

PUBLIC HEALTH (MINOR)

Program Description

The Public Health cross-school minor introduces students to population health issues, causes of poor health outcomes, and strategies to promote and protect health globally and domestically. Students will explore health promotion, disease prevention, epidemiology, and more. This minor prepares students for careers in health professions, social work, business, law, psychology, and other fields.

Admissions

New York University's Office of Undergraduate Admissions supports the application process for all undergraduate programs at NYU. For additional information about undergraduate admissions, including application requirements, see How to Apply (<https://www.nyu.edu/admissions/undergraduate-admissions/how-to-apply.html>).

Policies

Program Policies

Double-Counting Courses

In some cases, courses may be applicable to both major and minor requirements. For the Public Health Minor elective requirements only, we honor the double-counting policy stated by a student's home school. It is also the student's responsibility to ensure they are meeting the credit minimum in order to graduate with declared degrees (major/minor). Students are encouraged to email their home school advisor to ensure the courses will double count so we can do the same.
