Program Description

The interdisciplinary PhD program in Nutrition and Dietetics provides broad training in education, specialization, and research theory and applications. The program is designed specifically to meet the needs of employed professionals who desire further education to advance in their careers or to develop a career in academia and research. The program prepares graduates for teaching, research, administrative, and leadership positions in academic, public health, government, industry, and other institutions.

The PhD program is small and highly selective. Within the program's overall structure, students are encouraged to select specific courses, course sequences, and dissertation proposal and research topics that meet their individual interests and goals. Students may be eligible for the MPhil degree award upon completion of all coursework and an approved dissertation proposal.

Admissions
