NYSED: 28394 HEGIS: 2210.00 CIP: 45.0901

Program Description

The Master of Science in Global Affairs is the flagship graduate program of the Center for Global Affairs (CGA), repeatedly ranked by the Foreign Policy Association as one of the nation's leading institutions preparing students for international careers. The master's program provides you with the in-depth knowledge and the contextual perspectives for becoming a successful, well-rounded professional in the global arena.

Faculty members are scholars and skilled practitioners, including former officers of the United Nations, international attorneys, leaders of organizations engaged in refugee relief and the protection of human rights, diplomats, activists, economists, and global energy and environment experts from whom you will acquire both nuanced analytical understanding and the methodologies to develop and to implement strategic solutions that address critical global problems.

In every nation, globalization requires a growing need for knowledgeable professionals who are capable of identifying solutions to the unique challenges of an interdependent world defined by socioeconomic transformation, the rise of new and emerging world powers, and changing cultural paradigms. The Master of Science in Global Affairs provides a multidisciplinary approach and equips you with the knowledge and the advanced skills to navigate different sectors of the international arena, whether working with individuals, policymakers, private organizations, or the public sector.

Admissions

All applicants to the School of Professional Studies (SPS) are required to submit the general application requirements (<https://www.sps.nyu.edu/homepage/admissions/admissions-criteria-and-deadlines/general-graduate-admissions-criteria.html>), which include:

- Application Fee
- College/University Transcripts
- Résumé
- Statement of Purpose
- Degree Requirements
- Recommendations
- Kira Talent Assessment
- Degree-Specific Requirements
- English Language Assessment
- Pearson Versant English Placement Test
- International Transcript Evaluation
- International Student Visa Requirements

See degree specific application requirements (<https://www.sps.nyu.edu/homepage/admissions/admissions-criteria-and-deadlines/graduate-programs.html>) for instructions specific to this program.

Program Requirements

The program requires the completion of 42 credits, comprised of the following:

Course	Title	Credits
Core Requirements		
GLOB1-GC 1000	International Relations In The Post-Cold War Era	3
GLOB1-GC 1030	International Political Economy	3
GLOB1-GC 1040	International Law	3
GLOB1-GC 3035	Analytic Skills for Global Affairs	3
GLOB1-GC 3900	Graduate Thesis or Capstone Project	3
Concentration Electives ¹		
Concentration Electives (6 courses, by advisement)		18
International Relations/Global Futures (see concentration requirements below)		
Transitional Security (see concentration requirements below)		
Private Sector (see concentration requirements below)		
Human Rights and International Law (see concentration requirements below)		
International Development and Humanitarian Assistance (see concentration requirements below)		
Environment/Energy Policy (see concentration requirements below)		
Peacebuilding (see concentration requirements below)		
Global Gender Studies (see concentration requirements below)		
Electives		
Other Elective Credits ²		9
Total Credits		42

1

Concentration electives are subject to change. Not all elective courses will be offered every semester.

2

Students select up to three (3) additional courses from any of the concentrations, or with the approval of the faculty advisor or program director, students may select a maximum of two courses from among designated courses in the graduate programs offered by NYU's Wagner Graduate School of Public Service, elsewhere from within NYU, or from the following courses that will be offered periodically.

Concentrations

International Relations/Global Futures

The pace of change in international relations (IR) is accelerating rapidly and strategic surprise is now the norm. Nearly every day we wake up to something new and unanticipated. The International Relations/Global Futures concentration is designed to give students an advanced understanding of the factors shaping IR, and to place these factors in a futures context. What alternate future scenarios can we imagine? What are the forces for change in IR? How are these forces shaping the policies and capabilities of states and nonstate actors? What are the emerging issues that the world will have to face, and how might they be addressed? Courses within this concentration help students to improve their ability to anticipate change, and equip them with the analytical tools that are essential for professional success in a transforming environment. Students in the International Relations/Global Futures concentration are required to take the first course listed below. Students must then select

five concentration elective courses (3 credits each) that are offered on a regular basis.

Course	Title	Credits
Required Course		
GLOB1-GC 2045	The Future of International Relations: Forces for Change and Alternate Scenarios	3

Transnational Security

The Transnational Security concentration addresses the growing necessity for a multilateral approach to security issues that face the

international community as a whole. It explores the heightened need for coordination between international agencies when confronting emerging global threats. Courses explore such topics as security policy, transnational crime, counter-terrorism, homeland security, and economic security. This concentration prepares students for rewarding careers assessing and mitigating security threats, and researching and crafting security policy, at a range of institutions, from government agencies and think tanks to private businesses and NGOs. Students in the Transnational Security concentration are required to take the first course listed below. Students must then select five concentration elective courses (3 credits each) that are offered on a regular basis.

Course	Title	Credits
Required Course		
GLOB1-GC 2000	Transnational Security	3

Global Economy

From the gadgets we use, to the food we eat, to the clothes we wear - the Global Economy is everywhere and it never sleeps. While global trade and finance are not new phenomena, they have accelerated dramatically in the last thirty years with the advent of new technologies, adoption of free market policies, and creation of capital markets. Indeed, more commodities, goods, services, people, and capital flow across borders than ever before. But the Global Economy is not a static system; it is constantly evolving, reflecting a variety of social, political, and economic interactions. How is the global economy currently organized? What factors shape it? Who are the major stakeholders? The Global Economy concentration focuses on these important questions and more. Students will learn to analyze the opportunities and challenges of economic globalization and interdependence, as well as to understand the roles of key participants - from governments and supranational organizations, to corporations, banks, NGOs, and other non-state actors, to individual workers and investors. This concentration is an excellent foundation for careers in the private sector (e.g. consulting, finance, multinational corporations, startups), public sector (e.g. central banks, development banks, commerce departments), as well as NGOs and social enterprises. Students in the Global Economy concentration are required to take the first course listed below. Students must then select five concentration elective courses (3 credits each) that are offered on a regular basis.

Course	Title	Credits

Human Rights and International Law

The proliferation of conflict in the post-Cold War era, often accompanied by gross violations of law and abuses against civilian populations, has focused attention on the need to strengthen international standards of behavior and justice. International law, transitional justice, human rights, protection of the environment, national reconstruction, and international organizations are playing an increasingly important role in the discourse of international affairs. The Human Rights and International Law concentration prepares students for careers with research and advocacy organizations, the media, the United Nations, and other international organizations, as well as the pursuit of a law degree. Students in the Human Rights and International Law concentration are required to take the first course listed below. Students must then select five concentration elective courses (3 credits each) that are offered on a regular basis.

International Development and Humanitarian Assistance

Among the issues explored in the International Development and Humanitarian Assistance concentration are global poverty, the state and civil society in development, foreign aid, the role of gender in poverty alleviation, and the principles and politics of humanitarian assistance and intervention, including those aimed at refugees and internally displaced persons. This concentration prepares students for careers with NGOs involved in aid and advocacy, the United Nations, and other multilateral or governmental aid organizations. Students in the International Development and Humanitarian Assistance concentration are required to take the first course listed below. Students must then select five concentration elective courses (3 credits each) that are offered on a regular basis.

Environment and Energy Policy

The Environment/Energy Policy concentration analyzes the implications of the changing global energy and environmental landscape, as well as the new and emerging opportunities and challenges energy and climate changes present for national and global sustainability and security. The modern energy sector is experiencing rapid change with new oil and gas developments reshaping traditional energy geopolitics; a strong and growing renewable energy sector impacting local, national, and international energy policies and future forecasts; and innovative technological advances that are transforming all areas of the energy supply chain. This concentration prepares students to compete and thrive in this challenging and exciting sector, taking advantage of the opportunities occurring across the energy and environmental landscape. Courses reflect the increasing importance of energy in the formulation of national and foreign policy among countries the world over, as well

as the impact of climate change on our environment. Students in the Environment and Energy Policy concentration are required to take the first course listed below. Students must then select five concentration elective courses (3 credits each) that are offered on a regular basis.

Peacebuilding

The Peacebuilding concentration examines the methodologies and the applied strategies used to establish long-term, sustainable peace and security on a global scale. Peacebuilding emphasizes attaining stability and institutional reform on a structural level through the mediation of government institutions, nongovernmental organizations, and the United Nations. This concentration provides students with the skills and knowledge that are necessary to assess and mitigate conflicts and advance peace from positions within government, NGOs, think tanks, and nonprofits. Students in the Peacebuilding concentration are required to take the first course listed below. Students must then select five concentration elective courses (3 credits each) that are offered on a regular basis.

Global Gender Studies

Gender equality has not been achieved anywhere, but it is an international priority: there is increasing awareness of the fact that abuses of women's rights are among the drivers of the demographic changes and social inequalities that trigger violent/conflict, as well as poverty and other ills. Gender issues are a critical component of national and international decision-making. This new concentration in Global Gender Studies within the MS in Global Affairs is one of the few master's-level training programs available to equip graduate students with the knowledge and skills to analyze the fundamental relationship between gender and international politics. It provides students with a solid foundation to promote social justice, development, human rights and corporate social responsibility in international development, peace and governance organizations, national foreign affairs, aid, social policy and defense departments, private sector organizations, the not-for-profit sector, and academia. Students in the Global Gender Studies concentration are required to take the first course listed below. Students must then select five concentration elective courses (3 credits each) that are offered on a regular basis.

Course	Title	Credits
Required Course		
GLOB1-GC 2340	Gender in International Affairs: Sex, Power, and Politics	3

Elective Courses

Select five of the following: 15

GLOB1-GC 2035	Ethics in International Affairs
GLOB1-GC 2240	International Human Rights: Laws, Mechanisms, and Practices
GLOB1-GC 2281	Hunger and Development: The Politics of Global Food Security
GLOB1-GC 2330	Issues in Humanitarian Assistance and Intervention
GLOB1-GC 2341	Childrens Rights: International Norms and Standards
GLOB1-GC 2342	Women and Gender in the Middle East and South Asia
GLOB1-GC 2355	
GLOB1-GC 2360	
GLOB1-GC 2385	Gender and Development-Policy and Politics
GLOB1-GC 2390	Gender, Politics and the State in Development
GLOB1-GC 2425	
GLOB1-GC 2430	Energy and the Environment
GLOB1-GC 2470	
GLOB1-GC 3045	
GLOB1-GC 3075	
GLOB1-GC 2386	Gender & Migration
GLOB1-GC 2516	Advanced Data Analysis for Global Affairs
GLOB1-GC 2322	Non-Citizenship in the Twenty-First Century: Refugees, Statelessness, and Forced Migration
GLOB1-GC 2518	Geographic Information Systems for Global Affairs
GLOB1-GC 3920	Consulting Practicum
GLOB1-GC 2645	The United Nations and 21st Century Challenges
GLOB1-GC 2130	The Integration of Profit & Purpose: Corporate Social Responsibility, Sustainability
GLOB1-GC 1010	Peacemaking & Peacebuilding
GLOB1-GC 2151	Monitoring, Evaluation and Learning for Global Affairs
GLOB1-GC 2515	Applied Statistics and Data Analysis
GLOB1-GC 1075	Identities, Attitudes and Actions in Global Affairs
GLOB1-GC 2251	Foundations in Trauma-Informed Fieldwork

GLOB1-GC 2261	Restorative Practices
GLOB1-GC 2660	Financial Inclusion in Practice: A Toolset for the Digital Age

Total Credits 18

Specializations

In addition to a concentration, MSGA students are now able to attain a specialization in Data Analytics, Global Risk or the United Nations.

Data Analytics

Data analytics is a transferable skill set that is particularly valuable in the field of international affairs for advanced research and quantitative analysis. This specialization will help you throughout your coursework and thesis/capstone projects, and will provide highly sought-after knowledge and skills that will enhance your résumé and your ability to analyze and present complex data sets and ideas.

Global Risk

In today's turbulent and uncertain world, risk assessment is a valuable skill set that that can serve to inform the decision-making process across multiple fields. This specialization provides a comprehensive overview of the concept of risk; its sub-elements (threats, vulnerabilities, likelihood, and impact); risk management strategies (mitigation, avoidance, transfer, and acceptance); as well the socio-political and economic consequences.

United Nations

The United Nations specialization provides a focus on the operations of the UN, as well as the contemporary challenges it faces, preparing students for a career within the UN system in tandem with their chosen concentration. Students learn practical skills such as policy writing and negotiations, and global mediation. In addition, they gain field experience by working with UN agencies on real-world issues.

Learning Outcomes

Upon successful completion of the program, graduates will:

1. Design, organize and write a 60-page final thesis paper/or capstone that displays an understanding of how to engage and conduct original research.
2. Have the marketable skills that are most needed in their sectors - our concentration areas - and are employed.
3. Write and analyze - through policy papers, white papers, and op-eds - a thorough understanding of the similarities and differences in political and economic systems.

4. Have the critical skills required to conduct interdisciplinary and integrative analysis within global affairs, and effectively identifying problems and solutions.
5. Write a variety of different types of papers employing qualitative and quantitative statistical analysis - to be consumers of data/and literate consumers and users of data.

Policies NYU Policies

University-wide policies can be found on the New York University Policy pages (<https://bulletins.nyu.edu/nyu/policies/>).

School of Professional Studies Policies

Additional academic policies can be found on the School of Professional Studies academic policy pag (<https://bulletins.nyu.edu/graduate/professional-studies/academic-policies/>)e.
