

DENTAL HYGIENE (AAS)

NYSED: 90202 HEGIS: 5203.00 CIP: 51.0602

Program Description

The Associate in Applied Science (AAS) Degree Program in Dental Hygiene is comprised of lecture courses in dental and health sciences along with clinical and hands-on experience. The 78 credit curriculum is offered as a **"fast-track" 17-month program, a two-year program or a three-year program**. Dental hygiene students are prepared to perform competently in providing preventive and therapeutic patient oral health care. The dental hygiene program, located within the NYU College of Dentistry, allows students to work side by side with dental (DDS) students, dental faculty and dental hygiene faculty in the clinical portion of the curriculum. By working in these clinical settings with culturally diverse patients, dental hygiene students gain invaluable knowledge and experiences.

Admissions

New York University's Office of Undergraduate Admissions supports the application process for all undergraduate programs at NYU. For additional information about undergraduate admissions, including application requirements, see How to Apply (<https://www.nyu.edu/admissions/undergraduate-admissions/how-to-apply.html>).

For admission requirements and instructions specific to this program, see Admission Requirements (<https://dental.nyu.edu/education/dental-hygiene-programs/admission-requirements.html>).

Program Requirements

Course	Title	Credits
Required Courses		
DHYG1-UD 100	Human Microbiology I	2
DHYG1-UD 110	Oral Anatomy	3
DHYG1-UD 112	Principles of Dental Hygiene I Lecture	2
DHYG1-UD 113	Principles of Dh I Clinic	2
DHYG1-UD 114	Anatomy & Physiology I	3
DHYG1-UD 115	Radiology	2
DHYG1-UD 116	Chemistry for Allied Health	4
DHYG1-UD 125	CPR Hygiene	0
EXWR1-UC 7502	Writing Workshop I	4
DHYG1-UD 120	Anatomy & Physiology II	3
DHYG1-UD 121	Principles of Dh II Lecture	2
DHYG1-UD 122	Prin of Dent Hygiene II Clinic	2
DHYG1-UD 123	Dental Materials Lec	3
DHYG1-UD 124	Oral Embryology & Histology	2
DHYG1-UD 129	Periodontics	2
DHYG1-UD 200	Microbiology II	2
EXWR1-UC 7503	Writing Workshop II	4
DHYG2-UD 130	Prin of Dh III Lec	2
DHYG2-UD 131	Principles of Dh III Clinic	2
DHYG2-UD 132	General & Oral Pathology	3
DHYG2-UD 134	Pharmacology	2
DHYG2-UD 135	Preventive Dentistry & Public Health	3
SOC1-UC 2201	Oral Communications	4

PSYC1-UC 6801 or PSYCH- UA 9001	Intro to Psychology Intro to Psychology	4
DHYG2-UD 136	Nutrition and Health	3
DHYG2-UD 139	Board Review	0
DHYG2-UD 140	Prin of Dh IV Lecture	2
DHYG2-UD 141	Principles of Dh IV Clinic	2
DHYG2-UD 142	Ethics	1
DHYG2-UD 143	Oral Health Education	2
DHYG2-UD 145	Pain Management	2
SOCY1-UC 7200 or SOC-UA 1	Intro to Sociology Intro to Sociology	4

Total Credits **78**

The NYU dental hygiene program is further enhanced by clinical rotations and outreaches. As part of the clinical requirements, students rotate through specialty areas such as orthodontics, periodontics, prosthodontics, implant dentistry, pediatric dentistry, and hospital clinics, while improving their clinical expertise. Domestic and international outreach opportunities in underserved areas are available to students in their second year. Selected students continue to work closely with dental students and other faculty members, providing comprehensive dental treatment to those who may not have access to care.

Upon completion of the 78 credit curriculum, students are qualified to take the clinical board examinations and the dental hygiene national boards, which are requirements for state licensure.

Advanced Standing Plan

NYU Dentistry offers an accelerated degree curriculum within its dental hygiene program for advanced students, creating a path for dentists with international dental degrees who want to pursue careers in dental hygiene. Students will earn an Associate of Applied Science (AAS) degree in dental hygiene in the 12-month program.

- Important: Please review the AAS Advanced Standing Admissions Requirements (<https://dental.nyu.edu/education/dental-hygiene-programs/degree-programs/advanced-standing.html>).
- Contact the admissions officer (cwarren@nyu.edu) for further information.
- Please review the AAS Advanced Standing curriculum (PDF) (<https://dental.nyu.edu/content/dam/nyudental/documents/academic-programs/dental-hygiene/AAS-advanced-standing-track.pdf>)

Total Credits		55

"Fast Track" 17-Month Plan

NYU Dentistry offers an accelerated, continuous, 17-month, Associate in Applied Science (AAS) degree in dental hygiene.

The Fast-Track AAS degree program, the first of its kind in New York State, is designed specifically to enable highly motivated students to gain access to the same innovative, high quality education as that offered by the traditional two-to-three year course of study, but in a more concentrated period. The course of study commences in January and runs continuously, including summer courses, through the following May.

Please review the AAS Fast Track curriculum (PDF) (https://dental.nyu.edu/content/dam/nyudental/documents/academic-programs/dental-hygiene/dh_aasfast.pdf).

Two-Year Plan

The two-year plan is often the most sought-after track of the AAS degree program. It is also the most condensed of the tracks due to its heavy credit load with semesters averaging 18-20+ credits (full-time status at NYU is 12-20 credits). Students navigate through the 78 credit program over two academic years of study. Some students may have courses that are eligible for transfer, which could lessen the student's academic load; however, due to course sequencing, this track still requires a two-year commitment. Class meeting times vary from 8:00 am to 6:00 pm over five days per week. Semesters average 15 weeks.

Please review the AAS Two-Year curriculum (PDF) (https://dental.nyu.edu/content/dam/nyudental/documents/academic-programs/dental-hygiene/dh_aas2yrday.pdf).

Three-Year Plan

The three-year plan extends the full-time two year Associate curriculum, allowing students to complete the required 78 credit program through a less intense full-time credit load. Semesters average 12-15 credits. Some students may have courses eligible for transfer, which could lessen the student's academic load; however, due to course sequencing, this track requires three years for degree completion. This track offers the flexibility that many students need to balance life/ work responsibilities during the week. Class meeting times vary from 8:00 am to 6:00 pm over five days per week. Course flexibility may vary week to week throughout the six semesters. Semesters average 15 weeks.

Please review the AAS Three-Year curriculum (PDF) (https://dental.nyu.edu/content/dam/nyudental/documents/academic-programs/dental-hygiene/dh_aas3yrday.pdf).

Learning Outcomes

Upon successful completion of the program, graduates will:

1. Apply ethical practice of dental hygiene and adhere to legal and regulatory codes of the profession.
2. Use critical thinking skills and comprehensive problem-solving to create evidence-based systemic and oral health care strategies that promote patient health and wellness.
3. Continuously perform self-assessment for life-long learning and professional growth.
4. Promote the values of the dental hygiene profession through service-based activities, positive community affiliations, and active involvement in local organizations.
5. Initiate collaborative approach and communicate effectively with all patients when developing individualized care plans that are specialized, comprehensive, culturally sensitive, and acceptable to all parties involved without discrimination.
6. Use evidence-based decision making to evaluate emerging technology and treatment modalities to integrate into patient dental hygiene care plans to achieve high-quality, cost-effective care.
7. Assume responsibility for professional actions and integrates educational, preventive, and therapeutic oral health services based on accepted scientific theories, research, and the accepted standard of care.
8. Apply quality assurance mechanisms to ensure continuous commitment to accepted standards of care, including health and safety of patient and provider and accurate, consistent and complete documentation of general and oral health services.
9. Initiate consultations and collaborations with all relevant health care providers for the delivery of inter-professional, patient-centered care.
10. Manage medical emergencies by using professional judgment, providing life support, and utilizing required CPR and any specialized training or knowledge.
