

SUSTAINABLE URBAN ENVIRONMENTS (MINOR)

Program Description

The program in Sustainable Urban Environments (SUE) prepares students to join scholars, policymakers, and other professionals as they work to create sustainable urban areas. The SUE program combines the liberal arts and technology, to ensure that students are conversant with both the contemporary technical and social problems of sustainability that face cities. Students in the minor can take courses in sustainable cities, urban policy, and city design, as well as courses in civil engineering and infrastructure planning. This minor is open to all NYU majors.

Applying for the Minor

Apply for a minor in Albert using the link in the My Academics section of the Student Center.

Students should apply for the minor before applying for graduation. After applying for the minor, the application is then forwarded to the Home School Advising Office, Host School Advising Office, Host School Department/Program, and the Academic Dean's office.

The departmental advisers governing the minor will have access to approve or disapprove the minor online using the Graduation Tracking Search page. If a student is registered for a course for the minor during their last semester, the adviser can still set the status to departmental approved pending current courses.

Program Requirements

Students seeking a minor in SUE must complete at least 16 credits of courses in the program, as described below:

Course	Title	Credits
SUE Core Courses		
Select one of the following:		4
