

FACILITIES

Faculty Innovations in Teaching and Learning (FITL) Center

The Teaching Innovation Center (<https://engineering.nyu.edu/academics/teaching-innovation/>) works with faculty and staff to support educational and technological initiatives at NYU Tandon. We are dedicated to the advancement of educational practice and maximization of student learning. The Center offers one-on-one consultation sessions as well as weekly drop-in office hours to provide support in curriculum design and development.

MakerSpace

The NYU Tandon MakerSpace (<https://makerspace.engineering.nyu.edu/>) is a cutting edge lab aiming to foster projects at the intersection of technology, creativity and innovation. It features rapid prototyping and PCB production equipment, as well as advanced machining and testing capabilities. The MakerSpace hosts the **Design Lab** which provides NYU students with opportunities to ideate, experiment, prototype, and build their ideas. It nurtures their creative confidence, encourages collaboration and connects them with other parts of the NYU Innovation and Entrepreneurship ecosystem, thus fostering a community of creative technologists, critical thinkers, and social innovators.
