

# MATHEMATICS (MINOR)

Department Website (<http://math.nyu.edu>)

## Program Description

The undergraduate division of the Department of Mathematics offers a wide variety of courses in both pure and applied mathematics. Faculty are members of the Courant Institute of Mathematical Sciences, which has become a leading research center through its tradition of integrating mathematical theory and applications.

Students who complete any four (4) MATH-UA courses (numbered MATH-UA 120 or higher) are eligible to declare a minor in mathematics. Students who have a mathematics requirement for their major or joint major must be mindful of not double-counting more than two (2) MATH-UA courses between this minor and their major's program of study. Please view the policies tab for more information.

## Minor Declaration

To request declaration of a minor, CAS students should visit the host department. To request declaration of a cross-school minor, CAS students should complete the online Minor Application available in their Albert Student Center. Students may also use the Minor Application (<https://www.nyu.edu/students/student-information-and-resources/registration-records-and-graduation/forms-policies-procedures.html>) in Albert to request cancellation of a CAS or cross-school minor.

## Program Requirements

The minor requires the completion of any four (4) MATH-UA courses numbered MATH-UA 120 or higher.

Course	Title	Credits
<b>Minor Requirements</b>		
Any (4) four MATH-UA courses numbered 120 or higher <sup>1</sup>		
MATH-UA ---		4
MATH-UA ---		4
MATH-UA ---		4
MATH-UA ---		4
<b>Total Credits</b>		<b>16</b>

<sup>1</sup> Courses from the traditional Calculus sequence (MATH-UA 121 Calculus I, MATH-UA 122 Calculus II, MATH-UA 123 Calculus III) and the Mathematics for Economics Sequence (MATH-UA 131 Mathematics for Economics I, MATH-UA 132 Mathematics for Economics II, MATH-UA 133 Mathematics for Economics III) cannot both be applied to the minor in mathematics. Students must choose one sequence or the other and cannot mix-and-match, combine, or double-count between the Calculus and Mathematics for Economics sequences. Also note that students cannot register simultaneously for separate courses within the two sequences.

Please see the policies tab for more information on restrictions and guidelines applying to the minor in mathematics.

## Policies

### Program Policies

#### Policies Applying to the Minor in Mathematics

- At least two (2) courses for the minor **must be MATH-UA courses taken at NYU CAS.**
- MATH-UA test credit for up to two (2) courses may be accepted from AP, A Level, IB, etc. test scores.
- MATH-UA transfer course credit for up to two (2) non-NYU courses may be accepted.
- A student who enters NYU with 16+ credits of MATH-UA test and/or transfer course credit must still take at least two (2) MATH-UA courses at NYU CAS.
- No credit toward the minor will be awarded for any or all of Mathematics for Economics I, II, III if the student has taken any or all of Calculus I, II, III (or Honors Calculus III).
- No credit toward the minor will be awarded for any or all of Calculus I, II, III (and Honors Calculus III) if the student has taken any or all of Mathematics for Economics I, II, III.
- No credit toward the minor will be awarded for any honors version of a course that a student has already taken the non-honors version of, or vice versa.
- Students may double count no more than two (2) MATH-UA courses between a major and/or a second minor minor (with approval of the other department or program).
- Courses taken under the Pass/Fail option are not counted toward the minor.
- A grade of C or better is required in all courses to count toward the minor.

### NYU Policies

University-wide policies can be found on the New York University Policy pages (<https://bulletins.nyu.edu/nyu/policies/>).

### College of Arts and Science Policies

A full list of relevant academic policies can be found on the CAS Academic Policies page (<https://bulletins.nyu.edu/undergraduate/arts-science/academic-policies/>).
