

FACILITIES

Centers, Labs & Initiatives

NYU's School of Global Public Health houses many dynamic centers, labs, initiatives and programs (<https://publichealth.nyu.edu/research-scholarship/centers-labs-initiatives/>) where you can immerse yourself in the public health topics that matter most to you – and to the world. Each is unique, offering mentorship, collaboration with faculty and a chance to hone your skills in innovative, action-based learning settings. Research and projects from GPH's centers, labs and initiatives can lead to many outcomes from new publications to policy change.
