

DOCTOR OF SOCIAL WELFARE (DSWSW-GS)

DSWSW-GS 4001 Philosophies of Knowledge and Mind (3 Credits)

Philosophy of Science. Differences over epistemology – the nature of knowledge and how we come to possess it – are part and parcel of debates over clinical theory and research methodology, whether it is the claimed superiority of behaviorism based on positivist views or the claimed superiority of relational psychodynamic approaches based on constructivist accounts of knowledge. This course will consider selected topics and controversies in philosophy of science and their application to debates over the nature of clinical theory and research.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4002 Social Theories and their Relationship to Clinical Practice (3 Credits)

Every clinical theory presupposes an account of the nature of the mind. Moreover, clinical theory continues to grapple with the philosophical conundrum of the mind-body relationship. The course will review selected topics in the philosophy of mind and the explanation of human action, and their application to theoretical debates within the clinical literature. Social Theories and their Relationship to Clinical Practice- Course number 4002.001 This course will examine how professional social work knowledge evolves in the context of broader intellectual currents in philosophy and the social sciences, including debates in epistemology, ontology, as well as political and moral philosophy. Postmodern perspectives such as relational theories, narrative, culture and race, second wave feminist theories, queer theories, and social constructivism will be examined in relation to clinical practice with vulnerable populations traditionally served by social workers. Emphasis will be placed on the critical review of each of these theories, particularly in relation to each other and their clinical utility and limitations when applied to at-risk populations. Best,

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4003 Social Work Practice Research (3 Credits)

This course will address a broad range of research methods, including quantitative and qualitative research designs as they relate to clinical practice. The content will be organized by reading studies considered "landmarks" in the study of clinical social work practice from the beginnings of the profession in the Progressive Era ("scientific charity"). These studies will be examined both for their findings and also for their methods of study (research designs). Since all MSW programs require the study of research, students will be refreshed in this knowledge by reading and critiquing these "exemplars" of such forms of study as the case study method, survey research, experiments and quasi-experiments, qualitative studies, single-system designs, and (currently) systematic reviews. There will be a module on statistical reasoning that precedes or is included in the course. Students will be able to demonstrate the ability to read and critique published research and will also learn about the nature of and findings from research on clinical social work practice, identifying areas promising for future study.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4004 Contemporary Theories of Clinical Practice I (3 Credits)

This course will examine the major premises of behavior and change that have informed clinical social work practice. The values, assumptions, methods and research evidence for each practice theory will be examined. The focus of this class will be on theories that were prominent during the early and mid-twentieth century, through selections of original contributions from the analytic, object relations, self-psychology, family systems, behavioral and cognitive theorists.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4005 Contemporary Theories of Clinical Practice II (3 Credits)

Contemporary Theories of Clinical Practice II Description: This course will continue to examine the major premises of behavior change that have informed contemporary clinical social work practice since the 1980's. The values, assumptions, methods and research evidence for each theory will be examined. Readings representing the interpersonal, intersubjective, emotionally-focused and behavioral health approaches will be critically examined.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4006 Clinical Social Work and Social Policy: Past and Present Description (3 Credits)

This course will cover the history of social work in the United States and social policies that affect it, with an emphasis on clinical social work (direct practice), licensing and practice regulations. It will also cover the emergence of the institutions, organizations, and systems of care that address mental illness, developmental disabilities, and substance use/abuse. Both traditional and Foucauldian perspectives will be offered. Current policy issues affecting clinical social work practice and the financing of clinical social work services will be emphasized.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4007 Publication Development I (3 Credits)

This workshop will provide students with the necessary information in order to write a publishable paper, including the selection of a topic, target audience, and appropriate journal, as well as the importance of the organization of content and the review process. Emphasis will be placed on the development of a literature review in one's area of expertise and a publishable article based on it.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4009 Implementing Evidence Based and Evidence Informed Practices (3 Credits)

This course will examine how evidence-based and evidence-informed practices are determined, give an overview of key evidence-based and evidence-informed practices, and consider their impact on clinical social work practice. Within the context of a growing emphasis on accountability and effectiveness in the behavioral health services, the course will explore the assumptions and values of evidence-based practice and how research is utilized to inform direct practice. The course also will examine the implementation of evidence-based and evidence-informed practices in real life settings examining the role of organizational climate, workforce competencies, policies and procedures, financing and community factors. Quantitative, qualitative, mixed methods and participatory research will be presented to demonstrate how these methods can inform different aspects of implementation. The course will use different implementation examples from behavioral health services to discuss issues of tailoring and fidelity in practice settings. Recent developments in implementation science and current health care policies will also be considered to understand the broader context for the implementation of evidence-based and evidence-informed practices.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4010 Contemporary Understandings of Human Development and Well-Being (3 Credits)

This course will consider established and emerging theories of human development and well-being, with particular attention to attachment and trauma. The course will also consider the historical separation of psyche and soma, and more recent efforts to integrate the mind and body through neuroscience research and behavioral health. Students will develop an awareness of competing paradigms and theoretical shifts that impact practice models.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4011 Theories of Human Rights and Social Justice (3 Credits)

Promoting social justice is a core value commitment of the social work profession, and public defense of services to those in need of help often involves the ability to articulate considerations of justice. Globally, human rights become an increasingly salient part of social justice for social workers. Yet, the nature of justice itself and its specific relationship to clinical intervention in social work and the mental health professions remain controversial. This course will introduce the student to a variety of selected currently debated theories of human rights and social justice and explore the relationship of these to mental health and to clinical intervention as practiced by social workers. The course will also touch on the challenge of global justice across cultures and national boundaries, including the nature of universal human rights, in the context of respect for alternative value systems.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: Yes

DSWSW-GS 4012 Publication Development Workshop II (3 Credits)

This workshop will continue students' work on publishable papers. If work is still ongoing in regard to getting the literature review published, that will be discussed in class (e.g., dealing with editorial feedback). Each student will also be required to start or complete a second paper that expands on work done for a course or that is drawn from some aspect of the student's practice (e.g., a traditional case study or a single system design study).

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4013 Psychopharmacology (3 Credits)

Description: The course will begin with an introduction to aspects of the brain and genes relevant to neuropsychopharmacology, including, but not limited to: structural and chemical neuroanatomy, genetics/ epigenetics, neurotransmitters and neuropeptides, receptors and transporters, signal transduction, psychoneuroendocrinology and the brain-immune system, etc. The basics of psychopharmacology including an introduction to pharmacokinetics and pharmacodynamics will be covered. We will then study the primary classes of psychopharmacological agents: antipsychotics, mood stabilizers, antidepressants, anxiolytics, sedative-hypnotics (sleep medications), psychostimulants, medications for substance use disorders, etc. We will also briefly review the other "somatic" therapies in psychiatry, e.g., vagus nerve stimulation, deep brain stimulation, ECT and rTMS. We will discuss the emerging field of psychodynamic psychopharmacology. We will also address salient ethical and cultural factors in psychopharmacology. In brief, we will approach the complex field of neuropsychopharmacology through the multiple lenses of genome/ epigenome, brain, mind and culture.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4014 Trauma-Informed Treatment and Treatment of the Addictions (3 Credits)

The first half of this course will provide an overview of trauma, including responses to trauma, the neuroscience of trauma, assessment, and the types of traumatic events such as natural and man-made disasters, sexual and physical abuse, and adult-onset trauma. Relevant theoretical and evidence-supported treatment models will be discussed in relation to specific types of trauma. The importance of clinician responses to direct and indirect exposure will be discussed, including secondary and shared trauma responses. Case material will be used to illustrate core components of trauma-informed care, application of specific models, and the impact of trauma on client-clinician interactions. The use and abuse of substances and addiction to alcohol and other drugs, as well as behavioral addictions such as gambling, are pervasive among social work clients. This part of the course will provide an overview of the scope of addictive problems, their impact on individuals, families and communities, the various etiological formulations, including the role of neurobiology, family and social factors, and become familiar with the latest in evidence-based interventions that can be utilized by social workers in clinical settings.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4016 Adaptive Leadership for Organizational Change (3 Credits)

This course will support DSW students in human services organizations to build the knowledge and skills to be effective leaders in directing staff and programs as well as overall organizational management. In order to adapt to the continued challenges posed by changing social policies and accountability to communities, leaders need to be adept at assuming a vast array of responsibilities.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4017 Teaching and Learning in Social Work (3 Credits)

People learn in various ways: visual, auditory, and experiential. This course addresses the various models of adult learning and cognitive development, especially in regard to fostering students' critical thinking and problem-solving strategies. Students will learn the components necessary to the development of their teaching philosophy and portfolio as it pertains to teaching the integration of theory and practice of social work. This course should be taken concurrently with the teaching internship.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4019 Teaching or Field Based Learning Internships (3 Credits)

A choice of one of these internships will be required and will be taken concurrently with the teaching or supervision class respectively. Current teaching at a CSWE accredited graduate or undergraduate program is acceptable, as is current supervisory work in an agency-based setting. Individualized learning plans will be developed for each internship and students will be evaluated on the achievement of these learning goals and their ability to reflect upon the internship experience productively for their continuing professional development.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4020 Publication Development Workshop III (3 Credits)

This course will focus on continuing work on papers for publication and the beginning processes of compiling the final portfolio needed for graduation. Work will focus on the status of students' scholarship and effective strategies that need to be taken to ensure publication in their respective areas of expertise. Students will also learn about the importance of disseminating one's work to a professional audience, and the steps that need to be taken to present professionally, including identification of a professional venue, abstract preparation and submission, and organizing of material for presentation.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4021 Capstone (2.5 Credits)

During the capstone course, students will present their completed portfolios to their committees. The scheduled presentations of the work with questions asked about it will be open to all of the Program's students and faculty. In addition to successfully presenting and defending their own work, each student will be required to attend at least three other "defenses" and to write a brief evaluation of each presentation they attend. In addition to providing a forum for evaluating individual work, this capstone course will prepare students for conference presentations and for participating in other peer review processes.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4022 Power, Privilege, and Oppression in Clinical Social Work (3 Credits)

This course will examine the role power, privilege, and oppression play in clinical social work practice and education. Grounded in theories of critical consciousness, critical race theory, and anti-oppression, this course will engage students in a close examination of topics related to white supremacy, equity and inclusion, and social action. Particular attention will be paid to the current US and global sociopolitical climate. This course aims to prepare students to be critically aware leaders in the field, educators in the classroom, and lifelong learners around matters of power, privilege, and oppression.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4024 Trauma and Attachment (3 Credits)

This course will examine how trauma impacts infants, toddlers, children, adolescents, adults and the elderly. It will explore the research of experts in both the areas of trauma and attachment, as well as, the nexus between the two. It will discuss the most recent neuroscience in how trauma affects the brain and the biological, psychological and social sequelae that follow. Cutting edge treatment models will be reviewed and their application to clinical social work practice will be discussed.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4025 Adaptive Leadership for Organizational Change II: Applications in Human Services (3 Credits)

Every day we see significant challenges playing themselves out at the local, national and global levels. Despite the considerable human energy devoted and financial resources spent, it could be argued that we are not making the kind of progress or affecting the kind of community change that is possible. This is not to say that progress has been completely elusive. Inspiring change agents and organizations have emerged and much suffering has been alleviated. Yet, one could argue that these very organizations get bogged down in internal and external challenges that prevent them from doing their best work, and imperative social change is slowed as a result. A key premise of the course is that leadership requires helping communities and organizations make the adaptations needed to thrive and survive in rapidly changing contexts. Effective management must be deployed to preserve successful institutional behaviors whereas leadership is needed to ensure that practices no longer serving organizational or community interests are discarded and that new innovations are pursued to generate greater impact. However, such adaptive work can be extremely challenging when longstanding practices are hardwired into the DNA of organizations through years and even decades of practice. In this context, the work of leadership is about accompanying people through the realities and losses of necessary change while opening them up to the promise of the future. This course builds upon the first course in providing students with the opportunity to develop their own strategies for executing change in their organizations, to recognize, diagnose, and respond appropriately to complex environments and situations, to contribute to innovation around processes and services and foster an experimental mindset in the organization. This course is focused on the application of adaptive leadership concepts in students' organizational contexts. Through case presentations and case consultations, students will engage in deepening their leadership practice.

DSWSW-GS 4026 The Role of School Social Workers in the Micro, Mezzo and Macro Relationships of the Depart of Educ (3 Credits)

Students spend more waking hours in school than any other place. Therefore, school social workers are at the forefront of intervening with many mental health issues of students, as well as complex traumas with families. This elective will focus on the micro, mezzo and macro issues in the New York City School System. School social workers bear witness and address multi-disparities that students in our system experience, including, but not limited to, housing and food insecurity, rise in suicidal ideation, violence with the NYPD, interactions with ICE and family member deportations, poverty and daily trauma. Schools are closely linked and required to partner with many other systems in our city, including hospitals, mental health organizations, NYPD, and ACS. This course will first address the challenges we see within the school system and the partnership with school social workers and then address the systemic changes we can make in the required outside partnerships, including, but not limited to, mental health resources, NYPD, and ACS. Finally, this class will closely address the segregation and racism in the NYC School System and strategies to create systemic change.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4027 DSW Applied Research (3 Credits)

This seminar course will guide students through an applied research process where they look to find practical solutions to challenges, gaps, or unmet needs in social work practice, leadership, and pedagogy while incorporating a social justice and racial equity lens. The course will examine a broad range of research methodologies in support of rigorous scientific study of a topical area of interest related to the students' clinical practice. As such, students will use the course to: 1) identify a suitable topic of interest, 2) develop a problem statement and conceptualize clear research questions within the topic, 3) establish a theoretical framework/conceptual model highlighting evidence-based approach to addressing the research questions, and 4) finally select appropriate methods. Students will work towards the development of two publishable papers. Students are also encouraged to consider topics of interest aligned with their Capstone Projects. Similarly, suitable topics may include a comprehensive literature review, the development, extension, or critique of relevant practice models or processes, a theoretical concept and its application to clinical practice, application or illustration of specific interventions, or a critical review of emerging approaches, pedagogy or training techniques and processes.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4028 Philanthropy and Strategic Resource Mobilization (3 Credits)

All social work activity, organizations, and initiatives require resources to carry out their aims. This course provides an overview of resource mobilization and the world of philanthropy and fundraising and places such in the context of leadership for the field. Thinking and acting strategically and reflectively as leaders, and then aligning and mobilizing resources to advance social work aims is a core theme of the course, which will include: 1) a conceptual examination of the notions of "resources" and "philanthropy", 2) a consideration of the interplay between leadership and resource mobilization, and 3) a specific focus on philanthropic strategies, tactics and skills.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4029 Mastering Professional Presentation Skills in Social Work (3 Credits)

This innovative course is tailored for doctoral students in the clinical social work program. Students will embark on a transformative journey to enhance their instructional abilities and expand their presentation skills by exploring a variety of cutting-edge platforms and techniques available. The primary objective of this course is to equip students with advanced proficiency in creating impactful presentations and podcasts. Through a combination of theoretical insights, practical exercises, and constructive feedback, participants will learn how to effectively communicate complex social work concepts in innovative ways. By exploring diverse presentation formats and multimedia tools, students will discover how to captivate and inspire their audience while presenting new information within the social work field. Additionally, this course will provide dedicated support to students as they prepare for their capstone presentations. Through guided sessions on organizing thoughts, crafting compelling narratives, and leveraging available platforms, students will develop the skills necessary to deliver successful capstone presentations showcasing their research work and potential papers with professional excellence.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4030 Dismantling Constructs of Whiteness in Social Work Practice, Leadership, and Education (3 Credits)

The complete title for this course is *Dismantling Constructs of Whiteness in Social Work Practice, Leadership, and Education: An Abolitionist Pedagogy for Reimagining the Social Work Profession.* This course begins with the discussion and exploration of historical Institutions that frame social work education and prepare future practitioners who are firmly rooted in hegemonic philosophies and practices that perpetuate colonization, oppression, and center whiteness. In recognizing that white supremacy is a mechanism of social control, that our current social structure is grounded in liberal-patriarchal capitalism, and that social work conforms to prevailing social norms, we, as social workers, must acknowledge our profession's role in perpetuating a white supremacist ideology. These ideologies are inherent within Western social work literature, teaching methodologies, and practice strategies which only serve to perpetuate an oppressive system. Therefore, students will utilize an abolitionist framework to envision how social work leaders in the DSW program serve as agents of change, instead of the historical essential cogs of the status quo who foster client dependence on a system that is inherently harmful. The course will explore, develop, and implement mechanisms for disrupting the white supremacy that has become a binary narrative in social work and create a counter-narrative. The goal of this course is to create a counter-narrative by using the pyramid of white supremacy framework to critique social work and deconstruct post-racial fallacies ascendant within the profession, and re-visualize an ecological systems framework as a mechanism for de-centering whiteness in social work scholarship, practice, and education.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4031 Frameworks for Social Work Advocacy (3 Credits)

This course will examine frameworks for social work advocacy, social change, and social justice. The course will focus on advocacy methods in macro and mezzo social work practice, especially in the arenas of community organizing and political social work.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4032 Ethical Dilemmas and Solutions for Social Justice (3 Credits)

This course is an introductory survey of the principles and practice of social ethics. Ethics (aka moral philosophy) is one of the branches of philosophy that tries to understand notions of right and wrong as they play out in the affairs of humankind. Social ethics is an application of these ideas to social problems and issues. It concerns itself with questions such as – Should abortion be a crime or a choice? Where lies the line between protecting children, and intruding into the lives of families? Is affirmative action fair to some and unfair to others? Is euthanasia a crime or an exercise of personal freedom? Is poverty an inevitable, or a shameful, feature of wealthy societies? If you find yourself encountering questions like these (these illustrations are all drawn from recent stories in the New York Times), and want to possess some tools that will enable you to think about them, then this course is for you. Resolving these kinds of ethical social problems is a necessary first step in the construction of a just society; ethical inquiry should suggest action that can lead to social justice.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: No

DSWSW-GS 4040 Independent Study (3 Credits)

Students may engage in individual study in selected curriculum areas under special circumstances. The independent work is approved if the student furnishes evidence of mastery of the basic content in the social work area selected. The work done by the student in this course is carried out with the guidance of a member of the full-time faculty.

Grading: Grad Silver Pass/Fail

Repeatable for additional credit: Yes

DSWSW-GS 4041 Independent Study (3 Credits)

Students may engage in individual study in selected curriculum areas under special circumstances. The independent work is approved if the student furnishes evidence of mastery of the basic content in the social work area selected. The work done by the student in this course is carried out with the guidance of a member of the full-time faculty.
