

NUTRITION & DIETETICS (NUTR-GE)

NUTR-GE 2000 Nutrition: New Graduate Student Seminar (0 Credits)

Introduction to academic & professional resources at New York University & to career opportunities in nutrition. Class meets five times during the first semester of study.

Grading: Grad Steinhardt Pass/Fail

Repeatable for additional credit: No

NUTR-GE 2021 Nutrition & Food Writing (1-3 Credits)

Practical experience in writing reports, articles, pamphlets, & other information materials in the student's primary area of interest in nutrition, along with studies of classic readings in the field.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2037 Medical Nutrition Thrpy (4 Credits)

Study of the research basis of diet therapy for the principle nutrition related disease conditions through analysis of case histories. The relationship of food and nutrition to medicine: physiological and clinical basis of disease processes and medical, surgical and diet therapies for acute and chronic disease conditions, through lectures, case discussions, assigned readings, programmed learning guides, and class presentations. Course is restricted to diet interns.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2041 Pediatric Nutrition (3 Credits)

Principles of nutrition applied to disorders of infants, children and adolescents, with emphasis on current research; evaluation of diets of healthy children.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2042 Maternal/Child Nutrition (3 Credits)

Principles and application of nutrition for healthy mothers, infants, children, and adolescents with emphasis on current research related to normal growth and development.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2043 Critical Care Nutrition (3 Credits)

Principles and skills for parental and enthrall nutrition (nutrition support) practice: inflammatory metabolism, indications, calculations, formulas and solutions, access, complications, and ethical considerations, along with professional practice issues and the regulatory status of nutrition support products.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2045 Sports Nutrition (3 Credits)

Evaluation and application of nutrition concepts related to the energy, fluid and nutrient requirements of athletes and physically active individuals: diet related physiology, trends in sports nutrition, special conditions affecting athletic performance and techniques for counseling athletes.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2061 Research Applications in Nutrition (3 Credits)

Theoretical & applied aspects of research design, data analysis, & interpretation. Students teams conduct, analyze, & present an evaluative or applied research project in nutrition. Should be taken in the last year of study in the master's program.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2063 Res Appren in Foods & Nutrition (1-6 Credits)

Practical aspects of research on topics related to nutrition, foods, or food management. Students assist a faculty member with an ongoing research project. Depending on the nature of the specific project and the time available for assistance, qualified students may participate in one or more components of the research: study design bibliographic retrieval, data collection, data analysis, or writing for publication. Permission of sponsoring professor required.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2077 Field Experience (1-4 Credits)

Participation and experience in the professional field of major interest and seminar discussion of professional career options and responsibilities. Application must be filed during the previous term.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: Yes

NUTR-GE 2111 International Issues in Nutrition and Food: Cuba (3 Credits)

Students will examine the main factors affecting food, nutrition, and health practices in Cuba. Students will learn about traditional nutrition and health practices, nutrition programs and the Cuban nutrition and health care systems through a combination of lectures, seminars, field trips, fieldwork, and research.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2115 Int'L Issues Nutrition (3 Credits)

Students will examine the main factors affecting nutrition and health practices in the state of Puebla, Mexico, and focus on the impact of migration on these factors. Students will learn about traditional nutrition and health practices, nutrition programs and the Mexican health care system through a combination of lectures, seminars, field trips, fieldwork, and research.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2117 Current Issues in Nutrition: (1-3 Credits)

Critical analysis of recent research, trends, and public policy issues in selected areas of nutrition and health.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2139 Advanced Nutrition: Protein, Fats & Carbs (3 Credits)

Biochemical, physiological, and clinical factors that affect the role of macronutrients in human health and disease, with an emphasis on critical analysis of recent research studies in this field. May also include topics such as cholesterol, fiber, non-nutritive sweeteners, & alcohol.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2144 Advanced Nutrition: Vitamins & Minerals (3 Credits)

Biochemical, physiological, and clinical factors that affect the role of micronutrients in human health and disease, with an emphasis on critical analysis of recent research studies in this field. Includes the role of selected vitamins and minerals in cancer, coronary heart disease, HIV infection, bone loss, and other conditions of topical interest.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2146 Clin Prac in Dietetic I (3 Credits)

Seminar and supervised experience in clinical dietetics through observation, practice and research; food service systems, inpatient and ambulatory nutrition care, specialty practice settings.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2147 Clin Prac in Dietetic II (3 Credits)

Seminar and supervised experience in clinical dietetics through observation, practice, and research; food service systems, inpatient and ambulatory nutrition care, specialty practice settings.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: Yes

NUTR-GE 2165 Interdisciplinary Case-Based Management of Dysphagia (1 Credit)

This course is designed to promote the development & application of interdisciplinary, collaborative approaches to evidence-based management of patients with complex needs. Through the use of case studies, student led discussions & learning exercises, students will work as a team to review & critique treatment & management practices. Discipline-specific standards of care, problem-solving approaches to ethical decision-making & case management, & skill sets central to competent health care will be emphasized. Understanding & valuing the contribution of each discipline is essential for effective interdisciplinary case management.

Grading: Grad Steinhardt Pass/Fail

Repeatable for additional credit: No

NUTR-GE 2184 Food Science and Tech (3 Credits)

Scientific and sensory principles of food evaluation; professional methods, quality assurance, and objective experiments in advanced food preparation.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2187 Global Issues in Nutrition (1-3 Credits)

Introduction to world food problems and their nutritional, economic, and social effects.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2190 Research Methods in Nutrition (3 Credits)

Typically offered Fall and Spring

Introduction to design, interpretation, & evaluation of research in nutrition. To be taken first semester of the master's program.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2192 Nutritional Epidemiology (3 Credits)

Fundamentals of nutrition epidemiology focused on the collection, analysis, and interpretation of data on dietary intake and nutritional status of diverse population groups. The course emphasizes critical evaluation of dietary assessment methods and the results of research studies associating intake of foods and nutrients or food consumption patterns with the risk of cancer, coronary heart disease, and other chronic diseases.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2194 Weight Management (3 Credits)

Evaluation and application of theories of weight control and eating behavior to weight reduction and maintenance programs, with emphasis on development of scientifically based methods to promote appropriate body weight.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2196 Nutrition-Focused Physical Exam (2 Credits)

This course provides an introduction to nutrition-focused physical & diagnostic assessment of health status. Expected competencies to be obtained at the entry level include: Physical assessment skills: assessment of anthropometric measurements & body composition; measurement of vital signs; assessment of fluid status; assessment of normal breath & heart sounds; assessment of gastrointestinal tract; & Intra- & extra-oral assessment & dysphagia screening. In-person workshops includes discussion & demonstration of techniques, & practice under professional supervision.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2198 Nutrition Counseling Theory & Practice (3 Credits)

This course integrates medical nutrition therapy and education with psychodynamics theory and technique to increase the efficacy of nutrition care in short- and long-term health care settings. Through the use of advanced cases and related theory, core learning methods include classroom discussion, role play, weekly logs, process recordings, and supervision.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2199 Nutrition Education and Counseling (3 Credits)

Principles, methods, and materials for teaching nutrition to diverse groups in a variety of settings.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2208 International Studies in Food and Nutrition (2-6 Credits)

This course uses Italy and the Mediterranean diet as a case study to examine and write about food and nutrition from historical, journalistic, political, health, agricultural, cultural, and culinary perspectives. Participate in interactive cooking classes, take virtual tours, and learn from expert guest speakers in Italy and the US, including archeologists, food writers and historians, restaurant reviewers, olive oil experts, sommeliers, and others.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2210 Complementary and Altern Nutrition Therapies (3 Credits)

Review and analysis of the cultural context, rationale for, and applications of complementary and alternative nutritional therapies for acute and chronic conditions. The course emphasizes critical evaluation of scientific and other evidence for safety and clinical efficacy of products and methods, and of library, internet, and popular resources on this topic.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2215 Nutrition in Food Studies (3 Credits)

Typically offered Spring

An accelerated survey of basic principles of nutrition applied to food studies: nutrient functions, nutritional requirements, food composition, menu planning and assessment, food safety, dietary patterns, diet and health issues, dietary recommendations, food products for nutritional purposes. For students with no previous training in nutrition or health.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2220 Nutrition and Aging (3 Credits)

Analysis of research, programs, and services related to the interaction between nutrition and aging, with emphasis on role of nutrition in comprehensive geriatric care

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2222 Nutritional Aspects of Eating Disorders (3 Credits)

Definition, diagnosis, assessment, and determinants of eating disorders from the nutritionist's perspective, with an emphasis on team approaches to treatment.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2280 Sem in Advanced Nutrition (1-6 Credits)

This course will explore selected current topics in advanced nutrition through the critical analysis of pertinent original research publications and class discussion.

Grading: Grad Steinhardt Pass/Fail

Repeatable for additional credit: No

NUTR-GE 2282 Sem in Adv Nutrition: Genetics and Pediatrics (1-6 Credits)

No Course Description Available

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2284 Bariatric Surgery Weight Loss (1-6 Credits)

No Course Description Available

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2286 Nutrition: Diseased Gut (3 Credits)

This class is designed to strengthen students' clinical nutrition knowledge specifically as it relates to the management of acute Gastrointestinal Diseases and the consequences of major GI surgery. The course will have a surgical emphasis but will also cover non-surgical GI disease and the medical literature as it related to nutrition support. Students will expand their knowledge on the digestion and absorption through gaining a thorough understanding of the consequences of short bowel and intestinal failure. In addition through critical analysis of research studies they will learn evidence based practice as it related to feeding patients with severe GI disease/malnutrition /major surgery.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2290 Malnutrition Screening, Assessment & Intervention (3 Credits)

This class is designed to strengthen students' clinical nutrition knowledge specifically as it relates to the definition, screening, & assessment of adult malnutrition & to evidence based intervention strategies for the prevention & management of adult malnutrition. The class will focus on adult malnutrition of the hospitalized patient and of the oncology patient. Through critical analysis of published research studies, students will develop an understanding of evidence-based practice as it relates to these areas.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2292 Adv Nutr: Nutrition for Musculoskeletal Health (3 Credits)

Interested in downhill skiing or running a marathon at age 65? Or maybe you want to help older adults in your family maintain mobility and strength? A long & active lifestyle requires preservation of the musculoskeletal system and the intake of certain nutrients can mean the difference between fragility and strength. Nutrient requirements for this body system remain an area of active controversy making it an exciting and dynamic field. This course provides a comprehensive review of the musculoskeletal system and clinically relevant disease states, & evaluates the most current nutrition recommendations for optimal musculoskeletal health.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 2294 Seminar in Advanced Nutrition: Food System Politics (1 Credit)

This short survey course uses a systems approach to explore important global problems in public health nutrition, such as food insecurity, over consumption, the effects of food systems on the environment, and the impact of COVID-19 on global health and food systems. Students explore the politics of food policy, the role of various stakeholders in food choices, and ways to advocate for sustainable food systems and accountability.

Grading: Grad Steinhardt Pass/Fail

Repeatable for additional credit: No

NUTR-GE 2300 Ind Study (1-6 Credits)

It should be noted that independent study requires a minimum of 45 hours of work per point. Independent study cannot be applied to the established professional education sequence in teaching curricula. Each departmental program has established its own maximum credit allowance for independent study. This information may be obtained from a student's department. Prior to registering for independent study, each student should obtain an Independent Study Approval Form from the adviser.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: Yes

NUTR-GE 2381 Seminar in Advanced Nutrition: The Business of Nutrition (1 Credit)

Practical step by step guideline for writing a nutrition business plan. Discussion of how to launch and maintain a successful private nutrition practice. Topics covered will include identification of business, marketing and competition, strategic alliances, consulting, pricing and billing, insurance, reimbursement, operations, financing, technology and social media, HIPPA, and legal considerations.

Grading: Grad Steinhardt Graded

Repeatable for additional credit: No

NUTR-GE 3098 Doctoral Seminar (1 Credit)

Critical examination of research proposals, methods, data collection and analysis, other issues related to development and completion of the doctoral dissertation. Attendance is required every semester of graduate study. Registration is required in lieu of the 1 point Doctoral Advisement Fee every semester in which students are enrolled for less than 3 points. Credits do not count toward the doctoral degree.

Grading: Grad Steinhardt Pass/Fail

Repeatable for additional credit: Yes
