

CLINICAL SCIENCES (CLS03-DN)

CLS03-DN 2511 Multidisciplinary Experience in Patient Care (2 Credits)

This multi-disciplinary course is designed to provide D2 students with foundational knowledge and early clinical experiences that place "patient centered" care at the core of all learning exercises. This course builds on the D1 multi-disciplinary fundamental core lecture series (CLS03-DN 1510). This course serves as a predecessor for, and a prerequisite to, the Transition to D3 Clinics course (CLS03-DN 2610). Clinical observation sessions are designed to reinforce and provide clinical relevance to the basic science and pre-clinical courses taught in D1 and D2, and to underscore the fundamental requirements of professional behavior. These clinical experiences will provide opportunities to observe: communication skills, history taking, performing head and neck clinical examinations, dental examinations and charting, obtaining vital signs, performing health risk assessments, local anesthesia landmark techniques and safe handling of armamentarium; specific restorative or other treatment modalities, and entering chart and treatment information into aXiUm. This course is open only to students in the Doctor of Dental Surgery program. Core curriculum.

Grading: Dental Pass/Fail

Repeatable for additional credit: No

CLS03-DN 2610 Transition to Third-Year Clinic (2 Credits)

This multi-disciplinary seminar / hands-on course will provide a comprehensive update of the clinical knowledge and skills required to function in a patient-centered care setting dedicated to excellence as well as to provide a pathway for students to transition to the responsibilities associated with being a primary healthcare provider. In addition to the seminars and hands-on experiences, this course will include mandatory modules needed for the safe and successful entry into clinical patient care. This course reinforces the knowledge and skill gained in the D1 and D2 basic science courses, preclinical laboratory sessions, and clinical observations, as well as provides a highly focused view of the experiences necessary for students to demonstrate achievement of the required milestones in order to be awarded initial patient care privileges early in D3. This course is open only to students in the Doctor of Dental Surgery program. Core curriculum.

Grading: Dental Pass/Fail

Repeatable for additional credit: No

CLS03-DN 3520 Oral Health Center Observation (2 Credits)

This D3 rotation will enable students to observe the management of patients with special healthcare needs. This course is open only to students in the Doctor of Dental Surgery program. Core curriculum.

Grading: Dental Pass/Fail

Repeatable for additional credit: No

CLS03-DN 3600 Clinical Experience (12 Credits)

This clinical course provides students in a dual-degree program to maintain their clinical skills during their dual-core year. Offered as needed for students in the DDS-MBA or DDS-MPH programs only.

Grading: Dental Pass/Fail

Repeatable for additional credit: No

CLS03-DN 3610 Transition to Fourth-Year Clinic (2 Credits)

Provides students with the opportunity to complete the transition to primary care provider, under faculty supervision in the Comprehensive Patient Care clinical setting. This course is open only to students in the Doctor of Dental Surgery program. Core curriculum.

Grading: Dental Pass/Fail

Repeatable for additional credit: No

CLS03-DN 3708 Advanced Standing Immersion Program (12 Credits)

Typically offered Summer term

This semester-long course is designed to assure that the Advanced Standing students entering the pre-doctoral education program at NYU Dentistry are integrated as seamlessly as possible into the D2 class. Topics covered include: Culture and Diversity, Ethics and Professionalism, Principles of Infection Control and PPE, HIPAA and patient privacy policies, Health Literacy, Social Determinants of Health, and Risk Assessments, Leadership and Ethics, Healthcare Informatics and the Electronic Health Record, Invisalign, Peer Assessment and ePortfolio/Self-Assessment, Evidence-based Dentistry, History and Physical Exam, Training in Child and Adult Abuse Prevention, CAD/CAM Training, Axiom Training. This course is open only to students in the Doctor of Dental Surgery program. Core curriculum, AS Program.

Grading: Dental Pass/Fail

Repeatable for additional credit: No

CLS03-DN 4533 Urgent Care Dentistry (1.5 Credits)

This course is designed to provide D4 students with the didactic knowledge in the delivery of proper dental care within a general dentistry practice. The needs of the urgent care patient will be addressed to include but not limited to orofacial pain, traumatic dental injury, painful and non-painful mucosal lesions, acute dento-alveolar abscesses, swelling, dislodged crowns, lost restorations, and what constitutes an urgent issue in the realm of general practice dentistry. The goal of this course is to present the student with the diagnostic rationale, and the optimal clinical interventions that will successfully resolve the patient's chief complaint. The objective is to create a welcoming environment where the patient will return for comprehensive treatment. The student will be presented with lecture material to underscore that urgent care treatment is comprised of the establishment of a concise chief complaint, triage, intraoral and extraoral evaluation, review of the current medical history and all current medications, proper choice of radiographs and objective diagnostic tests, differential diagnosis, definitive diagnosis, and the correct treatment of the urgent care need. Appropriate postoperative instructions as well as a firm comprehensive care appointment in the student's general clinic are also components of the student's clinical responsibility and will be addressed as such. The lecture material will allow the students to complete this course with the level of knowledge to successfully challenge the midterm exam, final exam and a simulated course competency. Knowledge of pain and anxiety management, determination of antibiotic use, and prescription writing will be expected. This course is open only to students in the Doctor of Dental Surgery program. Core curriculum.

Grading: Dental Graded

Repeatable for additional credit: No

CLS03-DN 4620 Brooklyn Patient Care Experience (3 Credits)

This mini-residency program at NYU Dentistry Brooklyn Patient Care promotes active student involvement in daily care within a private group dental practice. The supervising faculty from the Department of Cariology and Comprehensive Care at NYUCD will permit well-qualified D4 students to participate in all aspects of the practice including examination and treatment planning, endodontic and periodontal therapy as required, esthetic procedures as required (including porcelain laminates and bleaching), all phases of operative dentistry, all phases of crown and bridge as required and indicated oral surgical procedures. Invisalign orthodontics may be initiated as required. Under faculty guidance, students will meet the needs of a diverse patient population who benefit from care in this private practice office. This course is open only to students in the Doctor of Dental Surgery program. Elective.

Grading: Dental Pass/Fail

Repeatable for additional credit: No
