# **COMPUTER SCIENCE EDUCATION (MINOR)**

Department Website (https://steinhardt.nyu.edu/degree/minor-computerscience-education/)

### **Program Description**

The Computer Science Education (CSE) minor is an 18-credit program designed to allow undergraduate students to develop expertise in teaching computer science (CS) to children and adolescents. The minor provides opportunities for students interested in teaching CS in a variety of settings, including schools, after-school programs, museums, and community centers, to develop research-based knowledge about the teaching and learning of CS. Courses cover CS disciplinary content as well as evidence-based teaching practices and curricular issues for different ages.

The CSE minor provides undergraduate students in the Department of Teaching and Learning who already have some foundational knowledge of education and educational theory the opportunity to broaden their teaching repertoire to include CS, an important and increasingly popular discipline.

Undergraduates outside the Department of Teaching and Learning will be able to develop expertise in issues around education, including methods of supporting student learning and curricular theory related to CS.

The minor requires both CS and CSE courses. In the three required CS courses students will learn foundational CS content, including programming, the design and implementation of algorithms and data structures, how the internal structure of computers is organized, and how machine (assembly) language programming works. In the CSE courses students examine and use methods of instruction associated with CSE for children and adolescents, including the design, implementation, and revision of lesson units. Additionally, students will investigate the spectrum of curricular and teaching approaches utilized in the US and internationally, familiarizing themselves with the terrain of research and practice in computer science education, preparing them to make informed, evidence-based decisions in their future teaching.

# Minor Declaration

To request declaration of a minor, Steinhardt students should discuss requirements with the minor department's advising team and complete the Minor Application (https://www.nyu.edu/students/studentinformation-and-resources/registration-records-and-graduation/formspolicies-procedures.html) in Albert. To request declaration of a crossschool minor, Steinhardt students should complete the online Minor Application available in their Albert Student Center. Students may also use the Minor Application (https://www.nyu.edu/students/studentinformation-and-resources/registration-records-and-graduation/formspolicies-procedures.html) in Albert to request cancellation of a Steinhardt or cross-school minor. For questions related to the declaration or cancellation of a minor, students can contact the Steinhardt Advisement and Registration Team at steinhardt.advisement.registration@nyu.edu.

# **Program Requirements**

Course	Title	Credits
Required Cor	nputer Science Courses	
Complete 12	credits in one of the following school options:	12

To	tal Credits		18		
M	THED-UE 1110	Introduction to Computer Science Education	3		
M	THED-UE 1080	Teaching of Computer Science	3		
Co	Computer Science Education Courses				
	or CS- UY 2214	COMPUTER ARCHITECTURE AND ORGANIZATION			
	CS-UY 2204	DIGITAL LOGIC AND STATE MACHINE DESIGN			
	CS-UY 2134				
	CS-UY 1124				
	Tandon School	of Engineering			
	CSCI-UA 201	Computer Systems Org			
	CSCI-UA 102	Data Structures			
	CSCI-UA 101	Intro to Computer Science			
	College of Arts and Science				

#### Total Credits

Note: Students who are taking any of these courses as a part of their major should refer to their department's policy on double counting courses toward a major and a minor. If students need one or more additional courses, they may take additional CS courses or an education course from the list.

### Additional Education Electives

Those who are taking one or more of the required CS courses as a part of their major may choose from the following electives:

Course	Title 0	Credits			
Human Development Courses					
APSY-UE 20	Human Development I	2			
And one of the following:					
APSY-UE 21	Human Development II: Application for Early Childhood Educators				
APSY-UE 22	Human Development II: Application for Childhoo Educators	d			
APSY-UE 23	Human Development II: Early Adolescents and Adolescents				
Other Electives					
MTHED-UE 1043	Methods of Teaching Middle School Mathematic	s 3			
MTHED-UE 1122	Sociopolitical Contexts of STEME Education.	3			
SCIED-UE 1039	Meth I:Teach of Science in Middle Schools	3			
SOED-UE 1015	Educ as Soc Institution	4			
TCHL-UE 1	Inquiries Into Teaching & Learning I	4			
TCHL-UE 1030	Lang Acquis and Literacy Educ/Multi & Multi Cnt	xt 4			
SPCED-UE 83	Foundations of Spec Educ	3			
SPCED-UE 1005	Teach Stu With Disabili in General Ed Class Rm	4			
SPCED-UE 1010	Principles & Strategies for Teaching Students wi Low Incidence Disabilities <sup>1</sup>	th 3			

<sup>1</sup> Prerequisite: SPCED-UE 83 Foundations of Spec Educ

### **Policies** NYU Policies

University-wide policies can be found on the New York University Policy pages (https://bulletins.nyu.edu/nyu/policies/).

### **Steinhardt Academic Policies**

Additional academic policies can be found the Steinhardt academic policies page (https://bulletins.nyu.edu/undergraduate/culture-education-human-development/academic-policies/).
