

# MECHANICAL ENGINEERING (BS)

NYSED: 08829 HEGIS: 0910.00 CIP: 14.1901

## Program Description

Mechanical engineering builds the physical systems and devices that define modern society – everything from air conditioning to automobiles, robots to power plants, artificial limbs to escalators, and rocket engines to weather satellites. Mechanical engineering offers almost limitless opportunity for the inventions and innovations that lead to entrepreneurial ventures.

Through hands-on computer and laboratory work in our state-of-the-art facilities, the School of Engineering's Bachelor of Science in Mechanical Engineering (BMSE) program teaches the principles underpinning the discipline and how to apply them in the field. We also develop your talents in such specialized areas as solid and fluid mechanics, machine control systems, and robotic devices. Our BSME degree program is accredited by the Engineering Accreditation Commission of ABET.

Mechanical engineers find careers in industries including national defense, aerospace, automotive, and telecommunications. Mechanical engineering also has a long tradition of breaking new ground in such areas as resource conservation, improved efficiency of energy-consuming devices, and renewable energy sources. There are emerging opportunities in biomedical systems and devices, as well as nanotechnology and mechatronics. Alternatively, our students can use their education as a springboard to law, medicine, corporate management, or further graduate studies.

## Admissions

New York University's Office of Undergraduate Admissions supports the application process for all undergraduate programs at NYU. For additional information about undergraduate admissions, including application requirements, see How to Apply (<https://www.nyu.edu/admissions/undergraduate-admissions/how-to-apply.html>).

## Program Requirements

The program requires the completion of 131 credits, and offers a combined Bachelor of Science degree with a minor in Aerospace Engineering for interested students. See BS/Minor requirements below.

Course	Title	Credits
<b>General Education Requirements</b>		
EXPOS-UA 1	Writing The Essay:	4

1

Students must take at least sixteen credits of elective courses in the humanities and social sciences. The number of total humanities and social sciences credits (including EXPOS-UA 1 Writing The Essay: & EXPOS-UA 2 THE ADVANCED COLLEGE ESSAY) must add up to at least twenty four. At least one humanities and social sciences (HuSS) elective must be an Advanced Seminar Series course. And at least one humanities and social sciences elective must be an Ethics course.

2

STEM<sup>2</sup> electives are satisfied by the following Tandon courses:

- Any level 2 or higher course starting with the prefix AE-UY, BMS-UY, CBE-UY, CM-UY, CE-UY, CS-UY, ECE-UY, EG-UY, FIN-UY, DM-UY, MA-UY, ME-UY, MG-UY, PH-UY, ROB-UY, STS-UY, or VIP-UY
- Any graduate course starting with BE-GY, BI-GY, BT-GY, BTE-GY, CBE-GY, CM-GY, CE-GY, CS-GY, DM-GY, IE-GY, MG-GY, MA-GY, ME-GY, ROB-GY, or TR-GY
- Any course which satisfies Humanities credit must be in excess of the NYU Tandon 24 credit Humanities and Social Sciences (HuSS) requirement to be eligible for STEM<sup>2</sup> elective credit. Double-counting HuSS credit and STEM<sup>2</sup> credit is not permitted.

3

A Math/Science Elective is any Tandon math or science course which is level 2 or higher starting with the prefix BMS-UY, CM-UY, MA-UY, PH-UY.

4

A free elective is any course in any department of the University for which the student has the prerequisites. Free electives may include internships for credit (CP-UY 2xxx or Study Abroad courses). A total of six internship credits may be applied to the BSME degree. Letter graded and pass/fail approved internship courses are allowable. All other Free Electives must be letter graded (i.e. A, B, C, etc).

5

A Physics Elective is any Tandon math or science course which is level 2 or higher starting with the prefix PH-UY.

## Learning Outcomes

Upon successful completion of the program, graduates will be able to demonstrate the following (per ABET):

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

## **Policies**

### **GPA Policy**

Please note that you must earn an average of 2.0 GPA or better after your first four semesters at Tandon, in addition to meeting the Institute requirement of a 2.0 GPA or better for graduation. Seniors with GPAs of 3.5 or better may take certain graduate courses as electives with approval from the departmental adviser.

### **NYU Policies**

University-wide policies can be found on the New York University Policy pages (<https://bulletins.nyu.edu/nyu/policies/>).

### **Tandon Policies**

Additional academic policies can be found on the Tandon academic policy page (<https://bulletins.nyu.edu/undergraduate/engineering/academic-policies/>).
