

# POLITICAL SCIENCE (BA)

CIP: 45.1001

## Program Description

The Political Science major at NYU Abu Dhabi attracts students who are interested in the many important political questions—conceptual, empirical, policy-oriented—that societies everywhere face today. How do different political systems affect policy-making? What are the intrinsic and instrumental virtues of democracy?

How could its functioning improve? Why do dictatorships survive in many countries, but evolve into democracies in others? Why do countries go to war? What are the connections between internal conflicts (such as civil war) and political or economic development? What are the main characteristics and causes of economic underdevelopment? Why are prosperity and stagnation distributed so unequally, both across countries and within them?

The student with a passion for questions such as these finds the Political Science major most rewarding. The philosophy underlying the courses has several distinctive features. First, the major has a strong analytical focus, with two required courses that introduce students to statistics and models of political behavior and institutions. These courses provide an introduction to the kinds of tools used by social scientists to conduct a deep analysis of these questions and to test the analysis using quantitative data. Second, the major offers many substantive courses, wherein these analytical tools are applied to important policy questions of considerable current interest. Third, the courses in the major include discussions of classic texts that illuminate both the intellectual history and the broader dimensions of these policy questions. Finally, the major offers several courses jointly with programs in Economics, Psychology, and Philosophy, providing students with exciting interdisciplinary opportunities.

## Foundations of Social Science

Foundations of Social Science (FSS) has four components that focus on (1) intellectual traditions in the social sciences (Social, Political, and Economic Theory: SPET), (2) global development in historical perspective (Social, Political, and Economic History: SPEH), (3) quantitative reasoning and numeracy, and (4) gateway courses into the majors.

Students come to NYUAD with a great diversity of backgrounds in terms of their grasp of societal and economic development and globalization, with a vision that is often narrowed by regional foci of high school curricula. FSS is designed to broaden and amplify students' understandings of the world and global processes. Required and elective courses in each of the majors will be able to build on this foundation, thereby fostering intellectual growth.

Beyond their role in the programs, Foundations of Social Science courses are open to all students and will deliver high value to any student curious about the development of societies and social thought; the substance and skills students learn in these courses will be applicable across the liberal arts spectrum. They are designed to foster informed world citizenship.

## Study Away

The study away pathway can be found on the NYUAD Student Portal at [students.nyuad.nyu.edu/pathways](http://students.nyuad.nyu.edu/pathways) (<http://students.nyuad.nyu.edu/>

pathways/). Students with questions should contact the Office of Global Education.

## Learning Outcomes

Upon completion of the NYU Abu Dhabi Political Science degree, all graduates are expected to be able to demonstrate:

1. Capacity to engage the professional literature and acquire familiarity with analytical concepts and principles that are essential for political thinking and understanding of political phenomena.
2. Ability to compare and analyze political systems, the structure of political institutions, and the role of political actors in shaping political life.
3. Ability to use the central concepts and methods to analyze international relations and patterns of conflict and cooperation in international affairs as well as ability to describe strategic interactions of states, international organizations, and non-state actors across a variety of substantive domains, including war, terrorism, trade, finance, environment, and human rights.
4. Distinguish systematic normative inquiry from other kinds of inquiry within the discipline of political science and ability to apply abstract theory to concrete problems by using the ideas of political theorists to address contemporary social issues such as affirmative action and capital punishment.
5. Information technology skills to collect data, present, and document empirical regularities in a wide range of social phenomena, with a particular emphasis on politics.
6. Ability to analyze data and employ qualitative and quantitative methods including research design to conduct rigorous investigation and analysis of a wide range of social phenomena, with a particular emphasis on politics.
