

CHILD AND ADOLESCENT MENTAL HEALTH STUDIES (MINOR)

Department Website (<http://nyulmc.org/childpsychcams/>)

Program Description

Offered by the College of Arts and Science in cooperation with the Department of Child and Adolescent Psychiatry (DCAP) at NYU Langone Health, this minor aims to heighten students' awareness of childhood mental health issues and their sustained impact on adolescents and adults. In the child and adolescent mental health studies (CAMS) minor, students will (1) explore the relationship between human behavior and its biological and environmental bases; (2) be challenged to think critically about the concepts of "normal" or "typical" versus "abnormal" behavior and engage in a meta-level analysis of the social, historical, and cultural context of mental health, illness, and diagnosis; and (3) be encouraged to consider how their future career can have a beneficial impact on the mental health of children, adolescents, and families.

Minor Declaration

CAS students: please contact CSCCams@nyulangone.org to declare the minor. All other NYU students: please declare the minor via the cross-school minor application on Albert. Students may also use the Minor Application in Albert to request cancellation of a CAS or cross-school minor. For more information, please contact the CAMS adviser at CSCCams@nyulangone.org.

Program Requirements

The minor in child and adolescent mental health studies (CAMS) requires the completion of at least 18 credits (usually five courses) as follows:

Course	Title	Credits
Minor Requirements		
CAMS-UA 101	Child & Adolescent Psychopathology ¹	4
Complete at least two more CAMS-UA courses		8
Complete two additional courses, either from CAMS-UA offerings or from approved non-departmental courses ²		8
Total Credits		20

1

Required of all minors and is a prerequisite for some advanced CAMS courses.

2

For a list of these approved non-CAMS courses, please see "courses in other departments" below, or the CAMS website (<https://cas.nyu.edu/academic-programs/bulletin/departments-and-programs/minor-in-child-and-adolescent-mental-health-studies/program-of-study-cas-bulletin.html>).

- Students must receive a C or better in all courses used toward the CAMS minor.
- Courses taken Pass/Fail may not be used toward the CAMS minor.

Courses taken for the CAMS minor cannot be applied to another major or minor, unless a student is a neural science or psychology major at NYU

College of Arts and Science; a social work major at NYU Silver School of Social Work; a student in the Department of Teaching and Learning at NYU Steinhardt; or a nursing student at NYU Rory Meyers College of Nursing.

Courses in child and adolescent mental health studies (CAMS) are currently also offered at NYU London and NYU Sydney. Consult the CAMS website for complete course offerings. Child and Adolescent Psychopathology (CAMS-UA 101) is the foundational course required of all CAMS minors. Some CAMS courses (such as advanced seminars) have prerequisites, but many of them have no prerequisites and are open to all undergraduates

Neural science, psychology, and social work majors may count one course toward both the CAMS minor and their major. However, if a student double counts a major course toward the CAMS minor, they may not also double-count a CAMS course toward his/her major.

Teaching and learning students at NYU Steinhardt may double count one of the following applied psychology courses toward their major and the CAMS minor:

Course	Title	Credits
Steinhardt Courses		
APSY-UE 20	Human Development I	2
APSY-UE 21	Human Development II: Application for Early Childhood Educators	2
APSY-UE 22	Human Development II: Application for Childhood Educators	2
APSY-UE 23	Human Development II: Early Adolescents and Adolescents	2

Nursing students at NYU Rory Meyers College of Nursing may count both PSYCH-UA 1 Intro to Psychology and APSY-UE 1271 Developmental Psychology Across the Lifespan toward their major and the CAMS minor. To complete the CAMS minor, nursing students must take an additional three courses selected from the CAMS course offerings, one of which must be CAMS-UA 101 Child & Adolescent Psychopathology.

Courses in Other Departments

Up to two courses from the following list may be applied to the minor. (Many of them have prerequisites, which are noted in the course descriptions of the sponsoring departments.) Courses taken outside of the College in the other schools of NYU count against each student's allowance of 16 non-CAS credits, and cannot be applied toward the 64-credit residency requirement in UA courses.

For more information on this program and acceptable courses, please visit the course offerings website (<https://cas.nyu.edu/academic-programs/bulletin/departments-and-programs/minor-in-child-and-adolescent-mental-health-studies/course-offerings.html>).

Learning Outcomes

In the child and adolescent mental health studies (CAMS) minor, students will:

1. Explore the relationship between human behavior and its biological and environmental bases.
2. Be challenged to think critically about the concepts of "normal" or "typical" versus "abnormal" behavior and engage in a meta-level

analysis of the social, historical, and cultural context of mental health, illness, and diagnosis.

3. Be encouraged to consider how their future career can have a beneficial impact on the mental health of children, adolescents, and families.

Policies

NYU Policies
