PSYCHOLOGY (PSYCH-UA)

PSYCH-UA 1 Intro to Psychology (4 Credits)
Typically offered Fall, Spring, and Summer terms
Cimpian, Knowles, Reed, Rhodes, Van Bavel. Offered every semester.
4 points. Fundamental principles of psychology, with emphasis on basic research and applications in psychology's major theoretical areas of study: thought, memory, learning, perception, personality, social processes, development, and the physiological bases of psychology. Included in the class is direct observation of methods of investigation through laboratory demonstrations and by student participation in current research projects.
Grading: CAS Graded
Repeatable for additional credit: No

PSYCH-UA 2 Teaching in Psychology (2 Credits)
Typically offered Fall and Spring
Prerequisite: admittance by application only. Hilford. Offered every semester. 2 points. The purpose of this course is to train students in teaching science, specifically psychology. Students attend a two-hour weekly seminar on teaching psychology as well as the Introduction to Psychology lecture. Students put their training to immediate use by teaching a weekly Introduction to Psychology recitation.
Grading: CAS Graded
Repeatable for additional credit: Yes

PSYCH-UA 8 Data Literacy for Psychology (4 Credits)
Typically offered Spring
Data Literacy for Psychology will equip students with a critical understanding of how behavioral data, statistics, and psychological research are used and misused. The course will cover the importance of data literacy, lying with data, cognitive biases, Bayesian reasoning, coincidences, opinion polling, pseudoscience, the scientific process, academic publishing, navigating the scientific literature, types of data, experimental design, variables, the concept of a p-value, and the replication crisis.
Grading: CAS Graded
Repeatable for additional credit: No

PSYCH-UA 10 Statistics for The Behavioral Sciences (4 Credits)
Typically offered Fall, Spring, and Summer terms
No prerequisite. PSYCH-UA 10 and 11 may be taken in either order. Bauer. Offered every semester. 4 points. Students gain familiarity with data description, variance and variability, significance tests, confidence bounds, and linear regression, among other topics. Students work on psychological data sets, learn approaches to statistical prediction, and learn to interpret results from randomized experiments.
Grading: CAS Graded
Repeatable for additional credit: No

PSYCH-UA 11 Statistics and Data Analysis for Research in Psychology (4 Credits)
Typically offered Fall and Spring
No prerequisite. PSYCH-UA 10 and 11 may be taken in either order (only one is required for the major, but students may take both). Offered every semester. 4 points. Offers a more theoretical approach than PSYCH-UA 10 and provides a deeper understanding of research methodology and statistical tests. Students perform their own data analysis and data visualization utilizing the software package R, which as the industry standard is more powerful than SPSS. Strongly recommended for students interested in psychological research.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 10 OR Statistics Proficiency Score >= 4 OR Statistics Proficiency Score >= 5).

PSYCH-UA 22 Perception (4 Credits)
Typically offered Fall, Spring, and Summer terms
Landy, Maloney, Winawer. Offered every semester. 4 points. How do we construct a conception of physical reality based on sensory experience? Survey of basic facts, theories, and methods of studying sensation and perception. The major emphasis is on vision and audition, although other modalities may be covered. Representative topics include receptor function and physiology; color; motion; depth; psychophysics of detection, discrimination, and appearance; perceptual constancies; adaptation, pattern recognition, and the interaction of knowledge and perception.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 1 OR PSYCH-UH 1001 OR Advanced Placement Examination Psychology >= 4 OR International Baccalaureate Psychology HL >= 6).

PSYCH-UA 25 Cognitive Neuroscience (4 Credits)
Typically offered Fall and Spring
Curtis, Davachi. Offered every semester. 4 points. Provides students with a broad understanding of the foundations of cognitive neuroscience, including dominant theories of the neural underpinnings of a variety of cognitive processes and the research that has led to those theories. In doing so, students also learn about the goals of cognitive neuroscience research and the methods that are being employed to reach these goals.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 1 OR PSYCH-UH 1001 OR Advanced Placement Examination Psychology >= 4 OR International Baccalaureate Psychology HL >= 6 OR Prerequisite: APSY-UE 2 OR APSY-UE 10).

PSYCH-UA 27 Language and Mind (4 Credits)
Typically offered Fall and Spring
Introduces students to the field of cognitive science through an examination of language behavior, one of the major domains of inquiry in the discipline. Begins with interactive discussions of how best to characterize and study the mind. These principles are then illustrated through an examination of research and theories related to language representation and use. The course draws from research in both formal linguistics and psycholinguistics.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: PSYCH-UA 29.
PSYCH-UA 29 Cognition (4 Credits)
Typically offered Fall, Spring, and Summer terms
Hilford, Rehder. Offered every semester. 4 points. Introduction to theories and research in some major areas of cognitive psychology, including human memory, attention, language production and comprehension, thinking, and reasoning.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 1 OR PSYCH-UH 1001 OR Advanced Placement Examination Psychology >= 4 OR International Baccalaureate Psychology HL >= 6 OR Prerequisite: APSY-UE 10 OR APSY-UE 2).

PSYCH-UA 30 Personality (4 Credits)
Typically offered Fall and Spring
Andersen. Offered every semester. 4 points. Introduction to research in personality, including such topics as the self-concept; unconscious processes; how we relate to others; and stress, anxiety, and depression.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 1 OR PSYCH-UH 1001 OR Advanced Placement Examination Psychology >= 4 OR International Baccalaureate Psychology HL >= 6 OR Prerequisite: APSY-UE 2 OR APSY-UE 10).

PSYCH-UA 32 Social Psychology (4 Credits)
Typically offered Fall, Spring, and Summer terms
Gollwitzer, West. Offered every semester. 4 points. Introduction to theories and research about the social behavior of individuals, such as perception of others and the self, attraction, affiliation, altruism and helping, aggression, moral thought and action, attitudes, influence, conformity, social exchange and bargaining, group decision making, leadership and power, and environmental psychology.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 1 OR PSYCH-UH 1001 OR APSY-UE 2 OR APSY-UE 10 OR Advanced Placement Examination Psychology >= 4 OR International Baccalaureate Psychology HL >= 6).

PSYCH-UA 34 Developmental Psychology (4 Credits)
Typically offered Fall, Spring, and Summer terms
Adolph. Offered every semester. 4 points. Introduction and overview of theoretical issues and selected research in developmental psychology. Focuses on infancy through adolescence. Lectures interweave theory, methods, and findings about how we develop as perceiving, thinking, and feeling beings.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 1 OR PSYCH-UH 1001 OR APSY-UE 2 OR APSY-UE 10 OR Advanced Placement Examination Psychology >= 4 OR International Baccalaureate Psychology HL >= 6).

PSYCH-UA 35 Social Neuroscience (4 Credits)
This course will provide a broad overview of social neuroscience. We will consider how social processes are implemented at the neural level, but also how neural mechanisms help give rise to social phenomena and cultural experiences. Many believe that the large expansion of the human brain evolved due to the complex demands of dealing with social others—competing or cooperating with them, deceiving or empathizing with them, understanding or misjudging them. What kind of "social brain" has this evolutionary past left us with? In this course, we will review core principles, theories and methods guiding social neuroscience, and research examining the brain basis of social processes, including theory of mind; empathy; emotion; reading faces, bodies, and voices; morality; among others. Overall, this course will introduce students to the field of social neuroscience and its multi-level approach to understanding the brain in its social context.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 1 OR PSYCH-UH 1001 OR APSY-UE 2 OR Advanced Placement Examination Psychology >= 4 OR Prerequisite: APSY-UE 10 OR International Baccalaureate Psychology HL >= 6).

PSYCH-UA 38 Lab in Social & Organizational Psychology (4 Credits)
Typically offered Fall
Students are acquainted with research methodology in organizational psychology. They then perform an original study, such as a laboratory experiment or research survey, in one of these areas.
Grading: CAS Graded
Repeatable for additional credit: No

PSYCH-UA 39 Lab in Personality & Social Psychology (4 Credits)
Typically offered Fall, Spring, and Summer terms
Methodology and procedures of personality and social psychological research and exercises in data analysis and research design. Statistical concepts such as reliability and validity, methods of constructing personality measures, merits and limitations of correlational and experimental research designs, and empirical evaluation of theories. Student teams conduct research projects.
Grading: CAS Graded
Repeatable for additional credit: No

PSYCH-UA 40 Lab in Developmental Psychology (4 Credits)
Typically offered Fall and Spring
In depth investigation of the methodological foundations of developmental psychology, in particular, behavioral methods with infants and children. Students will learn how to design experiments, create experimental stimuli, collect quantifiable measures from infant and child behavior, and analyze developmental data. Each week students will read ~3 primary research articles from a variety of domains in developmental psychology, but all focused on one methodological theme. Students will produce a thoroughly researched and creative proposed experiment and analysis plan for the course’s final project.
Grading: CAS Graded
Repeatable for additional credit: No

PSYCH-UA 42 Lab in Infancy Research (1-4 Credits)
Typically offered Fall and Spring
Part of a yearlong research training program. Students learn general methods for studying infant development and specific methods for examining infants’ perceptual-motor development. Students design and conduct laboratory research projects, code and analyze data, and prepare results for presentation and publication (grant proposals, conference submissions, and journal submissions).
Grading: CAS Graded
Repeatable for additional credit: Yes
PSYCH-UA 43 Practicum in Clinical Psychology Research (4 Credits)
Typically offered Fall and Spring
The course provides instruction in methods and concepts employed in research in the area of clinical psychology. Students learn about these methods and concepts in a hands-on manner by completing a set of research exercises. Methods covered include correlational and experimental designs and observational procedures. Topics include psychotherapy process research, case formulation approaches to psychopathology and therapy, and several theoretical perspectives that are employed in both research and clinical practice. Prerequisites: PSYCH-UA 1 AND PSYCH-UA 10 AND (PSYCH-UA 30 OR PSYCH-UA 51 OR PSYCH-UA 81)
Grading: CAS Graded
Repeatable for additional credit: No

PSYCH-UA 44 Lab in Perception (4 Credits)
Typically offered Fall and Spring
Presents a state-of-the-art introduction to the design and implementation of experiments in perception. By participating in class-designed experiments and by carrying out a research project designed by individual or pairs of students, students learn how to formulate an experimental question, design and conduct an experiment, statistically analyze experimental data using a variety of statistical tests, write up the experiments as research papers, and present a short research talk.
Grading: CAS Graded
Repeatable for additional credit: No

PSYCH-UA 46 Lab in Cognition and Perception (4 Credits)
Typically offered Fall and Spring
Students experience current thinking in hypothesis formulation, experimental design, data analysis and research communication. Experiments are performed in the fields of Cognition and Perception and can include visual processing, auditory processing, learning, memory, and decision making. Students complete research projects and gain experience in writing research reports that conform to APA guidelines.
Grading: CAS Graded
Repeatable for additional credit: No

PSYCH-UA 48 Linguistics as Cognitive Science (4 Credits)
Typically offered Fall and Spring
Approaches from linguistics, philosophy, and psychology. Topics: the evidence for constructing grammars, the interpretation of grammatical rules as cognitive or neural operations, the significance of neo-behaviorist approaches to language and computational modeling for a cognitive theory of language, the connection between linguistics theory and genetics, and the importance of sociocultural and historical variation for understanding the nature of language.
Grading: CAS Graded
Repeatable for additional credit: No

PSYCH-UA 49 Lab in Social Neuroscience (4 Credits)
This course is designed to introduce you to the experimental methods of social neuroscience, primarily through hands-on experience including lab exercises, discussions, and by conducting your own actual experiments. You will gain experience with the tools needed to carry out research and learn valuable analytical thinking skills. We will focus on functional brain-imaging, electrophysiology, and behavioral techniques such as response-time and mousetracking methodologies. Lectures will provide an overview of how social neuroscientists pursue research questions and give you a foundation for carrying out your own research experiment. Lab exercises will complement the lecture material and give you practical experience in preparation for conducting your own experiment during the second half of the course. Throughout the course you will encounter the critical issues pertaining to conducting research and analyzing data, develop critical thinking skills needed to effectively evaluate research, and consider ethical issues related to psychological research. You will also gain valuable experience in communicating the results of your research in written and oral formats at the end of the course.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: PSYCH-UA 1.

PSYCH-UA 51 Abnormal Psychology (4 Credits)
Typically offered Fall, Spring, and Summer terms
The kinds, dynamics, causes, and treatment of psychopathology. Topics include early concepts of abnormal behavior; affective disorders, anxiety disorders, psychosis, and personality disorders; the nature and effectiveness of traditional and modern methods of psychotherapy; and viewpoints of major psychologists past and present.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 1 OR Advanced Placement Examination Psychology >= 4) AND Prerequisite: (PSYCH-UA 30 OR PSYCH-UA 32 OR PSYCH-UA 34).

PSYCH-UA 53 Psychological Science and Society (4 Credits)
This course will prepare students to be informed, critical, and active consumers of empirical psychological research. Students will learn to understand the research process by dissecting published papers and tracing the transition of research findings into popular writings about psychological research. By the end of the course, students will be able to critically examine the status and origin of claims based on psychology research in the popular media (“getting back to the sources” and debunking myths); possess a basic understanding of the societal relevance of several bodies of psychology research; understand how to correctly interpret statistics in the context of research; and possess basic skills of communicating and writing about psychology research aimed at a general audience (e.g. Scientific American, Psychology Today).
Grading: CAS Graded
Repeatable for additional credit: No

PSYCH-UA 56 Psycholinguistics (4 Credits)
Typically offered Spring
Examines theories and research concerning the cognitive processes and linguistic representations that enable language comprehension and production. Topics include speech perception, visual processes during reading, word recognition, syntactic processing, and semantic/discourse processing.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 27 OR LING-UA 3 OR LING-UA 27 OR PSYCH-UA 22 OR PSYCH-UA 25 OR PSYCH-UA 29 OR LING-UA 1 OR LING-UA 2 OR LING-UA 4 OR LING-UA 5 OR LING-UA 11 OR PSYCH-UA 34).
PSYCH-UA 59 First Language Acquisition (4 Credits)
Linguistic development from birth to early school age, examining monolingual, bilingual, and atypical (e.g., autistic, Specific Language Impairment) populations. Focuses first on development in the individual linguistic domains of phonology, vocabulary, morphology, syntax, semantics, and pragmatics and then examines deeper theoretical and experimental approaches to language acquisition, with a focus on primary literature and active debates in the field.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 1 OR Advanced Placement Examination Psychology >= 4).

PSYCH-UA 60 Illusions to Inference (4 Credits)
Human perception easily falls prey to illusions and biases. It is tempting to think of these as failures of our brain, but they might not be. In fact, many illusions are likely byproducts of smart solutions that the brain applies when having to interpret imperfect and incomplete sensory input. We will study a wide variety of well-known and lesser-known illusions (visual, auditory, tactile, vestibular, and multisensory) to develop the central concept of probabilistic inference, the notion that the brain constantly forms hypotheses about the world and tries to figure out which of them is most probable given the sensory input. We will make connections to other applications of probabilistic inference, including medical diagnosis, crime scene investigation, election forecasting, and data science.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 1 OR Advanced Placement Examination Psychology >= 4).

PSYCH-UA 62 Industrial Organizational Psychology (4 Credits)
Typically offered Fall and Spring
Personal, social, and environmental factors related to people's attitudes and performance in industry and other organizations. Topics include personnel selection and evaluation, training and development, attitudes and motivation, leadership, group dynamics, organizational structure and climate, and job design and working conditions.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 1 with a Minimum Grade of C OR Advanced Placement Examination Psychology >= 4) AND Prerequisite: (PSYCH-UA 10 OR Advanced Placement Examination Statistics >= 4) AND Prerequisite: (PSYCH-UA 30 OR PSYCH-UA 32 OR PSYCH-UA 34).

PSYCH-UA 74 Motivation and Volition (4 Credits)
Typically offered occasionally
The course provides an overview of the major theories and findings in research on motivation and volition. More specifically, we will address the history of research on motivation and volition, classic phenomena of being motivated versus lacking motivation and willpower, the psychology of goals (goal setting, goal implementation, effortful goal pursuits, disengagement, content and structure of goals, the mental representation of goals), disorders of self-regulation, and cognitive-neuropsychological research as well as the perspective of economics on motivation and volition. We will focus on understanding the interrelations and contradictions between the different approaches, and on designing research that promotes these different lines of thinking.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: PSYCH-UA 29 AND PSYCH-UA 32.

PSYCH-UA 75 Political Psychology (4 Credits)
This course provides a comprehensive survey of the study of political psychology, which is a dynamic sub-discipline at the intersection of psychology and political science. (A special emphasis is placed on perspectives derived from social and personality psychology). After reviewing the historical development of political psychology and discussing the role of values in social science, we will cover a series of substantive topics, including authoritarianism and mass politics; personality and political leadership; mass media and candidate perception; left-right (or liberal-conservative) ideology; public opinion and voting; individual and group decision-making; leadership and persuasion; social identification and social dominance; racial and ethnic prejudice; intergroup relations; causes and effects of terrorism; protest, collective action, and revolution.
Grading: CAS Graded
Repeatable for additional credit: No

PSYCH-UA 79 Experiments in Beauty (4 Credits)
Learn science by doing it. The relative paucity of research on beauty offers the opportunity for undergraduates to do original research. Readings introduce the major ideas in understanding the experience of beauty, including psychology, philosophy, and literature. Each student, individually or with a collaborator or two, will come up with their own question about beauty, broadly defined. Over the course of the semester, with help from the instructor and classmates, they will address this question by doing an experiment, and give an oral and written scientific report at the end of the semester. Following a schedule, students will share parts of their report throughout the semester. We will make field trips to museums, galleries, and other sites in NYC that afford experiences of beauty that illustrate issues from the readings.
Grading: CAS Graded
Repeatable for additional credit: No

PSYCH-UA 81 Clinical Psychology (4 Credits)
This course provides students with a broad overview of the field of clinical psychology. Topics covered include the assessment and treatment of psychological disorders. Regarding treatment, most attention is devoted to psychotherapy, but early intervention, psychopharmacology, and behavioral medicine also receive some consideration. Topics are addressed in a manner that includes considerations about theory, research, and practice; the use of illustrative clinical examples; and discussion of current controversies. Cultural and ethical issues are also discussed.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 1 OR Advanced Placement Examination Psychology >= 4) AND Prerequisite: PSYCH-UA 51.

PSYCH-UA 200 Honors Seminar (4 Credits)
Typically offered Fall
Prerequisite: admission to the psychology honors program. Offered in the fall. 4 points. Students read and discuss recent studies and classical papers related to current controversies in psychology. A portion of class time is set aside for discussion of theoretical and technical aspects of each student's thesis project.
Grading: CAS Graded
Repeatable for additional credit: No

PSYCH-UA 201 Honors Seminar II (4 Credits)
Typically offered Spring
A continuation of V89.0200. Students are also expected to present preliminary results of their thesis projects and interpret their findings.
Grading: CAS Graded
Repeatable for additional credit: No
PSYCH-UA 300 Spec Topics Psych: (4 Credits)
Typically offered Fall, Spring, and Summer terms
Seminars of an advanced level. Topics vary each time offered.
Grading: CAS Graded
Repeatable for additional credit: Yes
Prerequisites: PSYCH-UA 51.

PSYCH-UA 992 Tutorial in Infancy Research (1-4 Credits)
Typically offered Fall and Spring
Students learn general methods for studying infant development and specific methods for examining infants? perceptual-motor development. Students design and conduct laboratory research projects, code and analyze data, and prepare results for presentation and publication (grant proposals, conference submissions, journal submissions).
Grading: CAS Graded
Repeatable for additional credit: Yes
Prerequisites: (PSYCH-UA 34 OR PSYCH-UA 42).

PSYCH-UA 993 Supervised Reading (1-4 Credits)
Typically offered Fall, Spring, and Summer terms
Independent study, which may include research, readings, and written work. Supervised by a faculty member. May be used for internship or other practical training (academic work is required to earn credits; average of two hours a week at internship per point). Students may take no more than 12 points of independent study and/or internship; no more than 8 points may be taken in any one department.
Grading: CAS Graded
Repeatable for additional credit: Yes
Prerequisites: (PSYCH-UA 34 OR PSYCH-UA 42).

PSYCH-UA 996 Research Experience In Psychology (2 Credits)
The goal of the course is to immerse students in research experience. This will be accomplished by working in a research lab in the psychology department under the direct supervision of a faculty mentor. Students will assist in the research carried out in an approved lab. Research experience is critical to prepare students for applying to graduate school. A host of important skills can be best learned through hands on application, including data management, analysis, and visualization, statistics, computer programming, and grant and paper writing. May be repeated twice (taken three times in total) for a maximum of 6 points.
Grading: CAS Graded
Repeatable for additional credit: Yes

PSYCH-UA 9001 Intro to Psychology (4 Credits)
Fundamental principles of psychology, with emphasis on basic research and applications in psychology's major theoretical areas of study, thought, memory, learning, perception, personality, social processes, development, and the physiological bases of psychology. Direct observation of methods of investigation by laboratory demonstrations and by student participation in current research projects.
Grading: CAS Graded
Repeatable for additional credit: No

PSYCH-UA 9022 Perception (4 Credits)
How do we construct a conception of physical reality based on sensory experience? In this course, we will survey basic facts, theories, and methods in the study of sensation and perception. The major emphasis is on vision and audition, however other modalities will also be covered. Representative topics include receptor function and physiology; color; motion; depth; psychophysics of detection, discrimination, and appearance; perceptual constancies; adaptation, pattern recognition, and the interaction of knowledge and perception.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 1 OR PSYCH-UH 1001 OR PSYC-SHU 101 OR APSY-UH 2 OR APSY-UE 10 OR PSYCYC-UC 6801 OR Advanced Placement Examination Psychology >= 4 OR International Baccalaureate Psychology HL >= 6).

PSYCH-UA 9025 Cognitive Neuroscience (4 Credits)
Provides students with a broad understanding of the foundations of Cognitive Neuroscience including dominant theories of the neural underpinnings of a variety of cognitive processes and the research that has led to those theories. In doing so, students also learn about the goals of cognitive neuroscience research and the methods that are being employed to reach these goals.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 1 OR PSYCH-UH 1001 OR APSY-UH 2 OR APSY-UE 10 OR PSYCYC-UC 6801 OR PSYC-SHU 101 OR PSYCH-UH 1001 OR Advanced Placement Examination Psychology > 4 OR International Baccalaureate Psychology HL >= 6).

PSYCH-UA 9029 Cognition (4 Credits)
This course is a survey of cognitive psychology, the scientific study of the human mind and human thinking. During the course of the semester we will discuss many different aspects of cognition: perception, attention, memory, language, concepts, reasoning, problem solving, expertise, creativity, and decision making. The emphasis in the course will be on how psychologists have used experiments to help construct theories of how the human mind works and how human thinking occurs. The class will involve lectures, student presentations, discussion, video material to accompany lectures, and occasional example class experiments. The course also has a practical component, for which students work in small groups and document or replicate an empirical study, which they write up in a research proposal and produce as a video.
Grading: CAS Graded
Repeatable for additional credit: No

PSYCH-UA 9030 Personality (4 Credits)
This course introduces and examines the core topics of research in Personality and Individual Differences. How and why do individuals differ? What are the methods used to study individual differences? What is personality? What factors influence personality? How stable is personality? Can personality be used to predict real-world outcomes, like mental health, work performance, educational achievement, and romantic relationships? The format of the course will be lectures, presentations and class discussions.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 1 OR PSYCH-UH 1001 OR APSY-UH 2 OR APSY-UE 10 OR Advanced Placement Examination Psychology >= 4).
PSYCH-UA 9032  Social Psychology (4 Credits)
The themes, methods and ideas of social psychology will be introduced in this course. We will look at how individuals understand themselves and other people, the relationship between behavior, self and the social situation, and the forces that govern interactions between individuals and groups. We will pay particular attention to the emerging field of social cognitive neuroscience, and moves to understand social phenomena with the tools of cognitive and perceptual psychology.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 1 OR PSYCH-UH 1001 OR PSYC-SHU 101 OR APSY-UE 2 OR APSY-UE 10 OR PSYC1-UC 6801 OR Advanced Placement Examination Psychology >= 4 OR International Baccalaureate Psychology HL >= 6).

PSYCH-UA 9034  Developmental Psychology (4 Credits)
Introduction and overview of theoretical issues and selected research in developmental psychology. Focus on infancy through adolescence. Lectures interweave theory, methods, and findings about how we develop as perceiving, thinking, and feeling beings.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 1 OR PSYCH-UH 1001 OR PSYC-SHU 101 OR APSY-UE 2 OR APSY-UE 10 OR PSYC1-UC 6801 OR Advanced Placement Examination Psychology >= 4 OR International Baccalaureate Psychology HL >= 6).

PSYCH-UA 9051  Abnormal Psychology (4 Credits)
The kinds, dynamics, causes, and treatment of psychopathology. Topics include early concepts of abnormal behavior; affective disorders, anxiety disorders, psychosis, and personality disorders; the nature and effectiveness of traditional and modern methods of psychotherapy; and viewpoints of major psychologists past and present.
Grading: CAS Graded
Repeatable for additional credit: No
Prerequisites: (PSYCH-UA 30 OR PSYCH-UA 9030 OR PSYCH-UA 32 OR PSYCH-UA 9032 OR PSYCH-UA 34 OR PSYCH-UA 9034 OR APSY-UE 10).
