavement in Social Work (1 Credit)**

Grieving a companion animal can elicit profound, extended, and complicated reactions when invalidated by lack of community support, social rituals, and practitioner focus. The under treatment of pet loss as a significant mental health challenge can result in a protracted complicated grief as trauma can be a more common component. The goals of this course are a) to raise awareness of animal companion loss and its emotional impact on family, individual and community, b) to incorporate mental health assessment protocols which include attention to animal family members and their significance within the family structure across all socio-economic and racial populations, c) to apply trauma and attachment theory to better understand the unique factors of mourning companion animals, d) to modify evidenced-based interventions in treatment planning to help heal animal companion bereavement and e) to identify roles for social workers in mediating such reactions and creating opportunities for healing within their practices and communities. Pedagogical approaches include lectures, discussions, case studies and interactive learning assignments.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3118 Sustainable Practice: Burnout Prevention and Vicarious Trauma Management (1 Credit)**

Caring service is at the heart of Social Work's mission, but attending to the suffering of others without a plan to address its impact leaves us at risk for increased stress and vicarious trauma. Over time, this can compromise our sense of purpose, the quality of our work, and the overall health of our body, mind, and spirit. This course uses didactic material and experiential exercises to explore these dynamics and teach new ways of navigating. Students will learn to identify the impact of trauma exposure and will emerge with substantive techniques and strategies to build into their everyday practice, creating more sustainable and fulfilling careers and lives.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 3119 Assessing and Treating Mental Health Needs During Pregnancy and Postpartum (1 Credit)**

This one-credit intensive (OCI) course examines mental health in the perinatal period, from conception through the first year after delivery. It identifies biological, psychological, social, and systematic determinants of perinatal emotional distress. It elucidates the prevalence and symptomatology of common perinatal psychiatric disorders, including perinatal mood and anxiety disorders (PMADs), postpartum psychosis, and bipolar disorder in the perinatal period. It then provides an overview of evidence-based methods for screening and treating these conditions. Next, the course investigates barriers to mental health care in the perinatal period, and considers populations affected most by such obstacles. It addresses racial disparities in maternal mental health care, as well as in maternal health care more generally. In addition, the course emphasizes the impact of perinatal mental health on infant mental health, child development, and family systems. Lastly, it addresses and evaluates policies related to perinatal mental health.

**Repeatable for additional credit:** No

**MSWEL-GS 3120 Crafting Your Encore Career (1 Credit)**

Until recently, most Americans equated the end of a long career with the beginning of retirement. No more. Now, we want to stay in the game—or better yet, change it. We want to leave a mark, make a difference, and (in most cases) continue to earn a living. As we age, we are also wired to connect with younger generations both to share what we know, learn and forge links to the future. In this class, we'll explore what it takes to live all life's stages using our talents and experience to find meaning and benefit our community.

**Grading:** Grad Silver Pass/Fail

**Repeatable for additional credit:** No

**MSWEL-GS 4001 ASWB Masters Exam and NASW Code of Ethics Review (0 Credits)**

Social work practice requires a thorough grounding in the NASW Code of Ethics, and one fourth of the ASWB Masters exam focuses on this content. This two-hour workshop reviews principles of the Code of Ethics related to direct practice, including confidentiality, informed consent, duty to warn, duty to protect, dual relationships, and responsibility to colleagues and issues related to professional development and use of self. Sample questions related to this content area and the rationale for their answers are discussed to illustrate how material is formulated into exam questions. A general framework for understanding the exam's questions and suggestions for reviewing the three other content areas will be covered.

**Grading:** Not For Credit

**Repeatable for additional credit:** No

**MSWEL-GS 9001 Advanced Clinical Diagnosis-HBIII (3 Credits)**

Taught by Associate Professor Judith Siegel, this online course strengthens skills in assessing individuals, with an emphasis on application of the DSM-5 in understanding mental disorders. The course considers the historical perspective of diagnosis and the development as well as the use and limitations of the DSM and ICD. The diagnostic criteria for most of the major mental disorders from childhood through late adulthood are studied from a biopsychosocial perspective that includes neurobiology research. Implications for clinical interventions and specific treatment approaches are considered. This is an asynchronous course that students take on an individualized basis. Each of the fourteen lessons contains notes, video lectures, and videos of clients. It also contains links to most of the assigned readings from required books and journal articles.

**Grading:** Grad Silver Graded
