Department Website (<https://steinhardt.nyu.edu/programs/science-education/>)

NYSED: 22757 **HEGIS:** 1917.01 **CIP:** 13.1399

Program Description

The BS in Teaching Science, 7-12 offers students a choice of study in biology, chemistry, earth science, or physics. Rigorous courses in the chosen science are combined with a pedagogical foundation that exposes students to methods for teaching science and the development and adaptation of curricula for middle and high school students in multicultural classrooms. Aspiring teachers learn how to address issues of social justice, bias, equity, gender, and ethnicity, and future thinking using strategies that lead to effective science teaching and learning.

The program of study culminates in two semesters of teaching opportunities in a public or independent school setting. Students graduating from the program are eligible for New York State teacher certification for grades 7–12, with an extension for grades 5-6.

Honors

- Honors Societies: Phi Delta Kappa, Kappa Delta Pi, Pi Lambda Theta
- Departmental Honors: Senior Honors Seminar for students with at least a 3.5 GPA, cumulative and major, culminating in an honors thesis based on faculty-supervised independent research

Fieldwork Placement

Be advised that fieldwork placement facilities that provide training required for your program degree, and agencies that issue licenses for practice in your field of study, each may require you to undergo general and criminal background checks, the results of which the facility or agency must find acceptable before it will allow you to train at its facility or issue you a license. You should inform yourself of offenses or other facts that may prevent obtaining a license to practice in your field of study. NYU Steinhardt will not be responsible if you are unable to complete program requirements or cannot obtain a license to practice in your field because of the results of such background.

STEM OPT Benefits for International Students

If you're an international student, you may be able to work in the United States after graduation for an extended period of time. Most students studying on F-1 visas will be eligible for 12 months of Optional Practical Training (OPT) off-campus work authorization. F-1 students in this program may also be eligible for the STEM (Science, Technology, Engineering, or Mathematics) OPT extension, allowing you to extend your time in the United States to pursue degree-related work experience for a total of 36 months or 3 years. For more information on who can apply for this extension visit NYU's Office of Global Services: STEM OPT (<http://www.nyu.edu/students/student-information-and-resources/student-visa-and-immigration/alumni/extend-your-opt/stem-opt.html>).
