

EDUCATION STUDIES (EDST-UE)

EDST-UE 1000 Independent Study (1-6 Credits)

Typically offered Fall

This course is designed to provide education studies students with an opportunity to gain or enhance their knowledge of different aspects of education by exploring an area of interest under the guidance of a full-time professor. Students may enroll in credit-bearing, paid or unpaid, internship work directly related to their interests in education studies under the guidance of an NYU full-time professor through an independent study. Only students who have successfully completed one full academic year at NYU will be considered eligible to use internship or fieldwork work to satisfy an independent study. The course requires a minimum of 45 hours of academic or fieldwork per point. Points are determined by the student and the professor.

Grading: Ugrd Steinhardt Graded

Repeatable for additional credit: Yes

EDST-UE 1320 Political Economy of Education (4 Credits)

Students, teachers and schools exist within a larger political and economic ecosystem that shapes education institutions and opportunities. In this umbrella course, students learn how different social, political and economic forces shape education policies and practices as well as the choices that students and their parents make. Subtopic courses span a range of topics and case studies, including growing neoliberalism in education policy, the influence of the high cost of higher education, school choice and access, and trends in global education development.

EDST-UE 1503 Education and Social Entrepreneurship (4 Credits)

Innovative solutions in education are emerging from the private sector every day. Business ventures from Teach for America to Khan Academy are changing the way teachers are prepared, the way students learn, and the way institutions use data. These ideas are started by "social entrepreneurs," people who try to improve lives through solutions that have a market and customers. Students in this course learn about social entrepreneurship, how to identify critical issues in the education-related space, and how to develop their own entrepreneurial solutions accordingly.

EDST-UE 1505 Education Consulting (4 Credits)

This practice-based course provides students with an opportunity to learn about the education consulting profession. The first module provides a critical overview of how consultants work with schools, districts, universities and nonprofit organizations to assess educational challenges. The second covers multiple applied research methods, including design thinking, individual and focus group interviews, and secondary data analysis. During the third module students consult for a school, district or nonprofit organization, getting first-hand experience in the profession.
