

GLOBAL PUBLIC HEALTH AND ANTHROPOLOGY (BA)

Department Website (<https://as.nyu.edu/anthropology/>)

NYSED: 35037 HEGIS: 1214.00 CIP: 51.2201

Program Description

The highly selective, demanding undergraduate majors in Global Public Health (GPH) allow CAS students to choose a course of study that is a combination of public health and an academic discipline housed in the College (GPH is not a stand-alone major), and also provide them with instructors and courses drawn from the entire university. This unique structure responds to the ever-increasing demand for interdisciplinary public health practitioners both in the U.S. and abroad. The coursework is integrated with experiential learning and study away requirements to ensure that students are broadly trained and uniquely prepared for a variety of careers.

The majors' global public health courses are offered by the NYU School of Global Public Health (708 Broadway, 11th Floor; 212-992-6741; <https://publichealth.nyu.edu/>). GPH delivers truly interdisciplinary public health education at the undergraduate, master's, and doctoral level. It builds on the global reach of NYU's unique Global Network University; draws strength from the entrepreneurial spirit of NYU's many talented faculty and students; and serves as a conduit for groundbreaking research and education that advances and promotes equitable health for all.

This major provides interdisciplinary training that embraces the natural convergence of society, culture, and health, and draws on the Department of Anthropology's strength in bridging the social sciences, natural sciences, and humanities. The joint major in global public health and anthropology prepares students to analyze various cultural traditions through the lens of health; to examine complex relationships within economic, political, cultural, physical, and biological environments; and to apply anthropological approaches to public health problems. The joint major is designed to prepare students for multidisciplinary careers in a variety of settings and/ or for advanced academic training in public health, anthropology, or other related fields.

Admissions

New York University's Office of Undergraduate Admissions supports the application process for all undergraduate programs at NYU. For additional information about undergraduate admissions, including application requirements, see How to Apply (<https://www.nyu.edu/admissions/undergraduate-admissions/how-to-apply.html>).

Program Requirements

Students in this combined major must consult with the DUS or other departmental adviser to work out a course plan, especially as this major requires students to study away for one semester. The major requirements (60 credits) must be completed with a grade of C or higher.

Note: The post-intermediate language requirement for the major applies only to students who matriculated before fall 2021; if they are granted a waiver or exemption from the requirement, they must take an additional (third) 4-credit elective in the major. Students who matriculate in and after fall 2021 have no post-intermediate language requirement for this major, and are all required to take three major electives.

Course	Title	Credits
General Education Requirements		
First-Year Seminar		4
EXPOS-UA 1	Writing The Essay:	4
Foreign Language ¹		16
Physical Science		4
Life Science		4
Texts and Ideas		4
Cultures and Contexts		4
Expressive Culture		4
Global Public Health Requirements		
UGPH-GU 10	Health and Society in a Global Context (no prerequisites) ²	4
UGPH-GU 20	Biostatistics for Public Health ³	4
UGPH-GU 30	Epidemiology for Global Health	4
UGPH-GU 40	Health Policy in a Global World	4
UGPH-GU 50	Environmental Health in a Global World	4
UGPH-GU 60	Undergraduate Experiential Learning in Global Public Health	4
Foreign Language ⁴		
Select one foreign language course above the intermediate two level		4
Anthropology Requirements		
ANTH-UA 1	Culture, Power, Society	4
ANTH-UA 35	Medical Anthropology	4
ANTH-UA 36	Global Biocultures: Anthropological Perspectives on Public Health	4
Electives		
Anthropology Electives (select three of the following):		12
ANTH-UA 2	Human Evolution	
ANTH-UA 16	Language, Power, Identity	
ANTH-UA 32		
ANTH-UA 51	Evolution and Human Variation	
ANTH-UA 55	Evolutionary Medicine	
ANTH-UA 80	Emerging Diseases	
ANTH-UA 112	Anthropology of Gender and Sexuality	
ANTH-UA 113	Disability Worlds: Anthropological Perspectives	
ANTH-UA 323	Race and Caste	
ANTH-UA 326	Introduction to Forensic Anthropology	
ANTH-UA 331	Human Rights & Culture	
ANTH-UA 410	The Social Life of Food	
Major Electives		8
Other Elective Credits		24
Total Credits		128

1

The foreign language requirement is satisfied upon successful completion through the Intermediate level of a language. This may be accomplished in fewer than 16 credits, but those credits must then be completed as elective credit.

2

Note well: UGPH-GU 10 Health and Society in a Global Context is the prerequisite or corequisite for UGPH-GU 20 Biostatistics for Public Health, UGPH-GU 30 Epidemiology for Global Health, UGPH-GU 40 Health Policy in a Global World, and UGPH-GU 50 Environmental Health in a Global World. UGPH-GU 30 Epidemiology for Global Health is an additional (recommended) prerequisite or corequisite for UGPH-GU 40 Health Policy in a Global World. In addition, UGPH-GU 10 Health and Society in a Global Context, UGPH-GU 20 Biostatistics for Public Health, and UGPH-GU 30 Epidemiology for Global Health are firm prerequisites for UGPH-GU 60 Undergraduate Experiential Learning in Global Public Health.

3

This satisfies the College Core Curriculum requirement in Quantitative Reasoning.

4

This requirement applies only to students who matriculated before fall 2021; students who matriculate in and after fall 2021 do not take this additional course. Students in the former category may petition for a waiver from the requirement, or may use an NYU language placement or language exemption exam to meet this requirement. If they successfully waive or exempt out of the requirement, they must take an additional (third) 4-credit major elective (see below) to satisfy the total number of credits required for the major.

For more details, consult the archived PDF of the 2020-2022 CAS Bulletin at bulletin.cas.nyu.edu (<http://bulletin.cas.nyu.edu/>), or discuss with a major adviser. Students in the latter category are all required to take a third elective in the major (see below) to replace the discontinued (for them) 4-credit post-intermediate language requirement and satisfy the total number of credits required for the major.

5

Three additional electives must be completed in the GPH program or anthropology, by advisement. For students who matriculate in and after fall 2021, the third elective replaces the discontinued (for them) post-intermediate language requirement in this major. Students who matriculated before fall 2021 technically have a major elective requirement of only two courses/8 credits; however, if they waive or exempt out of the major's post-intermediate language requirement, they **must** take a third major elective for 4 credits.

Study Away

All majors must also study away for one semester. Programs of study are planned with the director of undergraduate studies in the chosen CAS department. The e-mail address for general inquiries from CAS students is cas.gph@nyu.edu.

Sample Plan of Study

Course	Title	Credits
1st Semester/Term		
ANTH-UA 1	Culture, Power, Society	4

Credits		16
Total Credits		128

1

Chosen from a list of approved courses. See adviser for more information.

2

Chosen from courses in the GPH program or in Anthropology, by advisement.

Note: students who matriculated before fall 2021 take only **two** additional major electives, but **must take** one foreign language course above the intermediate two level.

Learning Outcomes

Upon completion of program requirements, students are expected to have acquired:

1. Understand Anthropology's goals and methods of study as a discipline.
2. Understand how sociocultural and biological anthropologists approach the study of public health and disease.
3. Demonstrate effective written and oral communication skills.

4. Conduct independent research by combining the methods of anthropology with those used in public health.
5. Recognize key historical milestones in the development and evolution of the field of public health with examples from both the U.S. and international contexts.
6. Describe and assess the biological, social, environmental, and structural determinants of health by applying interdisciplinary approaches and methodologies.
7. Explain key data analytic techniques and epidemiologic concepts for measuring disease occurrence and frequency and how the information obtained from these measures is used to assess the health of populations.
8. Apply public health promotion and prevention concepts to engage in collaborative and culturally relevant public health activities.
9. Connect public health concepts to disciplinary practice in the field.

Policies

General Policies Applying to the Combined Global Public Health Majors

CAS students are allowed to count 16 credits from the other schools of the University toward the baccalaureate degree. Four of the six core UGPH-GU courses required for the combined GPH majors are treated as liberal arts courses and therefore do not count against the 16-credit allowance: UGPH-GU 10, 20, 30, and 50. (These four courses are exempt from the 16-credit rule both for declared GPH majors and also for CAS students who simply take one or more of them as electives.) The two required GPH core courses UGPH-GU 40 and 60 are not exempt from the 16-credit rule, and together use up 8 credits of each student's 16-credit allowance. Any other UGPH-GU courses besides 10, 20, 30, and 50 will also count against the 16 credits.

Students may request additional non-CAS, non-liberal arts credits beyond the 16-credit limit through the College Advising Center, 726 Broadway, 7th floor; 212-998-8130.

No UGPH-GU courses can count toward the 64 credits that internal or external transfer students are required to complete in CAS (-UA) courses.

Students must earn a C or better in all courses for their combined major and maintain a 2.0 major GPA. Courses graded Pass/Fail cannot be counted toward the major.

The GPH tracks with anthropology, history, and sociology all satisfy the College Core Curriculum requirement in Societies and the Social Sciences. However, the two GPH concentrations in science do not satisfy this requirement. None of the UGPH-GU courses can exempt students from any part of the Core's Foundations of Contemporary Culture.

Transfer Student Policies Applying to the Combined Global Public Health Majors

Transfer students to CAS must complete at least half of their entire combined GPH major at NYU, with at least half of the CAS coursework required for the major completed at NYU. In addition, GPH stipulates that transfer credit cannot be used for more than one of the six core GPH requirements (the other five must always be completed at NYU). The internship course (UGPH-GU 60) can never be satisfied with transfer credit.

Applicants to schools of the health professions who are pursuing one of the science GPH majors must complete at least five of the required prehealth science courses at NYU in order to be eligible for a committee interview and letter from the CAS Preprofessional Advising Center.

Some transfer students may therefore be required to complete more than half of their GPH major at NYU to satisfy these policies, regardless of transfer coursework presented.

NYU Policies

University-wide policies can be found on the New York University Policy pages (<https://bulletins.nyu.edu/nyu/policies/>).

College of Arts and Science Policies

A full list of relevant academic policies can be found on the CAS Academic Policies page (<https://bulletins.nyu.edu/undergraduate/arts-science/academic-policies/>).
