ANTHROPOLOGY (PHD)

Department Website (http://as.nyu.edu/anthropology/)

NYSED: 08408 HEGIS: 2202.00 CIP. 45.0201

Program Description

The Doctor of Philosophy in Anthropology offers a holistic approach to the study of humans and exposes students to the traditional subdisciplines of anthropology while ensuring that they also receive intensive training in particular problems within one subfield.

The concentrations available to students are: biological, archaeology, and sociocultural and linguistic. We also offer a Dual Degree Program with PhD in Anthropology and Advanced Certificate in Culture and Media. See Certificate Program in Culture and Media (https://as.nyu.edu/departments/anthropology/graduate/program-in-culture-and-media.html) for more information.

Admissions

All applicants to the Graduate School of Arts and Science (GSAS) are required to submit the general application requirements (https://gsas.nyu.edu/nyu-as/gsas/admissions/arc.html), which include:

- Academic Transcripts (https://gsas.nyu.edu/nyu-as/gsas/ admissions/arc/academic-transcripts.html)
- Test Scores (https://gsas.nyu.edu/nyu-as/gsas/admissions/arc/test-scores.html) (if required)
- Applicant Statements (https://gsas.nyu.edu/nyu-as/gsas/ admissions/arc/statements.html)
- · Résumé or Curriculum Vitae
- Letters of Recommendation (https://gsas.nyu.edu/nyu-as/gsas/admissions/arc/letters-of-recommendation.html), and
- A non-refundable application fee (https://gsas.nyu.edu/admissions/ arc.html#fee).

See Anthropology (https://gsas.nyu.edu/admissions/arc/programs/anthropology.html) for admission requirements and instructions specific to this program.

Program Requirements

Course	Title	Credits		
Major Requirements				
ANTH-GA	Concentration Courses (5)	20		
Electives				
Select 13 elective courses		52		
Total Credits		72		

Concentrations

Students must select from one of three concentrations:

Archaeology

Course	Title	Credits
Major Requirements		
ANTH-GA 2213	Archaeological Theory	4
ANTH-GA 2214	Archaeological Methods & Techniques	4
ANTH-GA 1202	Professional Development for Archaeologists	4

Total Credits	
Methods	
A course in Geographical Information System (GIS) or Quantitative	
At least one area course	4

Biological Anthropology

Course	Title C	redits		
Major Requirements				
ANTH-GA 1505	History and Philosophy of Biological Anthropolog	y 4		
ANTH-GA 1506	Professional Development in Biological Anthropology	4		
ANTH-GA 1507	Primate Behavior, Ecology and Conservation	4		
ANTH-GA 1509	Molecular Anthropology	4		
Total Credite		16		

Cultural and Linguistic Anthropology

Course	Title	Credits
ANTH-GA 1010	Theory and Practice of Social Anthropology I	4
ANTH-GA 1011	Theory and Practice of Social Anthropology II	4
ANTH-GA 1040	Linguistic Anthropology	4
ANTH-GA 1636	History of Anthropology	4
ANTH-GA 3211	Sociocultural Professionalization	4
Total Credits		20

Additional Program RequirementsPhD Plan of Study

Students are required to create a program plan of study.

Comprehensive Examinations

On completion of at least 60 credits of course work and no later than one year after completion of all Ph.D. course requirements, a student must take the written Ph.D. comprehensive examinations. These examinations cover work in three areas of specialization and are evaluated by the student's Ph.D. committee. Completion of these requirements as well as an oral defense of the dissertation proposal means that the student has achieved Ph.D. candidacy and is eligible for the M.Phil. and thus may pursue dissertation research.

Matriculated students are required to submit a Degree Completion form and Field Exam Proposal form to the Director of Graduate Studies for approval once completing 32 credits of course work, and by the fourth semester of matriculation.

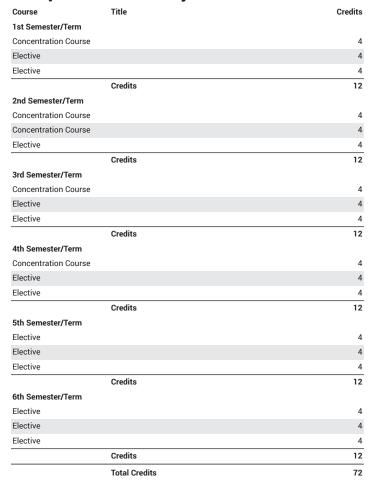

Dissertation Defense, Approval, and Submission

When the student has completed at least one year in residence and all course and language requirements, passed the qualifying examinations, proposed an acceptable subject for the dissertation, and been recommended by the program, he or she is formally admitted to candidacy for the doctorate, and an advisory committee is appointed. While most committees are comprised of members from the program faculty, students are permitted to work with any appropriate member of the NYU faculty. Approval of the dissertation by the committee and a defense of the dissertation examination complete the requirements for the degree.

Departmental Approval

All Graduate School of Arts & Science doctoral candidates must be approved for graduation by their department for the degree to be awarded.

Sample Plan of Study

Following completion of the required coursework for the PhD, students are expected to maintain active status at New York University by enrolling in a research/writing course or a Maintain Matriculation (MAINT-GA 4747) course. All non-course requirements must be fulfilled prior to degree conferral, although the specific timing of completion may vary from student-to-student.

Learning Outcomes

Upon successful completion of the program, graduates will:

- 1. Have a flexible, professional knowledge of each of the four fields of our discipline: Archaeology, Biological Anthropology, Cultural Anthropology, and Linguistic Anthropology. In their respective doctoral programs, we look for students to:
 - Archaeology: Be familiar with the range and variation in material culture, morphology, and/or genetics found in contemporary and prehistoric human populations and in our early hominin relatives.
 - Biological Anthropology: Understand the basic principles of evolutionary theory and the relevance of that theory for interpreting variation in human morphology, behavior, sociality, and cultural and linguistic practices.

- Cultural and Linguistic Anthropology: Be familiar with the diversity and plasticity of contemporary human behavior, social systems, and cultural practices.
- Be able to pose sophisticated questions concerning the origins and development of humans and their cultures and divergent systems of thought, belief, and social order in a manner that bridges the humanities, natural sciences, and social sciences.
- Be able to think creatively, critically, and independently in researching and communicating theoretical ideas and research results both orally and in writing.
- Teach undergraduates and demonstrate promise in later graduatelevel teaching in order to best train for the job market and to communicate the value of anthropological knowledge to wide audiences.
- Have the robust knowledge, skills, and experience to be competitive applicants for major national research grants, for jobs at top universities, and for jobs in the knowledge economy at large.

Policies NYU Policies
